Noted military historian Ted Barris once asked his father, Alex, "What did you do in the war?" What the former US Army medic then told his son forms the thrust of Barris' s latest historic journey—an exploration of his father' s wartime experiences as a medic leading up to the Battle of the Bulge in 1944 – 45, along with stories of other medics in combat throughout history. Barris' s research reveals that this bloodiest of WWII battles was shouldered largely by military medics. Like his father, Alex, medics in combat evacuated the wounded on foot, scrounged medical supplies where there were seemed to be none, and dodged snipers and booby traps on the most frigid and desolate battlefields of Europe. While retracing his father' s wartime experience, the author weaves into his narrative stories about the life-and-death struggles of military medical personnel during a century of service. In this unique front-line recounting of the experiences of stretcher bearers, medical corpsmen, nurses, surgeons, orderlies, dentists and ambulance drivers, Barris explores the evolution of battlefield medicine at such historic engagements as Fredericksburg, Batoche, the Ypres Salient, the Somme, Vimy, Singapore, Dieppe, Normandy, Falaise, Bastogne, Korea, Iraq and Afghanistan. Barris' s sources reveal—like never before—why men and women sporting the red cross on their helmets or sleeves didn' t flee to safety but chose instead to rush to assist.

This monograph examines the considerations involved in maintaining a peacekeeping force in the Golan Heights. The examination is based on the assumption that Israel and Syria have reached an agreement concerning the Golan Heights and that the United States is going to establish a peacekeeping force in the Golan Heights. The monograph first examines the historical background of the area since the 1967 War. Based on this examination and on lessons learned from previous UN and other multinational peacekeeping operations, the monograph addresses national composition of the force, command of the peacekeeping force, and force structure. Next, based on the military and political aspects of the region, the monograph addresses the future peacekeeping force commander' s concerns with military credibility, freedom of movement, and force protection. The study concludes with a summary evaluation of the necessary size and type of force for future peacekeeping in the Golan Heights. Based on the assumption and an analysis of the political and military considerations, future peacekeeping operations in the Golan Heights would require a MFO type force under the command and control of the United States. Due to the essential requirement for force protection due to the potential of pre-emption by either Israel or Syria and of terrorist attacks, a heavy brigade would be the most effective force in maintaining the peace while protecting the force.

Of the many expectations attending the creation of the first permanent International Criminal Court, the greatest has been that the principle of complementarity would catalyze national investigations and prosecutions of conflict-related crimes and lead to the reform of domestic justice systems. Sarah Nouwen explores whether complementarity has had such an effect in two states subject to ICC intervention: Uganda and Sudan. Drawing on extensive empirical research and combining law, legal anthropology and political economy, she unveils several effects and outlines the catalysts for them. However, she also reveals that one widely anticipated effect – an increase in domestic proceedings for conflict-related crimes – has barely occurred. This finding leads to the unravelling of paradoxes that go right to the heart of the functioning of an idealistic Court in a world of real constraints.

Their findings confirm the prevalence of firearms in these selected populations, but challenge a number of common stereotypes concerning gun possession and use by juveniles. Fear - rather than the needs of criminal activity, drug trafficking, and gang affiliation - motivates juveniles to arm themselves. The authors urge a policy aimed at reducing such motivation rather than attempting to remove guns from the hands of youth.

In 2004, Erin Solaro went to Iraq to study American servicewomen — what they were doing, how well they were doing it, how they were faring in combat. In 2005, she went to Afghanistan on the same mission. Having spent time embedded with combat troops and conducting stateside interviews with numerous analysts and veterans, Solaro is convinced that the time to drop all remaining restrictions on women's full equality under arms is now. The Army, the country, the women of America — and of the world — need it. *Women in the Line of Fire* details why this will not be an easy task. Although 15 percent of the military is female, the Army and Marines still resist acknowledging what is, in fact, already happening — women are fighting, and fighting well. For the Religious Right and the cultural conservatives, women in combat is a hot-button issue in their campaign to "take back the culture." But for the young men and women on the lines, brought up in an America where equality between the sexes was never second guessed and where making up the rules as you go along comes with the territory, it's the new reality.

