When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better understand how such choices might arise in your own writing. The idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are influencing your own responses as a reader. What is it about the way this text is written that makes you feel and respond the way you do?

Is wealth the same as happiness? How is the quality of life to be evaluated, measured, and most importantly, achieved? The authors provide provocative and engaging answers to these questions and many more, in this new, multidisciplinary and practical approach to an important area of social research. Taking the individual as the point of departure, the authors consider both objective circumstances and their subjective impact on people's lives. Prominent authors from an array of different academic disciplines discuss issues including the psychology of subjective well-being, destitution and basic needs, the environment, women and the family, health matters, the impact of advertising and consumerism, employment and work related issues, and the role of the state.

This New York Times and Wall Street Journal bestseller shows us that America's political system isn't broken. The truth is scarier: it's working exactly as designed. In this "superbly researched" (The Washington Post) and timely book, journalist Ezra Klein reveals how that system is polarizing us—and how we are polarizing it—with disastrous results. "The American political system—which includes everyone from voters to journalists to the president—is full of rational actors making rational decisions given the incentives they face," writes political analyst Ezra Klein. "We are a collection of functional parts whose efforts combine into a dysfunctional whole." "A thoughtful, clear and persuasive analysis" (The New York Times Book Review), *Why We're Polarized* reveals the structural and psychological forces behind America's descent into division and

dysfunction. Neither a polemic nor a lament, this book offers a clear framework for understanding everything from Trump's rise to the Democratic Party's leftward shift to the politicization of everyday culture. America is polarized, first and foremost, by identity. Everyone engaged in American politics is engaged, at some level, in identity politics. Over the past fifty years in America, our partisan identities have merged with our racial, religious, geographic, ideological, and cultural identities. These merged identities have attained a weight that is breaking much in our politics and tearing at the bonds that hold this country together. Klein shows how and why American politics polarized around identity in the 20th century, and what that polarization did to the way we see the world and one another. And he traces the feedback loops between polarized political identities and polarized political institutions that are driving our system toward crisis. "Well worth reading" (New York magazine), this is an "eye-opening" (O, The Oprah Magazine) book that will change how you look at politics—and perhaps at yourself.

How to Read Like a Writer Candlewick Press

"Do we still know how to read a novel?" John Sutherland, Chairman of the 2005 Booker Prize Committee, asks. His disheartened answer is an unequivocal, "No." But Sutherland has not given up hope. With acerbic wit and intellect, he traces the history of what it used to mean to be well-read and tells readers what it still means today. Using this delightful book as a means to an end, he reminds readers how the delicate charms of fiction can be at once wonderful and inspired and infuriating. On one level this is a book about novels: how they work, what they're about, what makes them good or bad, and how to talk about them. At a deeper level, this is a book in which one of the most intimate têtes-à-têtes is described—one in which a reader meets a novel. Will a great love affair begin? Will the rendezvous end in disappointment? Who can say? In order for the relationship to take its appropriate course all the details must be clearly acknowledged and understood for their complexities: plot, point of view, character, style, pace, first and last sentences, and even beauty. Still, Sutherland knows a true understanding of fiction is more than a flirtation with text and style—it is a business. Taking his readers on a trip to the bookshop, he helps them judge a book by its cover based on design and color, wondering aloud what genre might be best, even going so far as to analyze one of the latest American bestsellers to further help the buying reader choose the novel that is right for him or her. In a book that is as wry and humorous as it is learned and opinionated, John Sutherland tells you everything you always wanted to know about how to read fiction better than you do now (but, were afraid to ask).

Buried by the Times Penguin

This Text-book traces the evolution of the newspaper, documenting its changing form, style and content as well as identifying the different roles ascribed to it by audiences, government and other social institutions. Starting with the early 17th century, when the first prototype newspapers emerged, through Dr Johnson, the growth of the radical press in the early 19th century, the Lord Northcliffe revolution in the early 20th century, the newspapers wars of the 1930s and the rise of the tabloid in the 1970s, right up to Rupert Murdoch and the online revolution, the book explores the impact of the newspapers on our lives and its role in British society. Using lively and entertaining examples, Kevin Williams illustrates the changing form of the newspaper in its social, political, economic and cultural context. As well as telling the story of the newspaper, he explores key topics in detail, making this an ideal text for students of journalism and the British newspaper. Issues include: newspapers and social change the changing face of regional newspapers the impact of new technology development of reporting techniques forms of press regulation

