Content Area Reading and Literacy Prentice Hall

Being literate in an academic discipline means more than simply being able to read and comprehend text; it means you can think, speak, and write as a historian, scientist, mathematician, or artist. Doug Buehl strips away the one-size-fits-all approach to content area literacy and presents a much-needed instructional model for disciplinary literacy, showing how to mentor middle and high school learners to become "academic insiders" who are college and career ready. This thoroughly revised second edition of *Developing Readers in the Academic Disciplines* shows how to help students adjust their thinking to comprehend a range of complex texts that fall outside their reading comfort zones. This book --a natural companion to Buehl's *Classroom Strategies for Interactive Learning*, which has been bolstering student comprehension for almost three decades--provides the following supports for teachers: Instructional tools that adapt generic literacy practices to discipline-specific variations Strategies for frontloading instruction to activate and build background knowledge New approaches for encouraging inquiry around disciplinary texts In-depth exploration of the role of argumentation in informational text Numerous examples from science, mathematics, history and social studies, English/language arts, and related arts to show you what vibrant learning looks like in various classroom settings *Developing Readers in the Academic Disciplines* introduces teachers from all disciplines to new kinds of thinking and, ultimately, teaching that helps students achieve new levels of understanding.

Improving Adolescent Literacy Routledge

The 3rd Edition of *Literacy & Learning in the Content Areas* helps readers build the knowledge, motivation, tools, and confidence they need as they integrate literacy into their middle and high school content area classrooms. Its unique approach to teaching content area literacy actively engages preservice and practicing teachers in reading and writing and the very activities that they will use to teach literacy to their own students in middle and high school classrooms. Rather than passively learning about strategies for incorporating content area literacy activities, readers get hands-on experience in such techniques as mapping/webbing, anticipation guides, booktalks, class websites, and journal writing and reflection. Readers also learn how to integrate children's and young adult literature, primary sources, biographies, essays, poetry, and online content, communities, and websites into their classrooms. Each chapter offers concrete teaching examples and practical suggestions to help make literacy relevant to students' content area learning. Author Sharon Kane demonstrates how relevant reading, writing, speaking, listening, and visual learning activities can improve learning in content area subjects and at the same time help readers meet national content knowledge standards and benchmarks.

Taking Action on Adolescent Literacy Pearson

To help future teachers learn to infuse literacy instruction into all content areas, these AUTHORS present a rich panoply of engaging instructional strategies that research has shown to be effective for improving reading and writing in middle and secondary school students. After discussing common questions asked by content area teachers, a full chapter is devoted to each of eight strategies-anticipatory activities, read-alouds/shared reading, questioning, notetaking/notemaking, graphic organizers, vocabulary instruction, writing to learn, and reciprocal teaching-coupling discussions with examples from the AUTHOR's own research in a diverse, urban secondary school. Features a common structure for presenting each strategy-1) scenario of a teacher using the strategy; 2) rationale for the strategy and its supporting research; and 3) descriptions of how the strategy works and authentic examples of the strategy in use. Additionally, in order to meet the challenge of today's inclusive, multicultural classrooms, the book presents only those strategies that have been proven effective with all learners - including those for whom English is not their first language. For future content area reading teachers.
