In a world where image is everything, where the past is more real than the present, the rich can reprogram everything—and cast themselves in the starring roles. Everyone else is nothing but an extra. . . . As part of the supporting cast, Pelayo survives as a test subject for the latest electronic skin and philm technology, which brings past trends and famous people to vivid life on his body. His cousin Marta works at a cinematique offering cheap skincense, image grafts, and nanimatronics. That's where she meets Nadice, an indentured worker smuggling illegal ware to escape an exclusive resort specializing in kitschy environs. But Nadice is hiding something far more contraband: a forbidden pregnancy she can't explain but is determined to protect. When Marta tries to

help, both women disappear. While Pelayo searches for his cousin, homicide detective Kasuo van Dijk investigates a mysterious death that may involve a new kind of e-skin-mass-mediated ware that will lead him to Marta, Nadice, her employer—and a diabolical plan to deliver humanity kicking and screaming into a frightening new age of information. . . .

This book bridges the gap between ecotoxicology and limnology, offering an ecotoxicological perspective on lake management. The text describes eutrophication of shallow, temperate lakes, and examines the influence of toxic substances on the aquatic ecosystem, and proposes that nutrients like phosphorus are not the only important factor in explaining and managing eutrophication. Draws on a range of studies and experiments, some presented here for the first time.

The creator of *Goodnight Goon* and *The Runaway Mummy* pulls from his mad-scientist brain a kid so attracted to slime, muck, dirt, and yuck that he could only be called Icky Ricky. Uh-oh! Icky Ricky is in a mess and has a lot of explaining to do. Why? Well, you see . . . A water demon took over the sink in the boys' bathroom! Icky Ricky and his friends cleaned up the house—with a leaf blower. His sweaty armpit is a perfect robber-proof bank. The dead raccoon he bought at a garage sale is speeding downhill in a runaway go-cart. Can Icky Ricky stop it? Icky Ricky is up to his eyeballs in trouble—and in ick!

Ecocriticism and the Idea of Culture: Biology and the Bildungsroman draws on work by Kinji Imanishi, Frans de Waal, and other biologists to create an interdisciplinary, materialist notion of culture for ecocritical analysis. In this timely intervention, Feder examines the humanist idea of culture by taking a fresh look at the stories it explicitly tells about itself. These stories fall into the genre of the Bildungsroman, the tale of individual acculturation that participates in the myth of its complete separation from and opposition to nature which, Feder argues, is culture 's own origin story. Moving from Voltaire 's Candide to Mary Shelley 's Frankenstein and from Virginia Woolf 's Orlando to Jamaica Kincaid 's Lucy, the book dramatizes humanism 's own awareness of the fallacy of this foundational binary. In the final chapters, Feder examines the discourse of animality at work in

Annotation Nigeria seems to be behind in a lot of areas North American, European, Australasian and even S.E. Asian librarians will say been there, done that long ago but that does not negate the fact that articles about the experience of placing computers in libraries, automation

of processes, use of CD-ROMs, introduction of the Internet and so on are just as valid from people doing it now, today for the first time, as they were from when many of us did it 20 or 30 years ago.

Ideology and Social Change in Latin America Macmillan  
One of the most striking features of contemporary industrial economies is their ability to offer an ever-expanding and improving range of products. Personal computers, tiny pacemakers, digital watches, and VCRs simply did not exist, and were not even dreamt of, only a few decades ago. Such product innovations play an increasingly important role in modern economic growth, and it is therefore imperative that economists come to grips with them, just as they have done with traditional economic phenomena. In this skillfully crafted and imaginative study, Manuel Trajtenberg develops the tools to quantify and analyze the notion of product innovation. He argues persuasively that the magnitude of an innovation should be equated with the social benefits that it generates. Drawing from the "characteristics approach" to demand theory and the econometrics of discrete choice, he presents an ingenious method to estimate the benefits from product innovations that accrue to the consumer over time. His method centers on consumer preferences for different product attributes -such as speed and size of memory in computers-and then uses those preferences to evaluate the changes in attributes. Trajtenberg applies his approach to the study of one of the most remarkable innovations in medical technology--Computed Tomography (CT) scanners. He assembled for that purpose an impressive set of data on every aspect of the new technology, from qualities and prices, patents and research, to details on virtually every sale in the United States during the decade following the

introduction of CT in 1973. This close-up view of an innovation, quite rare in economic literature, offers valuable insights on the nature of the innovative process, the interaction between innovation and diffusion, the effects of uncertainty about quality, and the implications of changing preferences.

Although fiction writers must concern themselves with "big picture" issues such as plot, theme, and character development, much of the day-to-day work of writing involves finding answers to seemingly minor questions: How should I describe the exterior of a house? How can I construct the voice of a historical narrator with authenticity? How should I depict a physically atypical character? Few books on the market address the problems and opportunities present in these and other questions, yet they are the ones that most writers grapple with on a daily basis. *Danger on the Page: A Fiction Writer's Guide to Sex, Violence, Dead Narrators, and Other Challenges* identifies and explores some of the more common and intractable situational challenges of fiction writing, with chapters grouped into the general subject areas such as scenes, characters, points of view, and settings. Shawver delves into the pitfalls and opportunities of writing about sex, violence, sports, and love; he examines writing from the perspective of a

different race, gender, or species; he interrogates conventional beliefs about the use of brand names, the description of architecture, and the portrayal of nature. Throughout, he gives dozens of examples from both literary and commercial fiction so readers can borrow (or reject) other writers' techniques and explore the myriad challenges of fiction writing on their own. A lively and witty approach to a diverse range of specific writing issues, Shawver's book will appeal especially to intermediate-level writers seeking to bring their craft to the next level.
