This new Guide has been developed by AICPA staff and the Equity Securities Task Force and is the first in a series of 3 NEW AICPA Accounting Valuation Guides to be released. This long anticipated release reflects best practices developed over the previous decade. Since the issuance of FASB ASC 718 and 505-50 in 2004, valuing stock-based compensation ("cheap stock") has been a significant challenge for private companies. This New Guide has been designed to mitigate those challenges. It brings you practical guidance and illustrations related to accounting, disclosures and valuation of privately held company equity securities issued as compensation. This guide includes: Evaluating private and secondary market transactions – What should companies do when transaction activity doesn't match their estimates of value? Adjustments for control and marketability – How should companies think about the value of the enterprise for the purpose of valuing minority securities? When is it appropriate to apply a discount for lack of marketability, and how should the estimated discount be supported? Highly leveraged entities – How should companies incorporate the fair value of debt in the valuation of equity securities? What is the impact of leverage on the expected volatility of various securities? The relevance of ASC 820 (SFAS 157) to cheap stock issues Updated guidance and illustrations regarding the valuation of, and disclosures related to, privately held company equity securities issued as compensation This Guide also provides expanded and more robust valuation material to reflect advances in the theory and practice of valuation since 2004. This edition includes guidance from FASB ASC 718, 505-50, 820-10 and SSVS 1 which were all issued since the last AICPA guidance dedicated to this issue.

With *The Firm*, financial journalist Duff McDonald pulled back the curtain on consulting giant McKinsey & Company. In *The Golden Passport*, he reveals the inner works of a singular nexus of power, ambition, and influence: Harvard Business School. Harvard University still occupies a unique place in the public's imagination, but the Harvard Business School eclipsed its parent in terms of influence on modern society long ago. A Harvard degree guarantees respect. But a Harvard MBA near-guarantees entrance into Western capitalism's most powerful realm—the corner office. And because the School shapes the way its powerful graduates think, its influence extends well beyond their own lives. It affects the organizations they command, the economy they dominate, and society itself. Decisions and priorities at HBS touch every single one of us. Most people have a vague knowledge of the power of the HBS network, but few understand the dynamics that have made HBS an indestructible and dominant force for almost a century. Graduates of HBS share more than just an alma mater. They also share a way of thinking about how the world should work, and they have successfully molded the world to that vision—that is what truly binds them together. In addition to teasing out the essence of this exclusive, if not necessarily “secret” club, McDonald explores two important questions: Has the school failed at reaching the goal it set for itself—“the multiplication of men who will handle their current business problems in socially constructive ways?” Is HBS complicit in the moral failings of Western capitalism? At a time of soaring economic inequality and growing political unrest, this hard-hitting yet fair portrait offers a much-needed look at an institution that has had a profound influence not just in the world of business but on the shape of our society—and on all our lives.

In this book, Dr. Li and his author team plan to emphasize why mouse models are useful in vivo systems for understanding disease mechanisms and developing therapeutic strategies in blood cancers. The authors do not intend to cover all types of blood cancers; instead, they will focus on some major ones such as leukemias and lymphomas. However, the authors will try to cover as much as they can the cancer types and point out that many blood cancers need to be studied in mouse disease models although they are still not available at present. A major focus in the book will be to show what we can or cannot learn from mouse disease models and to also show the critical contributions of mouse models in therapeutic drug development.

"Local editors Schaper and Horwitz have assembled a noteworthy collection of noir-infused stories mixed with laughter... The Akashic noir short-story anthologies are avidly sought and make ideal samplers for regional mystery collecting." --Library Journal "The best pieces in the collection turn the clichés of the genre on their head... and despite the unseemly subject matter, the stories are often surprisingly funny." —City Pages (Minneapolis) Brand-new stories from John Jodzio, Tom Kaczynski, and Peter Schilling, Jr., in addition to the original volume's stories by David Housewright, Steve Thayer, Judith Guest, Mary Logue, Bruce Rubenstein, K.J. Erickson, William Kent Krueger, Ellen Hart, Brad Zellar, Mary Sharratt, Pete Hautman, Larry Millett, Quinton Skinner, Gary Bush, and Chris Everheart. "St. Paul was originally called Pig's Eye's Landing and was named after Pig's Eye Parrant--trapper, moonshiner, and proprietor of the most popular drinking establishment on the Mississippi. Traders, river rats, missionaries, soldiers, land speculators, fur trappers, and Indian agents congregated in his establishment and made their deals. When Minnesota became a territory in 1849, the town leaders, realizing that a place called Pig's Eye might not inspire civic confidence, changed the name to St. Paul, after the largest church in the city... Across the river, Minneapolis has its own sordid story. By the turn of the twentieth century it was considered one of the most crooked cities in the nation. Mayor Albert Alonzo Ames, with the assistance of the chief of police, his brother Fred, ran a city so corrupt that according to Lincoln Steffans its 'deliberateness, invention, and avarice has never been equaled.' As recently as the mid-'90s, Minneapolis was called 'Murderopolis' due to a rash of killings that occurred over a long hot summer... Every city has its share of crime, but what makes the Twin Cities unique may be that we have more than our share of good writers to chronicle it. They are homegrown and they know the territory--how the cities look from the inside, out..."

This book addresses sixteen different reform proposals that are urgently needed to correct the fault lines in the international tax system as it exists today, and which deprive both developing and developed countries of critical tax resources. It offers clear and concrete ideas on how the reforms can be achieved and why they are important for a more just and equitable global system to prevail. The key to reducing the tax gap and consequent human rights deficit in poor countries is global financial transparency. Such transparency is essential to curbing illicit financial flows that drain less developed countries of capital and tax revenues, and are an impediment to sustainable

development. A major break-through for financial transparency is now within reach. The policy reforms outlined in this book not only advance tax justice but also protect human rights by curtailing illegal activity and making available more resources for development. While the reforms are realistic they require both political and an informed and engaged civil society that can put pressure on governments and policy makers to act.

Thinking Critically About Ethical Issues encourages students to reason out for themselves the best answers to moral problems, rather than providing neat answers for students to swallow and regurgitate. Striking a balance between the theoretical and the practical, Ruggiero's text discusses the history of ethics, but its focus is on doing ethics to promote the development of critical thinking skills and to help students acquire confidence in their own judgement. The short chapter length allows students to spend less time reading and more time doing ethical analysis.

Career transitions in psychiatry have rarely been discussed openly. Yet, in the light of health care reform and other forces affecting clinical practice, it is more important than ever that psychiatrists have information about the career options within their specialty. Career Pathways in Psychiatry:

Transition in Changing Times serves that purpose. It explores the professional development and career choices of prominent American psychiatrists, each of whom is identified with a particular career track and many of whom have themselves experienced one or more career transitions. The autobiographical accounts of the contributors survey a wide range of career pathways in psychiatry, including clinical practice, HMO practice, research, administration, entrepreneurship, psychoanalysis, organized medicine, the pharmaceutical industry, public psychiatry, occupational psychiatry, forensic psychiatry, and military psychiatry. These accounts are as engaging as they are informative; their anecdotal nature and conversational tone make for pleasurable reading. References at the end of each chapter serve as recommended reading for those who wish to learn more about specific career options. Intended for psychiatric residents and psychiatrists early in their careers, Career Pathways in Psychiatry will also appeal to their more experienced colleagues, including seasoned clinicians who have contemplated career changes. With a preface summarizing research on career transitions in medicine and numerous chapters shedding light on factors contributing to resistance to change, this book will also be of interest to social scientists, mental health administrators, and professional recruiters.
