Professor Stanley
Feldman decided

April, 28 2025

to write his memoirs when, in 2008, he was pronounced dead. Fortunately, however, this was not by one of his fellow doctors but instead by an Australian medical journal - prompting much shock the next time he visited his friends down under! He has been a doctor with the NHS for over 60 years now, and has presided over the transition of medicine into the modern world. His career has seen both the sublime and the ridiculous; Stanley has worked with some of the greatest doctors in the world on pioneering new

heart surgeries that have changed medicine forever - and he has been the guinea pig for experiments that have ended in temporary paralysis! Stanley's career is a microcosm of the developments of the medical system in the UK over the last 60 years - from the birth of the NHS onwards - and he has obtained many hilarious anecdotes along the way, all of which can be found in **Confessions of a Doctor** **If at Birth You Don't Succeed** HarperCollins In Stitches HarperCollins UK **The Old-fashioned**

Fairy Book Library of Alexandria
“Poignant account of an unexpectedly homeless man’s road to rebirth, accompanied by his trusty canine companion . . . thoroughly life-affirming.” —Kirkus Reviews
One day, Richard LeMieux had a happy marriage, a palatial home, and took \$40,000 Greek vacations. The next, he was living out of a van with only his dog, Willow, for company. This astonishingly frank memoir tells the story of one man’s resilience in the face of economic disaster. Penniless, a failed suicide, estranged from his family, and living “the vehicular lifestyle” in Washington state, LeMieux chronicles

his journey from the Salvation Army kitchens to his days with “C”—a philosopher in a homeless man’s clothing—to his run-in with Pastor Bob and other characters he meets on the streets. Along the way, he finds time to haunt public libraries and discover his desire to write. LeMieux’s quiet determination and his almost pious willingness to live with his situation are only a part of this politically and socially charged memoir. The real story of an all-too-common American condition, this is a heartfelt and stirring read. “Reads like a novel . . . But it has the ring of truth, and an uplifting message that endures.” —The New York Times

“It’s easy to look from afar onto the world LeMieux writes about. People panhandling. Living in cars. Most of us probably figure they’ve always been down. But how far did they fall? Maybe farther than we think.” —The Seattle Times “For those who yearn to believe in the basic decency of most human beings, this book provides abundant evidence.” —The Christian Science Monitor Edward’s Crochet Imaginarium Hachette UK
The junior doctor . . . back on the wards. After a year on the streets treating outreach patients, Max Pemberton is back in the relative comfort of hospital. This time running between elderly care

and the dementia clinic to A&E and outpatients. No longer inexperienced (Max and his doctor friends can now tell when someone is actually dead), they are on the front line of patient care for better or worse. In the midst of an NHS still under threat (some things never change) there are committed and caring doctors, big issues, hope, frustration, huge societal changes affecting the entire health system as well as the general drama of everyday life in a big hospital, from biscuit wars to resus. It’s not like television, this is real - there are no easy answers - but *The Doctor Will See You Now* will give you hope that there are enough good doctors asking the questions.

American professor Thayne Delver sets out to discover the writings of English abstract artist Matthew Tresilian and uncovers things that greatly impact the artist's children--the last Tresilians.

Structures or Why things don ' t fall down Pavilion I am very much aware that it is an act of extreme

rashness to attempt to write an elementary book about structures.

Indeed it is only when the subject is stripped of its mathematics that one begins to realize how difficult it is to pin down and describe those structural concepts which are often called ' elementary'; by which I suppose we mean 'basic' or 'fundamental'. Some of the omissions and oversimplifications are intentional but no doubt some of them are due to my own brute ignorance and lack of understanding of the subject. Although this volume is more or less a sequel to

The New Science of Strong Materials it can be read as an entirely separate book in its own right. For this reason a certain amount of repetition has been unavoidable in the earlier chapters. I have to thank a great many people for factual information, suggestions and for stimulating and sometimes heated discussions. Among the living, my colleagues at Reading University have been generous with help, notably Professor W. D. Biggs (Professor of Building Technology), Dr Richard Chaplin, Dr Giorgio

