Honour killing, as it is widely understood, is the cold-blooded murder of a woman or a man involved with her, by the male members of her household in order to cleanse

the reputation of the family, clan, community or tribe. This violent tradition in the name of religion, custom and culture continues to be carried out in a significantly large part of the world. The majority of people still believe that honour killings happen for reasons such as marriage from choice or a love affair of a kinswoman, rape, a demand for divorce from a woman, or the birth of a female child, all of which are perceived as bringing shame on the family.

However, current research on honour killing suggests that there are a number of intriguing and very cleverly knitted plots of jealousy, greed, violence and murder which show that, in the name of honour, various other purposes are being served and people are killed in ways which give the impression that they are honour killings. By collecting data from people involved in such situations, this book opens a Pandora ' s box, showing that such killings are carried out not to assuage the hurt honour of a patriarchal society, but to serve a variety of malign intentions, goals and agendas. It will serve to let the world comprehend the phenomenon

of honour-related violence where culture and crime unite under the umbrella of highly discriminating laws against women. This book consists of twenty-six testimonies from those involved in honour killings, bringing together interviews with killers, victims and the falsely accused.

Life has almost reached a semblance of normalcy for Jeremy van Hijser since his forays into the war during the summer. He is quite content to return to the simple life of hunting and trapping even though there are yet some lingering bad feelings from those he fought. But that is about to change once more. An American cousin that Jeremy does not know he has appears at on Jeremy's doorstep. After fighting against the British raid on Black Rock, his mother has sent him to find his long lost relative in the hope that Jeremy might help him find a normal life, but both their lives are too complicated to be normal and they find themselves involved in a search for a mystery cache. Jeremy is thrown back into the conflict known as the War of 1812 with a vengeance as the treasure hunt rapidly degenerates into an all-out war with a group of religious fanatics and Jeremy's old nemesis. He suddenly finds himself hunted by all sides in what for him is a matter of honour.

Honour killing persists around the Middle East, where regimes refrain from tackling primitive traditions for fear of sparking unrest. Ayse Onal interviewed imprisoned men in Turkey convicted of killing their mothers, sisters, and daughters. The result is a revealing and ultimately tragic account of ruined lives - both the victims' and the killers' - in a country where state and religion conspire to hush up the killing of hundreds of women every year. 'Ayse Onal has done an immense service by

revealing what it is like to live in an honour-based society and the terrible cost, not just to the women who are beaten and eventually killed, but to the perpetrators and other relatives.'

It is 1636 - the height of the Thirty Years War, one of the bloodiest and most destructive conflicts Europe has ever seen. As the campaigning season begins, the Spanish armies swell out of the Artois region of the Netherlands - flooding into King Louis XIII's France. The sleepy border village of Dax-en-roi stands in their way. Facing the overwhelming might of the Spanish forces, the Chevalier de Roland rallies a valiant defence, but in vain - his household guard no match for the invaders. There is only one survivor as the Roland estate is razed to the ground, one soul who escapes the Spanish brutality: the lone heir to the Roland name, the son, a young boy by the name of André de Roland, the new Sieur of Dax . . . Upon this young nobleman's shoulders all hope lies. He alone must bear

the honour of the Roland name and, with it, the fate of his people.

International Human Rights Law and Crimes Against Women in Turkey Simon and Schuster

In June 2002, journalists throughout the world began to hear of the gang rape of a Pakistani woman from the impoverished village of Meerwala. The rape was ordered by a local clan known as the Mastoi and was arranged as punishment for indiscretions allegedly committed by the woman's brother. While certainly not the first account of a female body being negotiated for honor in a family, and (sadly) not the last, journalists and activists were captivated. This time the survivor had chosen to fight back, and in doing so, single-handedly

changed the feminist movement in Pakistan. Her name was Mukhtar Mai, and her decision to stand up to her accusers was an act of bravery unheard of in one of the world's most adverse climates for women. By July 2002, Mai's case was headline news in Pakistan and under international scrutiny, the government awarded her the equivalent of 8,500 U.S. dollars in compensation money (a historic settlement), and her attackers were sentenced to death. Mukhtar Mai went on to open a school for girls in an effort to ensure that future generations would not suffer, as she had, from illiteracy. In this rousing account, Mai describes her experience and how she has since become an agent for change and a beacon of hope for oppressed women around the world. Timely and topical, *In the Name of Honour* is the remarkable and inspirational memoir of a woman who fought and triumphed against exceptional odds.

When Rahmat Sulemani reported his girlfriend Banaz missing, it quickly became clear to DCI Caroline Goode that something was very wrong. In fact, Banaz had contacted her local police station multiple times before, even listing the names of the men she expected to murder her in a so-called 'honour' killing. Her parents didn't seem worried, but Banaz had already accused them of being part of the plot. DCI Goode's team took on the investigation before they even

had proof that a murder had taken place. What emerged was a shocking story of betrayal and a community-wide web of lies, which would take the team from suburban south London to the mountain ranges of Kurdistan, making covert recordings and piecing together cell phone data to finally bring the killers to justice.

This rousing account is the exclusive, authorized memoir of international rights icon Mukhtar Mai, whose courageous struggle for justice earned her acclaim as "the Rosa Parks of Pakistan."

