Global Trends in VAT/GST and Direct Taxation Cengage Learning

Recent developments in direct taxes and VAT/GST Taxes – in general – have become the topic of broad legal and policy discussions. VAT and GST are often said to be the fiscal success story of the 20th century, as almost all

developed countries levy VAT or GST or similar all-encompassing broad-based consumption taxes. Global trends in direct taxes are visible at the level of international players, such as the OECD. Due to the OECD's BEPS project, national tax systems are being significantly modified. This book aims at identifying and discussing the current global trends in both VAT/GST and direct taxes. In daily practice, VAT/GST and direct taxes should be regarded simultaneously. Therefore, the Master's theses contained in this book deal with and highlight numerous issues, challenges and opportunities found in both direct taxes and in the VAT/GST area, ranging from nexus in direct taxes and VAT/GST, recent developments in certain policy areas, the definition of taxable persons, tax abuse, non-discrimination rules, charities, transfer pricing,

European State aid, immovable property, share deals etc. While the construction of VAT/GST and direct taxes differs, both taxes have similarities. The contributions in this book make a legal comparison of the recent developments in direct taxes and VAT/GST in the relevant fields, provide an analysis of the similarities and differences of the two taxation systems and highlight global trends in taxation.

The Major Developments in Tax Policy Steadily increasing globalization as well as the financial and economic crisis have brought major challenges for states in ensuring budgetary consolidation while maintaining sustainable economic growth. These developments have not only influenced political and economic discussions in the 21st century, but also raise new questions on the role of taxation in the economic policy environment. National taxation systems worldwide are subject to significant changes and it is assumed that they will develop in a more co-operative way in the near future. This book aims at identifying the major developments in tax policy in the 21st century on a national as well as on an international level and gives an in-depth analysis of the challenges and risks, but also of the opportunities connected to these developments. It covers numerous and

discrete issues ranging from challenges in the VAT/GST area, the taxation of the financial sector, the fight against aggressive tax planning, tax abuse and tax evasion, tax integration within the EU, the development of transfer pricing rules, the increasing role of co-operative compliance and good governance and the changing tax policies of developing and newly industrialized countries. The contributions in this book build upon a legal comparison of the national tax systems in the relevant fields, propose tax policy solutions where required and give ideas on how to go forward.

Employment, Enterprise, and Well-being
Cengage Learning

Emphasizing a hands-on approach to tax education, every concept introduced in Fundamentals of Taxation includes meaningful exercises that allow students to reinforce what they are learning. This book is designed to not only expose beginning tax

students to tax law, but to also teach the practical intricacies involved in the preparation of a tax return. To train tomorrow's tax preparers to handle the complex U.S. tax law, Fundamentals of Taxation's author team has devised four primary teaching advantages: 1.) The text is organized closely to follow the IRS tax forms. The authors introduce students to standard IRS forms early and reinforce their use throughout the text. Actual tax forms are incorporated throughout the text, giving students the opportunity to understand the principles behind tax law while they learn how to work with clients to obtain the information they will need to complete tax forms. 2.) Proper reporting of tax issues are illustrated. The authors present a tax issue,

discuss the legal requirements, illustrate the proper tax form placement, and show the completed form in the text. By effectively leading the student through each issue, the authors demonstrate how tax form preparation is the result of a careful process that balances legal knowledge with practical experience. 3.) Integration of an individual income tax software package (TaxACT). The authors instruct students how to use the software to complete returns using sample "taxpayers" who appear from chapter to chapter. 4.) The authors supplement the text with citations of relevant tax authorities such as the Internal Revenue Code, Treasury Regulations, Revenue Rulings, Revenue Procedures, and court cases. These citations are almost always provided in footnotes.

Thus, you and your students can easily use, or not use, the footnote material.

Income Tax Fundamentals 2018 PHI Learning Pvt. Ltd.

After the Constitutional Convention, Benjamin Franklin was asked, “Well, Doctor, what have we got—a Republic or a Monarchy?” Franklin’s response: “A Republic—if you can keep it.” This book

argues: we couldn't keep it. A true republic privileges the common interest above the special interests. To do this, our Constitution established an elaborate system of checks and balances that disperses power among the branches of government, which it places in conflict with one another. The Framers believed that this would keep grasping, covetous factions from acquiring enough power to dominate government. Instead, only the people would rule. Proper institutional design is essential to this system. Each branch must manage responsibly the powers it is granted, as well as rebuke the other branches when they go astray. This is where subsequent generations have run into trouble: we have overloaded our government with more power than it can handle. The Constitution's checks and balances have broken down because the institutions created in 1787 cannot exercise responsibly the powers of our sprawling, immense twenty-first-century government. The result is the triumph of special interests over the common interest. James Madison called this factionalism. We know it as political corruption. Corruption today is so widespread that our government is not really a republic, but rather a special interest democracy. Everybody may participate, yes, but the contours of public policy depend not so much on the common good, as on the push-and-pull of the various interest groups encamped in Washington, DC.