Jeronimidis, Dr Julian Vincent and Dr Henry Blyth; Professor Anthony Flew, Professor of Philosophy, made useful suggestions about the last chapter. I am also grateful to Mr John Bartlett, Consultant Neurosurgeon at the Brook Hospital. Professor T. P. Hughes of the University of the West Indies has been helpful about rockets and many other things besides. My secretary, Mrs Jean Collins, was a great help in times of trouble. Mrs Nethercot of Vogue was kind to me about dressmaking. Mr Gerald Leach and also many of the editorial staff of

Penguins have exercised their accustomed patience and helpfulness. Among the dead, I owe a great deal to Dr Mark Pryor - lately of Trinity College, Cambridge - especially for discussions about biomechanics which extended over a period of nearly thirty years. Lastly, for reasons which must surely be obvious, I owe a humble oblation to Herodotus, once a citizen of Halicamassus. Mr. Nick's Knitting Abrams Assisting in a reenactment of a Civil War battle, bed-and-breakfast owner Stanley Waters finds himself on the case when the mock

skirmish results in the actual death of a local businessman. 17,500 first printing. Mystery Guild Feat Alt. Your Life In My Hands - a Junior Doctor's Story Astra Publishing House The hilarious, shocking and occasionally tragic truth about the working life of a British GP, written for the lay reader. Dr Tony Copperfield is an average GP in an average town. He spends his life fighting off the worried, well armed with internet print outs and health pages torn from newspapers, dealing with youngsters with meningitis, worrying about swine flu, mopping up vomit, shouting at bureaucrats and banging his head against the brick walls

of the NHS. Perfect for anyone who has ever wondered what really goes on in a GP practice.

Galaxy's Most Wanted #2: Into the Dorkness

HarperCollins UK

'I am a junior doctor. It is 4 a.m. I have run arrest calls, treated life-threatening bleeding, held the hand of a young woman dying of cancer, scuttled down miles of dim corridors wanting to sob with sheer exhaustion, forgotten to eat, forgotten to drink, drawn on every fibre of strength that I possess to keep my patients safe from harm.'
How does it feel to

be spat out of medical school into a world of pain, loss and trauma that you feel wholly ill-equipped to handle? To be a medical novice who makes decisions which - if you get them wrong - might forever alter, or end, a person's life? To toughen up the hard way, through repeated exposure to life-and-death situations, until you are finally a match for them? In this heartfelt, deeply personal account of life as a junior doctor in today's health service, former television journalist turned doctor, Rachel Clarke, captures the extraordinary

realities of ordinary life on the NHS front line. From the historic junior doctor strikes of 2016 to the 'humanitarian crisis' declared by the Red Cross, the overstretched health service is on the precipice, calling for junior doctors to draw on extraordinary reserves of what compelled them into medicine in the first place - and the value the NHS can least afford to lose - kindness. Your Life in My Hands is at once a powerful polemic on the systematic degradation of Britain's most vital public institution, and a love letter of

optimism and hope to that same health service and those who support it. This extraordinary memoir offers a glimpse into a life spent between the operating room and the bedside, the mortuary and the doctors' mess, telling powerful truths about today's NHS frontline, and capturing with tenderness and humanity the highs and lows of a new doctor's first steps onto the wards in the context of a health service at breaking point - and what it means to be entrusted with carrying another's life in your hands. 'Eloquent and moving' - Henry