Farewell Song (Modern Classics) BRILL

Rabindranath Tagore reinvented the Bengali novel with *Farewell Song*, blurring the lines between prose and poetry and creating an effervescent blend of romance and satire. Through Amit and Labanya and a brilliantly etched social milieu, the novel addresses contemporary debates about 'good' and 'bad' writing, the nature of love and conjugality, and the influence of Western culture on Bengali society. Set against the idyllic backdrop of Shillong and the mannered world of elite Calcutta society, this sparkling novel expresses the complex vision and the mastery of style that characterized Tagore's later works. Tagore was not only an immensely versatile poet; he was also a great short story writer, novelist, playwright, essayist, and composer of songs. *Amartya Sen Stewart's Newspaper Reading Book, Extr. from the Newspapers of the Present Time, Selected, Annotated by W.S. Ross - Scholar's Choice Edition* Oxford University Press, USA Read the Wall Street Journal Bestseller for "cultivating intense focus" for fast, powerful performance results for achieving success and true meaning in one's professional life (Adam Grant, author of *Give and Take*). Deep work is the ability to focus without distraction on a cognitively demanding task. It's a skill that allows you to quickly master complicated information and produce better results in less time. Deep Work will make you better at what you do and provide the sense of true fulfillment that comes from craftsmanship. In short, deep work is like a super power in our increasingly competitive twenty-first century economy. And yet, most people have lost the ability to go deep—spending their days instead in a frantic blur of e-mail and social media, not even realizing there's a better way. In *Deep Work*, author and professor Cal Newport flips the narrative on impact in a connected age. Instead of arguing distraction is bad, he instead celebrates the power of its opposite. Dividing this book into two parts, he first makes the case that in almost any profession, cultivating a deep work ethic will produce massive benefits. He then presents a rigorous training regimen, presented as a series of four "rules," for transforming your mind and habits to support this skill. 1. Work Deeply 2. Embrace Boredom 3. Quit Social Media 4. Drain the Shallows A mix of cultural criticism and actionable advice, *Deep Work* takes the reader on a journey through memorable stories—from Carl Jung building a stone tower in the woods to focus his mind, to a social media pioneer buying a round-trip business class ticket to Tokyo to write a book free from distraction in the air—and no-nonsense advice, such as the claim that most serious professionals should quit social media and that you should practice being bored. *Deep Work* is an indispensable guide to anyone seeking focused success in a distracted world. In the eleventh century Murasaki Shikibu, a lady in the Heian court of Japan, wrote the world's first novel. But *The Tale of Genji* is no mere artifact. It is, rather, a lively and astonishingly nuanced portrait of a refined society where every dalliance is an act of political consequence, a play of characters whose inner lives are as rich and changeable as those imagined by Proust. Chief of these is "the shining Genji," the son of the emperor and a man whose passionate impulses create great turmoil in his world and very nearly destroy him. This edition, recognized as the finest version in English, contains a dozen chapters from early in the book, carefully chosen by the translator, Edward G. Seidensticker, with an introduction explaining the selection. It is illustrated throughout with woodcuts from a seventeenth-century edition.

As seen in *Time*, *USA TODAY*, *The Atlantic*, *The Wall Street Journal*, and on CBS *This Morning*, BBC, PBS, CNN, and NPR, iGen is crucial reading to understand how the children, teens, and young adults born in the mid-1990s and later are vastly different from their Millennial predecessors, and from any other generation. With generational divides wider than ever, parents, educators, and employers have an urgent need to understand today's rising generation of teens and young adults. Born in the mid-1990s up to the mid-2000s, iGen is the first generation to spend their entire adolescence in the age of the smartphone. With social media and texting replacing other activities, iGen spends less time with their friends in person—perhaps contributing to their unprecedented levels of anxiety, depression, and loneliness. But technology is not the only thing that makes iGen distinct from every generation before them; they are also different in how they spend their time, how they behave, and in their attitudes toward religion, sexuality, and politics. They socialize in

completely new ways, reject once sacred social taboos, and want different things from their lives and careers. More than previous generations, they are obsessed with safety, focused on tolerance, and have no patience for inequality. With the first members of iGen just graduating from college, we all need to understand them: friends and family need to look out for them; businesses must figure out how to recruit them and sell to them; colleges and universities must know how to educate and guide them. And members of iGen also need to understand themselves as they communicate with their elders and explain their views to their older peers. Because where iGen goes, so goes our nation—and the world.