Winner of the 2009 Robert A. Calvert Prize In January 1917, German foreign minister Arthur Zimmermann sent a telegram to Germany' s Mexican ambassador, authorizing the offer of U.S. territory in exchange for Mexico' s alliance with Germany in the Great War. After the interception of this communication, U.S. intelligence intensified surveillance of the Mexican American community in Texas and elsewhere, vigilant for signs of subversive activity. Yet, even as this was transpiring, thousands of Tejanos (Mexican Texans) were serving in the American military during the war, with many other citizens of Mexican origin contributing to home front efforts. As author José A. Ramírez demonstrates in *To the Line of Fire!*, the events of World War I and its aftermath would decisively transform the Tejano community, as war-hardened veterans returned with new, broadened perspectives. They led their people in opposing prejudice and discrimination, founding several civil rights groups and eventually merging them into the League of United Latin American Citizens (LULAC), the largest and oldest surviving Hispanic civil rights organization in the United States. Ramírez also shows the diversity of reaction to the war on the part of the Tejano community: While some called enthusiastically for full participation in the war effort, others reacted coolly, or only out of fear of reprisal. Scholarly and general readers in Texas history, military history, and Mexican American studies will be richly rewarded by reading *To the Line of Fire!*

"As usual, the medic, Wiatr, hid himself, the doctor had a panic attack and I decided do go by myself to the next trench in spite of the hellish artillery and canon fire. In the trench was Corporal Gorgel, who helped the officer. The scene on the front line was terrible. Blood, pieces of flesh, heads, arms, legs and intestines all around -an awful sight." Almost 100 years have passed since the end of World War I, also known as "the Great War". At the time, it was the largest war to date. Over 16.5 million people were killed in the war; more than 6 million among them were civilians. During the Great War, a soldier in the Austro-Hungarian Army fought at the frontline trenches and wrote daily in his diary, documenting his experiences there. This man, Teofil Reiss, was an Austro-Hungarian patriot, a professional soldier, a charming ladies' man, and a proud Jew. His practical perspective, trustworthy innocence and open heartedness, merge the details of this diary into a fascinating human document - a rare testimony of a frontline soldier and a picture of an honest man in a senseless war (though, not senseless to him). Almost 100 years after the war, his grandson Tuvia (who was named after him) made the decision to translate and publish his handwritten German diary, adding photos and letters, as well as an epilogue that tells the remarkable story of Teofil Reiss's life during the Nazis' rise to power, and until his death in 1942.

From Syrian civilians locked in iron cages to veterans joining peaceful indigenous water protectors at the Standing Rock Sioux Reservation, from Sri Lanka to Iraq and from Yemen to the United States, human beings have been used as shields for protection, coercion, or

deterrence. Over the past decade, human shields have also appeared with increasing frequency in noncombat contexts such as antinuclear struggles, civil and environmental protests, and even computer games. The phenomenon, however, is by no means a new one. In *Human Shields*, Neve Gordon and Nicola Perugini describe how human shields have been used in key historical and contemporary moments and across geographical sites. The practice of human shielding corresponds with the history of shifting understandings of what is valued as "human": in the American Civil War and the Franco-German War, only the elite were used as shields, while in later conflicts, hundreds of thousands of women and children and people of color were placed in the crossfire as deterrents. *Human Shields* demonstrates how this increasing weaponization of human beings has made the position of civilians trapped in theaters of violence more precarious and their lives more expendable.

