First Certificate Avenues Revised Edition Workbook with Key SAGE Publications

The second edition of the Impact Evaluation in Practice handbook is a comprehensive and accessible introduction to impact evaluation for policy makers and development practitioners. First published in 2011, it has been used widely across the development and academic communities. The book incorporates real-world examples to present practical guidelines for designing and implementing impact evaluations. Readers will gain an understanding of impact evaluations and the best ways to use them to design evidence-based policies and programs. The updated version covers the newest techniques for evaluating programs and includes state-of-the-art implementation advice, as well as an expanded set of examples and case studies that draw on recent development challenges. It also includes new material on research ethics and partnerships to conduct impact evaluation. The handbook is divided into four sections: Part One discusses what to evaluate and why; Part Two presents the main impact evaluation methods; Part Three addresses how to manage impact evaluations; Part Four reviews impact evaluation sampling and data collection. Case studies illustrate different applications of impact evaluations. The book links to complementary instructional material available online, including an applied case as well as questions and answers. The updated second edition will be a valuable resource for the international development community, universities, and policy makers looking to build better evidence around what works in development.

For students to benefit from lessons, they must attend, listen and try their best. But at times, almost all teachers struggle to manage classroom behaviour and to motivate students to learn. Drawing on decades of research on behavioural science, this book offers teachers practical strategies to get students learning. The key is students' habits. This book reveals simple yet powerful ways to help students build habits of success. Harry Fletcher-Wood shows how teachers can use behavioural science techniques to increase motivation and improve behaviour. He offers clear guidance on topics such as using role models to motivate students, making detailed plans to help students act and building habits to ensure students keep going. The book addresses five challenges teachers face in encouraging desirable behaviour: Choosing what change to prioritise Convincing students to change Encouraging students to commit to a plan Making starting easy Ensuring students keep going Workshops, checklists and real-life examples illustrate how these ideas work in the classroom and make the book a resource to revisit and share. Distilling the evidence into clear principles, this innovative book is a valuable resource for new and experienced teachers alike.

This book offers the first comprehensive legal study dedicated to the understanding of the Danish EU opt-outs. The impact of these is significant, falling as they do within Union citizenship, the euro, defense cooperation and the Area of Freedom, Security and Justice. Through a re-examination of the opt-outs individually, collectively and temporally, the book sheds light on their legal design and their interplay between international law, EU law and national law. This pioneering book takes a legal-doctrinal approach, which provides readers with a solid understanding of the opt-outs. Academics, judges and European Union civil servants will find this invaluable.

Dad's Guide To Pregnancy For Dummies John Wiley & Sons Mechanisms for individuals to bring claims under international law have become increasingly common in recent decades, particularly in human rights and investment law. Nonetheless, when the International Law Commission codified the law of State responsibility, it largely ignored the bringing of international claims by individuals, and the relationship between such claims and those brought on the interstate level. Overlapping Individual and Interstate Claims in International Law is the first dedicated monograph examining this relationship - one that is of mounting importance on both a practical and theoretical level. This work provides a comprehensive survey of the potential for overlapping individual and interstate claims to arise. It underlines issues of fairness, consistency, and interference with autonomy that can result when multiple claimants vie to have their claims determined before different forums. The author analyses in detail how treaty provisions and various rules and principles of international law can be expected to regulate such overlapping claims, considering, among others, the local remedies rule, the rule precluding double recovery, res judicata, waiver, and certain circumstances precluding wrongfulness. The book clarifies the nature of international claims, including in the theoretically muddled field of diplomatic protection, and

highlights undertheorized foundations of topical debates concerning the use of countermeasures and self-defence outside of the interstate arena. It concludes with a human rights-oriented proposal for resolving the complex policy issues to which these overlapping claims give rise.

Always Be Ready to Give an Answer! Bloomsbury Publishing Picture a juvenile correctional facility from the 1970s, one that houses offenders who committed murders, serious assaults, gang-related crimes, robberies, and sex offenses. Juvenile offenders are sent to the facility to participate in treatment programs. A visitor might find offenders playing ping-pong, lifting weights, or watching television. ?Is this the best we can do with offenders? Why can't they learn about their victims and about the harm they caused The newly appointed director of the California Youth Authority (CYA) posed these questions in the early 1980s, triggering the development of a powerful and innovative program known then as the Impact of Crime on Victims (ICV). CYA staff asserted that traditional models of offender programming were ineffective in curbing delinquent behavior and that, subsequently, offenders returned to the community unchanged. Treatment programs at the time addressed what offenders needed: education, vocational training, substance abuse intervention, and life skills...
