Times Bestseller updated with a new chapter on Amir's

experiences during the coronavirus pandemic and being

on the frontlines of the historic vaccination effort. 60

hours a week 240 patients 10 minutes to make a diagnosis

Welcome to the surgery. Charting his 15 years working as

a GP, from rookie to becoming a partner in one of the

UK's busiest surgeries, Dr Amir Khan's stories are as

much about community and care as they are about blood tests and bodily fluids. Along the way, he introduces us to the patients that have taught him about love, loss and family - from the regulars to the rarities - giving him the most unbelievable highs and crushing lows, and often in just 10 minutes. There is the unsuspecting pregnant woman about to give birth at the surgery; the man offering to drop his trousers and take a urine sample there and then; the family who needs support through bereavement, the vulnerable child who will need continuing care for a long-term health condition; and, of course, the onset of COVID-19 that tested the surgery at every twist and turn. But, it's all in a day's work for Amir. *The Doctor Will See You Now* is a powerful story of hope, love and compassion, but it's also a rare insider account of what really goes on behind those surgery doors.

BIG DICK, little dick Penguin

Building on best-selling texts over three decades, this thoroughly revised new edition is essential reading for both primary and secondary school teachers in training and in practice, supporting both initial school-based

training and extended career-long professionalism. Considering a wide range of professionally relevant topics, *Reflective Teaching in Schools* presents key issues and research insights, suggests activities for classroom enquiry and offers guidance on key readings. Uniquely, two levels of support are offered: - practical, evidence-based guidance on key classroom issues – including relationships, behaviour, curriculum planning, teaching strategies and assessment processes; - routes to deeper forms of expertise, including evidence-informed 'principles' and 'concepts' to support in-depth understanding of teacher expertise. Andrew Pollard, former Director of the UK's Teaching and Learning Research Programme, led development of the book, with support from primary and secondary specialists from the University of Cambridge, UK. *Reflective Teaching in Schools* is part of a fully integrated set of resources for primary and secondary education. *Readings for Reflective Teaching in Schools* directly complements and extends the chapters in this book. Providing a compact and portable library, it is particularly helpful in school-based teacher education. The website, reflectiveteaching.co.uk, offers supplementary resources including reflective activities, research briefings, advice on further reading and additional chapters. It also features a glossary, links to useful websites, and a conceptual framework for deepening expertise. This book is one of the *Reflective Teaching Series* – inspiring education through innovation in early years, schools, further, higher and adult education.

The eighth book in Laura Ingalls Wilder's treasured *Little House* series, and the recipient of a Newbery Honor—now available as an ebook! This digital version features Garth Williams's classic illustrations, which appear in vibrant full color on a full-color device and in rich black-and-white on all other devices. Fifteen-year-old Laura lives apart from her family for the first time, teaching school in a claim shanty twelve miles from home. She is very homesick, but she knows that her earnings can help pay for her sister Mary's tuition at the college for the blind. Only one thing gets her through the lonely weeks—every weekend, Almanzo Wilder arrives at the school to take Laura home for a visit. Friendship soon turns to love for Laura and Almanzo. The nine *Little House* books

are inspired by Laura's own childhood and have been cherished by generations of readers as both a unique glimpse into America's frontier history and as heartwarming, unforgettable stories.

Applying the principles of human-centered design to real-world health care challenges, from drug packaging to early detection of breast cancer. This book makes a case for applying the principles of design thinking to real-world health care challenges. As health care systems around the globe struggle to expand access, improve outcomes, and control costs, Health Design Thinking offers a human-centered approach for designing health care products and services, with examples and case studies that range from drug packaging and exam rooms to internet-connected devices for early detection of breast cancer. Written by leaders in the field—Bon Ku, a physician and founder of the innovative Health Design Lab at Sidney Kimmel Medical College, and Ellen Lupton, an award-winning graphic designer and curator at Cooper Hewitt Smithsonian Design Museum—the book outlines the fundamentals of design thinking and highlights important products, prototypes, and research in health design. Health design thinking uses play and experimentation rather than a rigid methodology. It draws on interviews, observations, diagrams, storytelling, physical

models, and role playing; design teams focus not on technology but on problems faced by patients and clinicians. The book's diverse case studies show health design thinking in action. These include the development of PillPack, which frames prescription drug delivery in terms of user experience design; a credit card-size device that allows patients to generate their own electrocardiograms; and improved emergency room signage. Drawings, photographs, storyboards, and other visualizations accompany the case studies. Copublished with Cooper Hewitt, Smithsonian Design Museum

