For the packaging, the
aim was to reflect the
design aesthetic of
the bags through the
ideas of "stealth" and
"travel". The concept
of travel is
communicated through
the built-in handles
of the box and the
foldout user manual,
which served as a
"map" to the various
features of the
product.

One of the primary design goals
of the M1 was to be able to
house, power, and cool high
performance components, while
being as small as reasonably

possible. Mini-ITX is the smallest
motherboard form-factor capable
of supporting such a build, and is
actually considerably smaller than
mATX.
