New Perspectives on Challenges and Future Developments LexisNexis

Emphasizing a hands-on approach to tax education, every concept introduced in Fundamentals of Taxation includes meaningful exercises that allow students to reinforce what they are learning. This book is designed to not only expose beginning tax students to tax law, but to also teach the practical intricacies involved in the preparation of a tax return. To train tomorrow's tax preparers to handle the complex U.S. tax law, Fundamentals of Taxation's author team has devised four primary teaching advantages: 1.) The text is organized closely to follow the IRS tax forms. The authors introduce students to standard IRS forms early and reinforce their use throughout the text. Actual tax forms are incorporated throughout the text, giving students the opportunity to understand the principles behind tax law while they learn how to work with clients to obtain the information they will need to complete tax forms. 2.) Proper reporting of tax issues are illustrated. The authors present a tax issue, discuss the legal requirements, illustrate the proper tax form placement, and show the completed form in the text. By effectively leading the student through each issue, the authors demonstrate how tax form preparation is the result of a careful process that balances legal knowledge with practical experience. 3.) Integration of an individual income tax software package (TaxACT). The authors instruct students how to use the software to complete returns using sample "taxpayers" who appear from chapter to chapter. 4.) The authors supplement the text with citations of relevant tax authorities such as the Internal Revenue Code, Treasury Regulations, Revenue Rulings, Revenue Procedures, and court cases. These citations are almost always provided in footnotes. Thus, you and your students can easily use, or not use, the footnote material.

Recent developments in direct taxes and VAT/GST Taxes - in general - have become the topic of broad legal and policy discussions. VAT and GST are often said to be the fiscal success story of the 20th century, as almost all developed countries levy VAT or GST or similar all-encompassing broad-based consumption taxes. Global trends in direct taxes are visible at the level of international players, such as the OECD. Due to the OECD's BEPS project, national tax systems are being significantly modified. This book aims at identifying and discussing the current global trends in both VAT/GST and direct taxes. In daily practice, VAT/GST and direct taxes should be regarded simultaneously. Therefore, the Master's theses contained in this book deal with and highlight numerous issues, challenges and opportunities found in both direct taxes and in the VAT/GST area, ranging from nexus in direct taxes and VAT/GST, recent developments in certain policy areas, the definition of taxable persons, tax abuse, non-discrimination rules, charities, transfer pricing, European State aid, immovable property, share deals etc. While the construction of VAT/GST and direct taxes differs, both taxes have similarities. The contributions in this book make a legal comparison of the recent developments in direct taxes and VAT/GST in the relevant fields, provide an analysis of the similarities and differences of the two taxation systems and highlight global trends in taxation.

The unprecedented progress of East Asia Pacific is a triumph of working people. Countries that were low-income a generation ago successfully integrated into the global value chain, exploiting their labor-cost advantage. In 1990, the region held about a third of the world's labor force. Leveraging this comparative advantage, the share of global GDP of emerging economies in East Asia Pacific grew from 7 percent in 1992 to 17 percent in 2011. Yet, the region now finds itself at a critical juncture. Work and its contribution to growth and well-being can no longer be taken for granted. The challenges range from high youth inactivity and rising inequality to binding skills shortages. A key underlying issue is economic informality, which constrains innovation and productivity, limits the tax base, and increases household vulnerability to shocks. Informality

is both a consequence of stringent labor regulations and limited enforcement capacity. In several countries, de jure employment regulations are more stringent than in many parts of Europe. Even labor regulations set at reasonable levels but poorly implemented can aggravate the market failures they were designed to overcome. This report argues that the appropriate policy responses are to ensure macroeconomic stability, and in particular, a regulatory framework that encourages small- and medium-sized enterprises where most people in the region work. Mainly agrarian countries should focus on raising agricultural productivity. In urbanizing countries, good urban planning becomes critical. Pacific island countries will need to provide youth with human capital needed to succeed abroad as migrant workers. And, across the region, it is critical to 'formalize' more work, to increase the coverage of essential social protection, and to sustain productivity. To this end, policies should encourage mobility of labor and human capital, and not favor some forms of employment - for instance, full-time wage employment in manufacturing - over others, either implicitly or explicitly. Policies to increase growth and well-being from employment should instead reflect and support the dynamism and diversity of work forms across the region.

After the Constitutional Convention, Benjamin Franklin was asked, "Well, Doctor, what have we got—a Republic or a Monarchy?" Franklin's response: "A Republic—if you can keep it." This book argues: we couldn't keep it. A true republic privileges the common interest above the special interests. To do this, our Constitution established an elaborate system of checks and balances that disperses power among the branches of government, which it places in conflict with one another. The Framers believed that this would keep grasping, covetous factions from acquiring enough power to dominate government. Instead, only the people would rule. Proper institutional design is essential to this system. Each branch must manage responsibly the powers it is granted, as well as rebuke the other branches when they go astray. This is where subsequent generations have run into trouble: we have overloaded our government with more power than it can handle. The Constitution's checks and balances have broken down because the institutions created in 1787 cannot exercise responsibly the powers of our sprawling, immense twenty-first-century government. The result is the triumph of special interests over the common interest. James Madison called this factionalism. We know it as political corruption. Corruption today is so widespread that our government is not really a republic, but rather a special interest democracy. Everybody may participate, yes, but the contours of public policy depend not so much on the common good, as on the push-and-pull of the various interest groups encamped in Washington, DC.