'Very funny and frank' Independent 'Reads like Scrubs: The Blog ... funny and awful in equal measure' Observer * * * * * The bestselling real life story of a hapless junior doctor, based on his columns written anonymously for the Telegraph. IF YOU'RE GOING to be ill, it's best to avoid the first Wednesday in August. This is the day when junior doctors graduate to their first placements and begin to face having to put into practice what they have spent the last six years learning. Starting on the evening before he begins work as a doctor, this book charts Max Pemberton's touching and funny journey through his first year in the NHS. Progressing from youthful idealism to frank bewilderment, Max realises how little his job is about 'saving people' and how much of his time is taken up by signing forms and trying to figure out all the important things no one has explained yet -- for example, the crucial question of how to tell whether someone is dead or not. Along the way, Max and his fellow fledgling doctors grapple with the complicated questions of life, love, mental health and how on earth to make time to do your laundry. All Creatures Great and Small meets Bridget Jones's Diary, this is a humorous and accessible peek into a world which you'd normally need a medical degree to witness. If you enjoy Trust Me, I'm a (Junior) Doctor, don't miss the follow-up titles Where Does It Hurt? and The Doctor Will See You Now.

What drives us to eat and accounts for different

appetites? Why is breathing at high altitudes easy for birds and difficult for humans? Why do animals have two sets of sensory organs--eyes, ears, nostrils, etc...? In *Why Geese Don't Get Obese*, physiologist Eric Widmaier describes the astonishing ways humans and other creatures have adapted to their environmental challenges in order to survive. Surprising examples, a sense of humor, and some insightful science make this book a delightful and lively read.

The doctor is back again and on the wards! Now in his third year as junior doctor, Max looks and sounds the part. But this time around, things are not at all as he expected ... The junior doctor ... back on the wards. After a year on the streets treating outreach patients, Max Pemberton is back in the relative comfort of hospital. This time running between elderly care and the dementia clinic to A&E and outpatients. No longer inexperienced (Max and his doctor friends can now tell when someone is actually dead), they are on the front line of patient care for better or worse. In the midst of an NHS still under threat (some things never change) there are committed and caring doctors, big issues, hope, frustration, huge societal changes affecting the entire health system as well as the general drama of everyday life in a big hospital, from biscuit wars to resus. It's not like television, this is real - there are no easy answers - but *The Doctor Will See You Now* will give you hope that there are enough good doctors asking the questions.

One of the biggest myths that plagues the business world today is that our ability to network depends on having the "gift-of-gab." You don't have to be outgoing to be successful at networking. You don't have to become a relentless self-promoter. In fact, you don't have to act like an extrovert at all. The truth is that when introverts are armed with a plan

that lets them be their authentic selves, they make the best networkers. Matthew Pollard, an introvert himself, draws on over a decade of research and real-world examples to provide an actionable blueprint for introverted networking. A sequel to Pollard's international bestseller *The Introvert's Edge: How the Quiet and Shy Can Outsell Anyone*, this book masterfully confronts the stigma around the so-called extroverted arena of networking. In *The Introvert's Edge to Networking*, you'll discover how to: Overcome your fear and discomfort when networking Turn networking into a repeatable system Leverage your innate introverted strengths Target and connect with top influencers Leverage the power of virtual and social networking The introvert's roadmap to success doesn't look like the extroverts, we're different and we should embrace that. Whether you're a small business owner struggling to make a living or a professional who's hit a career plateau, *The Introvert's Edge to Networking* is your path to a higher income and a rolodex of powerful connections.