Marsh 'There have been many books written by young doctors... but none comes close to Clarke's' - Sunday Times 'From the very heart of the NHS comes this brilliant insight into the continuing crisis in the health service. Rachel Clarke writes as the accomplished journalist she once was and as the leading junior doctor she now is - writing with humanity and compassion that at times reduced me to tears.' - Jon Snow, Channel 4 News 'Dr Clarke has written a blockbuster, a page-turner, a tear-jerker. This is a "from-the-heart" front-line

account of the human cost of the wanton erosion of a magnificent ideal - healthcare free at the point of need, funded through public taxation, available to all - made real in the UK for near 70 years. It is a love-song for the wonderful National Health Service that has embodied - to an extent equalled nowhere in the world - the principle that healthcare is not a commodity but a great duty of state.' - Prof. Neena Modi, President of the Royal College of Paediatrics and Child Health 'A powerful account of life on the NHS frontline. If only Theresa May and

Jeremy Hunt could see the passion behind the people in the NHS, they might stop treating them as the enemy, and understand that without them we don't have an NHS worth the name.' - Alastair Campbell

The Doctor Will See You Now
Little, Brown Books for Young Readers

This popular and well-reviewed book has now been revised with the assistance of several enthusiastic readers, former and current expatriates and Kenyan and Tanzanian friends. The

captivating story recounts the humour and tragedy of the author's life as a young boy growing up in what was then colonial Tanganyika and Kenya, and the newly independent countries which emerged. It is a must-read for anyone interested in Africa before and after the Winds of Change swept across the continent to alter the lives of so many lucky enough to experience those times. Like many who were born and lived in Africa, the author's life

was not the easy one people think colonial expatriates enjoyed, and he relates so vividly his own tragic experiences with hardship, danger and death. Many perils abounded from wild animals, venomous snakes and deadly tropical illnesses.

Notwithstanding the ever-present black shadow of death and danger, was the natural instinct of kids to have fun, and the escapades and pleasure the author and his contemporaries created for themselves is related by

Penhaligon with rib-aching humour.

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection

according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

Angel Crawford has buried her loser past and is cruising along in undead high gear—that is, until a murder-by-decapitation sends her on a hazardous detour. As Angel hunts for the killer, she uncovers a scheme that would expose zombies to the public and destroy the life she's built, and she's

determined not to rest until she finds out who ' s behind it. Soon she ' s neck-deep in lies, redneck intrigue, zombie hunters, and rot-sniffing cadaver dogs. It ' s up to her to unravel the truth and snuff out the conspiracy before the existence of zombies makes headline news and she ' s outed as a monster. But Angel hasn ' t quite escaped the pill-popping ghosts of her past—not with an illicit zombie pharmaceutical at her fingertips. Good thing she ' s absolutely sure she can handle the drug ' s unpredictable side effects and still take down the bad guys...or maybe she ' s only one bad choice away from being dead meat—for real this time. Angel

knows a thing or two about kicking ass, but now the ass she needs to kick might be her own.

This collection of true narratives reflects the dynamism and diversity of nurses, who provide the first vital line of patient care. Here, nurses remember their first “sticks,” first births, and first deaths, and reflect on what gets them though long, demanding shifts, and keeps them in the profession.

The stories reveal many voices from nurses at different

stages of their careers: One nurse-in-training longs to be trusted with more

“important” procedures, while another questions her ability to care for nursing home residents. An efficient young emergency room nurse finds his life and career irrevocably changed by a car accident. A nurse practitioner wonders whether she has violated professional boundaries in her care for a homeless man with AIDS, and a home care case manager is the sole attendee at

a funeral for one of her patients. What connects these stories is the passion and strength of the writers, who struggle against burnout and bureaucracy to serve their patients with skill, empathy, and strength.

In *Stitches* Simon and Schuster From the man with a device lodged far inside his body whose batteries refuse to run out to a woman with a plunger super-glued to her vagina, In *Rude Health* recounts real life tales from the coal face of the NHS. From doctors, nurses, physiotherapists, psychiatrists and

dentists come a range of eye-popping, side-splitting acts of misadventure that have had the medical profession weeping into their face masks as they attended to members of the great British public in their hour of need. From the publishers of UK Booksellers Association Top 5 Christmas book, 101 *Uses of a Dead Kindle*, In *Rude Health* is a riotous account of the weird, the warped and the whacky ways we end up in the hands of the medical profession.