Essay from the year 2013 in the subject Sociology - Law, Delinquency, Abnormal Behavior, grade: 5,2, Sheffield Hallam University (Criminology), language: English, abstract: In industrialised countries such as Germany and England the number of honour killings committed have increased (Schirrmacher, 2009). Cases in both countries have experienced large media attention and have been closely reported. The media in western countries tends to magnify differences especially from and to the Islamic world (Nelken 2010). Honour crimes and

killings do not only occur in Eastern and Arab countries such as Pakistan Turkey or Iran etc., through globalisation and the increase of migration, honour killings have become an increasing problem in western countries as well (Schirrmacher, 2009). Continuing improvements of various means of transport and mobility has acquired a new dimension in the world of modernity (Garland, 2001). Globalisation is as Held (1999) writes, the widening deepening and speeding up of worldwide interconnections in all aspects of contemporary life. Honour killings are closely linked to globalisation and migration issues. The most striking similarity between England and Germany is the total number of committed honour killings in the past few years. One can also find high resemblances in the convictions and sentences of perpetrator of honour killings. Despite these similarities the focus is to examine the cultural, social political and historical context of these high profile crimes in both countries. The United Nation has published a response to crimes in the name of honour against women. In their last resolution from 2004 the UN expressed deep concerns that women and girls continue to be victims of honour based crimes. They remind states to exercise, to prevent, investigate and punish the perpetrators of such crimes committed against women and girls (UN, 2004). This comparative case study will focus on the state responses, which are required by the UN. Therefore the examination will lay out the differences and similarities of state responses through legislations and police task forces and other law enforcements, how honour

killings are recognised by the state in these two European countries. This examination will explore these responses within the cultural political social and historical context. In this project the focus is on honour killings, the extremist form of honour based violence and will undertake a comparison on how these two European countries respond to this violation of human rights in a broader context.

This interdisciplinary collection provides a compelling analysis of the practices and beliefs that lead to violence against women, men and children in the name of 'honour', with a range of international insights from criminology, psychology, law and history. The volume advances legal and theoretical debates through the analysis of established research and presents new evidence and insights, addressing key questions such as: What psychological processes are relevant in the motivation of honour violence? Under what historical circumstances, and through what strategies, have honourable masculinity and violence been dissociated? Can honour be reconceptualised in ways that challenge violent practices justified in its name? By locating 'honour' killing and 'honour' based violence within and beyond debates on violence against women and girls, this

collection offers recommendations to inform both theory and practice, making this an essential resource for teachers and students, health professionals, police officers, lawyers, social workers, policy-makers, and activists working against gendered forms of violence.

On the morning of June 30, 2009, police in Kingston, Ontario, made a ghastly discovery: four females dead in a car submerged in a shallow canal. Sisters Zainab Shafia, 19, Sahar Shafia, 17, Geeti Shafia, 13, along with Rona Mohammad Amir, 50, floated almost serenely inside the car, seemingly the victims of a terrible accident. That morning, Mohammad Shafia, his wife Tooba and their son, Hamed, arrived at the Kingston police station to report the four missing. In a sweeping covert investigation that spanned three continents, police uncovered layers of lies in the Shafias' story and developed a horrifying theory: Zainab, Sahar, Geeti and Rona had been the victims of a meticulously plotted family murder—Canada's first mass honour killing. In *Without Honour*, award-winning journalist Rob Tripp draws on three years of exhaustive research and exclusive interviews to make sense of a senseless crime in a way no other writer could. Tripp was the first journalist on the scene as the news broke and the only reporter to attend every day of court sessions, through to the convictions of Shafia, Tooba and Hamed on four

counts each of first-degree murder. The Shafias are appealing. In this gripping and compassionate account, Tripp reveals the heartbreaking and stunning truth about these crimes fuelled by what Ontario Superior Court Judge Robert Maranger called a "twisted notion of honour," and about the desperate lives of four women who died in the pursuit of freedom.

The Real Stories behind Honour Killing

Reason to Revolution

A shockingly intimate look at the world of honor killings, as seen through the eyes of both the perpetrators and the victims. What drives a person to murder their sister, mother, or daughter? What is life like in a society in which women are imprisoned for their own "protection," while their potential killers walk free? In this powerful and affecting book, writer and journalist Lene Wold offers a rare window into the world of "honor killings"—the controversial practice that sees more than five thousand women murdered at the hands of close relatives each year, all to restore

their family's reputation. Wold spent more than five years in Jordan, visiting prisons and mosques, reviewing newspapers and judicial archives, and interviewing imams, village elders, and other locals to understand these violent acts. But she also spoke with the killers themselves, including a man who murdered his mother and daughter and attempted to kill his other daughter. In *Inside an Honour Killing*, Wold shares what she learned, weaving a shocking tale of honor killing told from the perpetrators' perspective as well as the victims'.

Murder in the Name of Honour is Rana Husseini's hard-hitting and controversial examination of honour crimes. Common in many traditional societies around the world, as well as in migrant communities in Europe and the USA, they involve a 'punishment'—often death or disfigurement—carried out by a

relative to restore the family's honour. Breaking through the conspiracy of silence surrounding this crime, one writer above all others has been instrumental in bringing it to the world's attention: Rana Husseini.

Honour killing is considered the worst form of domestic violence against human beings, particularly against women. It is clear that societies across the world - through their laws and their courts - continue to countenance legal defences which overwhelmingly benefit males committing violence against females. Despite the statistics that honour killings are being reported from all over the world, the greatest number of shocking reports of honour killings come from Muslim countries. Unfortunately, Pakistan is among those countries where women are facing various forms of violence in the name of religion, customs and traditions, and cases of honour killing are regularly reported there. It is imperative to understand and see killings in the name of honour from the perspective of those who have been directly affected by the socio-religious cultural norms which condone them. The findings gathered here show that

honour killing is not only family or community violence or a tradition to preserve honour, but that behind these killings ulterior purposes are being served and therefore the number of the killings is increasing every year in Pakistan. This book will allow the reader to understand precisely the menace of honour killing and to consider how it can be addressed to save innocent lives and to stop these severe violations of human rights.