According to *Time* magazine, Pakistan's President Pervez Musharraf holds "the world's most dangerous job." He has twice come within inches of assassination. His forces have caught more than 670 members of al Qaeda in the mountains and cities, yet many others remain at large and active, including Osama bin Laden and Ayman Al Zawahiri. Long locked in a deadly embrace with its nuclear neighbor India, Pakistan has come close to full-scale war on two occasions since it first exploded a nuclear bomb in 1998.

As President Musharraf struggles for the security and political future of his nation, the stakes could not be higher for the world at large. It is unprecedented for a sitting head of state to write a memoir as revelatory, detailed, and gripping as *In the Line of Fire*. Here, for the first time, readers can get a firsthand view of the war on terror in its central theater. President Musharraf details the manhunts for Osama and Zawahiri and their top lieutenants, complete with harrowing cat-and-mouse games, informants, interceptions, and bloody firefights. He tells the stories of the near-miss assassination attempts, not only against himself but against Shaukat Aziz (later elected prime minister) and one of his top army officers (later the vice chief of army staff), and of the abduction and beheading of Daniel Pearl -- as well as the forensic and shoe-leather investigations that uncovered the perpetrators. He details the army's mountain operations that have swept several valleys clean, and he talks about the areas of North Waziristan where al Qaeda is still operating. Yet the war on terror is just one of the many headline-making subjects in *In the Line of Fire*. The full story of the events that brought President Musharraf to power in 1999 is told for the first time. He reveals new details of the 1999 confrontation with India in Kashmir (the Kargil conflict) and offers a proposal for resolving the Kashmir dispute. He offers a portrait of Mullah Omar, with stories of Pakistan's attempts to negotiate with him. Concerning A. Q. Khan and his proliferation network, he explains what the government knew and when it knew it, and he reveals fascinating details of Khan's operations and the investigations into them. In addition, President Musharraf takes many stances that will make news. He calls for the Muslim world to recognize Israel once a viable Palestinian state is created. He urges the repeal of Pakistan's 1979 Hudood law. He calls for the emancipation of women and for their full political equality with men. He tells the sad story of Pakistan's experience with democracy and what he has done to make it workable.

" In Fernanda Santos ' expert hands, the story of 19 men and a raging wildfire unfolds as a riveting, pulse-pounding account of an American tragedy; and also as a meditation on manhood, brotherhood and family love. *The Fire Line* is a great and deeply moving book about courageous men and women. " - Héctor Tobar, author of *Deep Down Dark: The Untold Stories of 33 Men Buried in a Chilean Mine* and *The Miracle that Set Them Free*. When a bolt of lightning ignited a hilltop in the sleepy town of Yarnell, Arizona, in June of 2013, setting off a blaze that would grow into one of the deadliest fires in American history, the twenty men who made up the Granite Mountain Hotshots sprang into action. An elite crew trained to combat the most challenging wildfires, the Granite Mountain Hotshots were a ragtag family, crisscrossing the American West and wherever else the fires took them. The Hotshots were loyal to one another and dedicated to the tough job they had. There's Eric Marsh, their devoted and demanding superintendent who turned his own personal demons into lessons he used to mold, train and guide his crew; Jesse Steed, their captain, a former Marine, a beast on the fire line and a family man who wasn't afraid to say " I love you " to the firemen he led; Andrew Ashcraft, a team leader still in his 20s who struggled to balance his love for his beautiful wife and four children and his passion for fighting wildfires. We see this band of brothers at work, at play and at home, until a fire that burned in their own backyards leads to a national tragedy. Impeccably researched, drawing upon more than a hundred hours of interviews with the firefighters ' families, colleagues, state and federal officials, and fire historians and researchers, *New York Times* Phoenix Bureau Chief Fernanda Santos has written a riveting, pulse-pounding narrative of an unthinkable disaster, a remarkable group of men and the raging wildfires that threaten our country ' s treasured wild lands. *The Fire Line* is the winner of the 2017 Spur Award for Best First Nonfiction Book, and Spur Award Finalist for Best Western Contemporary Nonfiction.
