This book covers the general engineering knowledge required by candidates for the Department of Transport's Certificates of Competency in Marine Engineering, Class One and Class Two. The text is updated throughout in this third edition, and new chapters have been added on production of fresh water and on noise and vibration. Reference is also provided to up-to-date papers and official publications on specialized topics. These updates ensure that this little volume will continue to be a useful pre-examination and revision text. - Marine Engineers Review, January 1992

At one time British ships
carried half of the world's
trade, transporting every
conceivable type of freight
from and to all four corners of
the globe – and in times of
crisis the merchant fleet has
also offered military
assistance. In fact, the
merchant convoys and armed
cruisers that defied the
German blockades to supply
Britain in the First World War
were so pivotal that they were
recognised as a second 'navy'

– the Merchant Navy. This fleet
again saw service in the
Second World War, continuing
to keep Britain provisioned
even in its darkest hour.
Richard Woodman here
relates the Merchant Navy's
colourful history and brings to
life the day-to-day experiences
of the seamen.

IMU CET as you know is

an exam for taking

admission in to the

maritime colleges. IMU

Common Entrance Test

(CET), which is also

known as IMU CET, is

conducted by Indian

Maritime University, a

government recognized

University. The University

conducts the common

entrance test for

admission in its

undergraduate level

program in the field of

maritime engineering.

PCM (Physics, Chemistry

and Math) has important

role in IMU CET and all

competitive exams. Even

a single question can

change your rank, life and

future. The questions on

PCM asked in various

competitive examinations

aren't easy to solve

without having enough

practice of the concepts

on which the same are

based. The book is

especially helpful to

students who are

preparing for IMU CET

exam. While designing

this book, the format and

the nature of the

examination have been

taken into consideration.

The book can also be

used by students who are

preparing for other

competitive examinations.

The Official ACT Prep

Guide 2020 - 2021, (Book +

5 Practice Tests + Bonus

Online Content) IMO

Publishing

This second edition of IMU

- CET Gateway To Maritime

Education provides a

comprehensive cover to the

needs of marine students. It

is ideal for students preparing to enter the Maritime Industry and incorporates all recent amendments.

Predict the Future with MLPs, CNNs and LSTMs in Python Simon and Schuster

This text is meant to fill a long felt need for a comprehensive and authoritative book on heat and mass transfer for students of Mechanical/Chemical/Aeronautical/Production/ Metallurgical engineering. The dual objective of understanding the physical phenomena involved and the ability to formulate and solve typical problems by an average student has been kept in mind while writing this book. In this text, an effort has been

made to identify the similarities in both qualitative and quantitative approach, between heat transfer and mass transfer. This gives a better understanding of the phenomena of mass transfer. The subject matter has been developed to a sufficiently advanced stage in a logical and coherent manner with neat illustrations along with an adequate number of solved examples. A large number of problems (with answers) at the end of each chapter assist in the pedagogy. The book has been appended with a set of selected MCQs. The role of experimentation in the teaching of Heat and Mass Transfer is well established. Properly designed experiments

reinforce the teaching of basic principles more thoroughly. Keeping this in mind one full chapter comprising 12 typical experiments forms another special feature of this text. Contents: Basic Concepts Fundamental Equations of Conduction One-Dimensional Steady State Heat Conduction Multi-Dimensional Steady State Conduction Transient Heat Conduction Fundamentals of Convective Heat Transfer Forced Convection Systems Natural Convection Thermal Radiation - Basic Relations Radiative Heat Exchange Between Surfaces Boiling and Condensation Heat Exchangers Diffusion Mass Transfer Convective Mass Transfer

Experiments in Engineering Heat and Mass Transfer.
