She would be an object in motion that would stay in motion, even if it meant flattening everything in her path. One cold fall day, high school junior Liz Emerson steers her car into a tree. Why? Why did Liz Emerson decide that the world would be better off without her? Why did she give up? This haunting, nonlinear novel pieces together the short and devastating life of Meridian High's most popular junior girl. Mass, acceleration, momentum, force—Liz didn't understand it in physics, and even as her Mercedes hurtles toward the tree, she doesn't understand it now. How do we impact one another? How do our actions reverberate? What does it

Life has many seasons, and each year is not the same as the last. This book details a year's worth of seasons: reflections, falling, loving, and loss. It's not a treatise. It's not a self-help book. It won't give you a path or a way to be. And it didn't give me mine. *Reflections and Falling and Loving What's Lost* is a history told in symbols and signs, a

struggle with will, with wasting my time. It's who I knew in my heart was the one. It's the sea and the sand, the trees and the sun. It's the way that I breathe when I'm clearing my head. It's a chance to sing what couldn't be said.

Life is full of decisions. Take the path on the left and turn into a beautiful princess. Veer right and wind up homeless.

Choices, we make them every day. I was on a path. I was going to become an improved version of Jade Hart, immersing myself in the world of art, but that didn't happen. Instead, I'm on a new road, failing miserably, wondering how I ended up in this place. Now I'm the girl no one wants to be around. The one who has a thousand feet of steel forged around her, not daring to let anyone through until

Partisan warfare and gridlock in Washington threaten to squander America's opportunity to show the world that democracy can solve serious economic problems and ensure widely shared prosperity. Instead of working together to meet the challenges ahead—an aging work force, exploding inequality, climate change, rising debt—our elected leaders are sabotaging our economic future by blaming and demonizing each other in hopes of winning big in the next election. They are weakening America's

capacity for world leadership and the case for democracy here and abroad. Alice M. Rivlin, with decades of experience in economic policy making, argues that proven economic policies could lead to sustainable American prosperity and opportunity for all, but crafting them requires the tough, time-consuming work of consensus building and bipartisan negotiation. In a divided country with shifting majorities, major policies must have bipartisan buy-in and broad public support. Otherwise we will have either destabilizing swings in policy or total gridlock in the face of challenges looming at us. Rivlin believes that Americans can and must save our hyper-partisan politicians from themselves. She makes the case that on many practical economic issues the public is far less divided than partisan politicians and sensationalist

---

media would have us believe. She draws attention to numerous hopeful efforts to bridge partisan and ideological divides in Washington, in state capitols and city governments, and communities around the country, and advocates a major national effort to enable citizens and future leaders to learn and practice the art of listening to each other and working together to find common ground. This book is a practical guide for Americans across the political spectrum who are agonizing over partisan warfare, incivility, and policy gridlock and looking for ways they can help to get our democratic policy process back on a constructive track before it is too late. *The Fall of Moscow Station* HarperCollins When the Moscow Station is left in ruins after a major intelligence breach, CIA analyst Jonathan Burke and agent Kyra Stryker are fast on the trail of Alden

*Catch Me As I Fall* Children's Book Trust "A beautiful, big-hearted book with important lessons embedded in compelling stories of two irresistible girls. Expertly executed and movingly realized." —New York Times Book Review Cammie McGovern follows up her breakout young adult debut, *Say What You Will*, with this powerful and unforgettable novel about learning from your mistakes and learning to forgive. Emily has always been the kind of girl who tries to do the right thing—until one night when she does the worst thing possible. She sees Belinda, a classmate with developmental disabilities, being attacked. Inexplicably, she does nothing at all. Belinda, however, manages to save

herself. When their high school finds out what happened, Emily and Lucas, a football player who was also there that night, are required to perform community service at a center for disabled people. Soon Lucas and Emily begin to feel like maybe they 're starting to make a real difference. Like they would be able to do the right thing, if they could do that night all over again. But can they do anything that will actually help the one person they hurt the most? Told in alternating points of view, *A Step Toward Falling* is a poignant, hopeful, and altogether stunning work that will appeal to fans of books by Jennifer Niven, Robyn Schneider, and Jandy Nelson.

An intimate guide to self-acceptance and discovery that offers a Buddhist perspective on wholeness within the framework of a Western understanding of self. For decades, Western psychology has promised fulfillment through building and strengthening the ego. We are taught that the ideal is a strong, individuated self, constructed and reinforced over a lifetime. But Buddhist psychiatrist Mark Epstein has found a different way. *Going to Pieces Without Falling Apart* shows us that happiness doesn't come from any kind

of acquisitiveness, be it material or psychological. Happiness comes from letting go. Weaving together the accumulated wisdom of his two worlds--Buddhism and Western psychotherapy—Epstein shows how "the happiness that we seek depends on our ability to balance the ego's need to do with our inherent capacity to be." He encourages us to relax the ever-vigilant mind in order to experience the freedom that comes only from relinquishing control. Drawing on events in his own life and stories from his patients, *Going to Pieces Without Falling Apart* teaches us that only by letting go can we start on the path to a more peaceful and spiritually satisfying life.
