The untold story of King Nebuchadnezzar's daughter For seven years the Babylonian princess Tiamat has waited for the mad king Nebuchadnezzar to return to his family and to his kingdom. Driven from his throne to live as a beast, he prowls his luxurious Hanging Gardens, secreted away from the world. Since her treaty marriage at a young age, Tia has lived an opulent yet oppressive life in the palace. But her husband has since died and she relishes her newfound independence. When a nobleman is found murdered in the palace, Tia must discover who is responsible for the macabre death, even if her own freedom is threatened. As the queen plans to wed Tia to yet another prince, the powerful mage Shadir plots to expose the family's secret and set his own man on the throne. Tia enlists the help of a reluctant Jewish captive,

her late husband's brother Pedaiah, who challenges her notions of the gods even as he opens her heart to both truth and love. In a time when few gave their hearts to Yahweh, Tia must decide if she is willing to risk everything--her possessions, her gods, and her very life--for the Israelites' one God. Madness, sorcery, and sinister plots mingle like an alchemist's deadly potion as Tia chooses whether to risk all to save the kingdom--and her family. The New York Times bestseller “ A glistening psychological history, faceted largely by the biographies of eight famous leaders . . . ” —The Boston Globe “ A provocative thesis . . . Ghaemi ’ s book deserves high marks for original thinking. ” —The Washington Post “ Provocative, fascinating. ” —Salon.com Historians have

long puzzled over the apparent mental instability of great and terrible leaders alike: Napoleon, Lincoln, Churchill, Hitler, and others. In *A First-Rate Madness*, Nassir Ghaemi, director of the Mood Disorders Program at Tufts Medical Center, offers a myth-shattering exploration of the powerful connections between mental illness and leadership and sets forth a controversial, compelling thesis: The very qualities that mark those with mood disorders also make for the best leaders in times of crisis. From the importance of Lincoln's "depressive realism" to the lackluster leadership of exceedingly sane men as Neville Chamberlain, *A First-Rate Madness* overturns many of our most cherished perceptions about greatness and the mind.

Madness in the Family Penguin
At the Mountains of Madness is a story, which details the events of a disastrous expedition to the Antarctic continent in September 1930 and what was found there by a group of explorers led by the narrator, Dr. William Dyer of Miskatonic University. Throughout the story, Dyer details a series of previously untold events in the hope of deterring another group of explorers who wish to return to the continent. The title is derived from a line in "The Hashish Man," a short story by fantasy writer Edward Plunkett,

Lord Dunsany: "And we came at last to those ivory hills that are named the Mountains of Madness..." Howard Phillips Lovecraft (1890-1937) was an American author who achieved posthumous fame through his influential works of horror fiction. He is now regarded as one of the most significant 20th-century authors in his genre. Some of Lovecraft's work was inspired by his own nightmares. His interest started from his childhood days when his grandfather would tell him Gothic horror stories. Garden of Madness Univ of California Press

This "smart, shrewd, and insightful" biography of H.P. Lovecraft not only explores the author's fascinating life but also reveals his "lasting power and influence" on the entertainment industry and society as a whole (Victor LaValle, author of *The Changeling*) Interweaving the biography of the legendary writer with an exploration of Lovecraft as a phenomenon, *In the Mountains of Madness* strives to explain this reclusive, cultish figure while challenging some of the general views held by Lovecraft devotees. Focusing specifically on the large cross-section of horror and science fiction fans who know Lovecraft through films, role-playing games, and video games directly influenced by his work, but

who know little or nothing about the man himself, *In the Mountains of Madness* places Lovecraft and his work in a cultural context, as an artist more in tune with our time than his own. More than a traditional biography, this provocative book reclaims the true essence of Lovecraft in relation to the comics of Joe Lansdale, the novels of Stephen King, and some of the biggest blockbuster films in contemporary America, proving the undying influence of this rare and significant figure.

The philosophy of psychosis and the psychosis of philosophy: a philosopher draws on his experience of madness. In this book, philosopher and linguist Wouter Kusters examines the philosophy of psychosis—and the psychosis of philosophy. By analyzing the experience of psychosis in philosophical terms, Kusters not only emancipates the experience of the psychotic from medical classification, he also emancipates the philosopher from the narrowness of textbooks and academia, allowing

philosophers to engage in real-life praxis, philosophy in vivo. Philosophy and madness—Kusters's preferred, non-medicalized term—coexist, one mirroring the other. Kusters draws on his own experience of madness—two episodes of psychosis, twenty years apart—as well as other first-person narratives of psychosis. Speculating about the maddening effect of certain words and thought, he argues, and demonstrates, that the steady flow of philosophical deliberation may sweep one into a full-blown acute psychotic episode. Indeed, a certain kind of philosophizing may result in confusion, paradoxes, unworldly insights, and circular frozenness reminiscent of madness. Psychosis presents itself to the psychotic as an inescapable truth and reality. Kusters evokes the mad person's philosophical or existential amazement at reality, thinking,

time, and space, drawing on classic autobiographical accounts of psychoses by Antonin Artaud, Daniel Schreber, and others, as well as the work of phenomenological psychiatrists and psychologists and such phenomenologists as Edmund Husserl and Maurice Merleau-Ponty. He considers the philosophical mystic and the mystical philosopher, tracing the mad undercurrent in the Husserlian philosophy of time; visits the cloud castles of mystical madness, encountering LSD devotees, philosophers, theologians, and nihilists; and, falling to earth, finds anxiety, emptiness, delusions, and hallucinations. Madness and philosophy proceed and converge toward a single vanishing point.

A lively and provocative look at the modern culture of motherhood and at the social, economic, and political forces that shaped current ideas about parenting What is wrong with this picture? That's the question Judith Warner asks in this national bestseller after taking a good, hard

look at the world of modern parenting--at anxious women at work and at home and in bed with unhappy husbands. When Warner had her first child, she was living in Paris, where parents routinely left their children home, with state-subsidized nannies, to join friends in the evening for dinner or to go on dates with their husbands. When she returned to the States, she was stunned by the cultural differences she found toward how people think about effective parenting--in particular, assumptions about motherhood. None of the mothers she met seemed happy; instead, they worried about the possibility of not having the perfect child, panicking as each developmental benchmark approached. Combining close readings of mainstream magazines, TV shows, and pop culture with a thorough command of dominant ideas in recent psychological, social, and economic theory, *Perfect Madness* addresses our cultural assumptions, and examines the forces that have shaped them. Working in the tradition of classics like Betty Friedan's *The Feminine Mystique* and Christopher Lasch's *The Culture of Narcissism*, and with an awareness of a readership that turned recent hits like *The Bitch* in

the House and Allison Pearson's *I Don't Know How She Does It* into bestsellers, Warner offers a context in which to understand parenting culture and the way we live, as well as ways of imagining alternatives--actual concrete changes--that might better our lives.