'One of the most beautiful books you will ever read' Kate Mosse In this powerful memoir, Joanna Cannon tells her story as a junior doctor in visceral, heart-rending snapshots. We walk with her through the wards, facing extraordinary and daunting moments: from attending her first post-mortem, sitting with a patient through their final moments, to learning the power of a well- or badly chosen word. These moments, and the small sustaining acts of kindness and connection that punctuate hospital life, teach her that emotional

care and mental health can be just as critical as restoring a heartbeat. In a profession where weakness remains a taboo, this moving, beautifully written book brings to life the vivid, human stories of doctors and patients - and shows us why we need to take better care of those who care for us.

Where Does it Hurt? HarperCollins UK

. . . the four books comprising the series would certainly be a valuable addition to any entrepreneurship library. However, each book also stands alone as an individual purchase. Lorraine Warren, *International Journal of Entrepreneurial Behaviour and Research* The book delivers what it promises: a map of the uses of narrative methods in entrepreneurship studies. It is both an interesting contribution to the field and an important methodological handbook for all entrepreneurship researchers who are thinking of adopting qualitative methods in their inquiries. However, it may also be read with advantage by other researchers using ethnography as their main methodological approach to social studies. .

. The aim of the book is to show how narratives can enrich entrepreneurship studies, a goal that in my opinion is aptly fulfilled. Monika Kostera, *Scandinavian Journal of Management* . . . the contributors

in this text breathe fresh and imaginative linguistic resources and narrative/discursive frames of reference into the inquiry of entrepreneurial activities. The anecdote, the narrative, the metaphorical, the discursive and the dramaturgical are significant therefore, not only because they bring to the surface voices, emotions, processes and the relationality of (everyday) entrepreneurial activity that have possibly been previously silenced. But also, to paraphrase Steyaert, these approaches highlight the controversial and interactive aspects of the research process. . . The text is welcome because it treats narrative in a serious and scholarly way. Denise Fletcher, *International Small Business Journal* In their edited book *Narrative and Discursive Approaches in Entrepreneurship*, Daniel Hjorth and Chris Steyaert provide a fascinating glimpse into a perspective on entrepreneurship that will be enlightening for many readers.

Entrepreneurship authors typically talk about theory, methods, and data as if a straight-forward linear process united them all, and making sense of entrepreneurship was simply a matter of knowing how to

interpret one's findings. By contrast, the authors in this volume propose narrative and discursive approaches in which the contributing authors emphasize rich description, reflexive conceptualization, and interpretations offered as part of the story itself. They draw upon an international set of cases, including Russia, Sweden, Denmark, Norway, Venezuela, and North America. The cases themselves make for fascinating reading, quite apart from what we learn about the difficulties of imposing a particular interpretation on a given story. For example, taxi drivers in Caracas, management consultants in Denmark, and women entrepreneurs in northern Norway all make for fascinating narratives from which to understand the entrepreneurial process. Unlike many edited books which have no plot, the editors have included opening and closing sections that link the chapters, offer alternative readings of them, and propose new and expansive ways of thinking about entrepreneurship. Howard Aldrich, University of North Carolina at Chapel Hill, US Daniel Hjorth and Chris Steyaert set out to advance the study of entrepreneurship by refocusing the lens of discovery from

economics, management and marketing to other paradigmatic stances in social sciences and humanities like anthropology and literary studies. The result is a provocative collection of chapters that inspire the reader to consider and explore new ideas and research practice that incorporate both the context and place of entrepreneurship. From the perceptive insights of the editors to the rigorous and provocative discourse of the chapters and thoughtful responses in the conclusion emerges a story, in the best of storytelling tradition, about how a linguistic turn can rouse new insights. The editors ask, how do these texts move you? they entice, provoke, challenge, stimulate and guide. Their implications should be far reaching and required reading for any student of t