Whether a story appears in print, on television, or on the Internet depends on who is interested, its value to advertisers, the costs of assembling the details, and competitors' products. But in *All the News That's Fit to Sell*, economist James Hamilton shows just how this happens. Furthermore, many complaints about journalism--media bias, soft news, and pundits as celebrities--arise from the impact of this economic logic on news judgments. This is the first book to develop an economic theory of news, analyze evidence across a wide range of media markets on how incentives affect news content, and offer policy conclusions. Media bias, for instance, was long a staple of the news. Hamilton's analysis of newspapers from 1870 to 1900 reveals how nonpartisan reporting became the norm. A hundred years later, some partisan elements reemerged as, for example, evening news broadcasts tried to retain young female viewers with stories aimed at their (Democratic) political interests. Examination of story selection on the network evening news programs from 1969 to 1998 shows how cable competition, deregulation, and ownership changes encouraged a shift from hard news about politics toward more soft news about entertainers. Hamilton concludes by calling for lower costs of access to government information, a greater role for nonprofits in funding journalism, the development of norms that stress hard news reporting, and the defining of digital and Internet property rights to encourage the flow of news. Ultimately, this book shows that by more fully understanding the economics behind the news, we will be better positioned to ensure that the news serves the public good.

A Survey of Literary Reading in America Renard Press Ltd

Two of the most trusted reviewers in the field join with top authors, illustrators, and critics in a definitive

guide to choosing books for children—and nurturing their love of reading. *A FAMILY OF READERS* is the definitive resource for parents interested in enriching the reading lives of their children. It's divided into four sections: 1. Reading to Them: Choosing and sharing board books and picture books with babies and very young children. 2. Reading with Them: Launching the new reader with easy readers and chapter books. 3. Reading on Their Own: Exploring what children read—and how they read—by genre and gender. 4. Leaving Them Alone: Respecting the reading privacy of the young adult. Roger Sutton knows how and why children read. He must, as the editor in chief of *THE HORN BOOK*, which since 1924 has been America's best source for reviews of books for young readers. But for many parents, selecting books for their children can make them feel lost. Now, in this essential resource, Roger Sutton and Martha V. Parravano, executive editor at the magazine, offer thoughtful essays that consider how books are read to (and then by) young people. They invite such leading authors and artists as Maurice Sendak, Katherine Paterson, Margaret Mahy, and Jon Scieszka, as well as a selection of top critics, to add their voices about the genres they know best. The result is an indispensable readers' companion to everything from wordless board books to the most complex and daring young adult novels.

The Black Newspaper and the Chosen Nation shows how antebellum African Americans used the newspaper as a means for translating their belief in black "chosenness" into plans and programs for black liberation. During the decades leading up to the Civil War, the idea that God had marked black Americans as his chosen people on earth became a central article of faith in northern black communities, with black newspaper editors articulating it in their journals. Benjamin Fagan shows how the early black press helped shape the relationship between black chosenness and the struggles for black freedom and equality in America, in the process transforming the very notion of a chosen American nation. Exploring how cultures of print helped antebellum black Americans apply their faith to struggles grand and small, *The Black Newspaper and the Chosen Nation* uses the vast and neglected archive of the early black press to shed new light on many of the central figures and questions of African American studies.

Kirkus Reviews "Carter G. Woodson didn't just read history. He changed it." As the father of Black History Month, he spent his life introducing others to the history of his people. Carter G. Woodson was born to two formerly enslaved people ten years after the end of the Civil War. Though his father could not read, he believed in being an informed citizen, so Carter read the newspaper to him every day. As a teenager, Carter went to work in the coal mines, and there he met Oliver Jones, who did something important: he asked Carter not only to read to him and the other miners, but also research and find more information on the subjects that interested them. "My interest in penetrating the past of my people was deepened," Carter wrote. His journey would take him many more years, traveling around the world and transforming the way people thought about history. From an award-winning team of author Deborah Hopkinson and illustrator Don Tate, this first-ever picture book biography of Carter G. Woodson emphasizes the importance of pursuing curiosity and encouraging a hunger for knowledge of stories and histories that have not been told. Illustrations also feature brief biological sketches of important figures from African and African American history. Teacher's Guide available.