'Sometimes joyfully, sometimes painfully, intimate . . . it is wonderful to

have this closeup picture of the writer's working life.' - Frank Cottrell-Boyce, Observer ----- At the time of his death in 2015, award-winning and bestselling author Sir Terry Pratchett was working on his finest story yet - his own. The creator of the phenomenally bestselling Discworld series, Terry Pratchett was known and loved around the world for his hugely popular books, his smart satirical humour and the humanity of his campaign work. But that's only part of the picture. Before his untimely death, Terry was writing a memoir: the story of a boy who aged six was told by his teacher that he would never amount to anything and spent the rest of his life proving him wrong. For Terry lived a life full of astonishing achievements: becoming one of the UK's bestselling and most beloved writers, winning the prestigious Carnegie Medal and being awarded a knighthood. Now, the book Terry sadly couldn't finish has been written by Rob Wilkins, his former assistant, friend and now head of the Pratchett literary estate. Drawing on his own extensive memories, along with those of the author's family, friends and colleagues, Rob unveils the full picture of Terry's life

- from childhood to his astonishing writing career, and how he met and coped with what he called the 'Embuggerance' of Alzheimer's disease. A deeply moving and personal portrait of the extraordinary life of Sir Terry Pratchett, written with unparalleled insight and filled with funny anecdotes, this is the only official biography of one of our finest authors. ----- 'Spins magic from mundanity in precisely the way Pratchett himself did.' - Telegraph 'As frank, funny and unsentimental as anything its subject might have produced himself.' - Mail on Sunday

"I don't think I've ever read a book that paints such a complex and accurate landscape of what it is like to live with the legacy of trauma as this book does, while offering a comprehensive approach to healing." --from the foreword by Bessel van der Kolk A pioneering researcher gives us a new understanding of stress and trauma, as well as the tools to heal and thrive Stress is our internal response to an experience that our brain perceives as threatening or challenging. Trauma is our response to an experience in which we feel powerless or

lacking agency. Until now, researchers have treated these conditions as different, but they actually lie along a continuum. Dr. Elizabeth Stanley explains the significance of this continuum, how it affects our resilience in the face of challenge, and why an event that's stressful for one person can be traumatizing for another. This groundbreaking book examines the cultural norms that impede resilience in America, especially our collective tendency to disconnect stress from its potentially extreme consequences and override our need to recover. It explains the science of how to direct our attention to perform under stress and recover from trauma. With training, we can access agency, even in extreme-stress environments. In fact, any maladaptive behavior or response conditioned through stress or trauma can, with intentionality and understanding, be reconditioned and healed. The key is to use strategies that access not just the thinking brain but also the survival brain. By directing our attention in particular ways, we can widen the window within which our thinking brain and survival brain work together cooperatively. When we use

awareness to regulate our biology this way, we can access our best, uniquely human qualities: our compassion, courage, curiosity, creativity, and connection with others. By building our resilience, we can train ourselves to make wise decisions and access choice--even during times of incredible stress, uncertainty, and change. With stories from men and women Dr. Stanley has trained in settings as varied as military bases, healthcare facilities, and Capitol Hill, as well as her own striking experiences with stress and trauma, she gives readers hands-on strategies they can use themselves, whether they want to perform under pressure or heal from traumatic experience, while at the same time pointing our understanding in a new direction.

A collection of true life stories from "one of the most gripping blogs around" recounting life as a paramedic for a British ambulance service. (The Guardian) Have you ever wondered what's going on inside the ambulance screaming past you during your rush-hour commute? Since 2003, Tom Reynolds (writing under an alias so as not to get

sacked from his job), has kept a blog where he chronicles the day-in, day-out realities of his life on the job as an EMT with the London Ambulance Service. By turns both poignant and profound, Reynolds's writing captures the very essence of life and death. From the mundane to the surreal, from the heartwarming to the cynical, from the calm to the frenetic, more than 300 entries from his award-winning blog, Random Acts of Reality (randomreality.blogware.com) are included in the book. The tales are the stuff of Grey's Anatomy, House, and ER—only these events aren't unfolding on a Hollywood soundstage but on the front lines of a first responder's real life.
