From the popular Haynes Owners' Workshop Manual space series, which includes NASA Apollo 11 Manual and NASA Space Shuttle Manual, this unique book provides an insight into the only car ever built to be driven on the surface of another world. With a Foreword by the first Apollo astronaut to drive it on the Moon, Dave Scott, and published to coincide with the 40th anniversary of mankind's final drive on the Moon in December 2012. The book is part mechanical guide, illustrated with many of the technical drawings from the time, and part narrative-driven story of engineering ingenuity and human triumph. It draws on the rich NASA photographic archive and the complete transcripts of the crews' reaction to driving across the Moon, which the authors have an un-paralleled knowledge and experience of working with.

Torque Technical Tips books are a must for Range Rover Classic enthusiasts. There are two volumes in this series, which totals over 700 pages of expert technical tips for Land Rover's Range Rover Classic - spanning from 1977 to 1992 and have been collated from "Torque", the club magazine of one of the oldest Range Rover Clubs around - the Range Rover Club of Australia, Victoria Branch. Volume 1 has 373 pages and takes tips and articles dated between 1977 and 1986. Contributions come from a mix of Land Rover mechanics and club enthusiasts and include: how these wonderful cars work; getting home if you break down in the middle of nowhere (we call it bush-mechanics, in Australia); modifications; off-road driving and recovery techniques; and many more. The wealth of knowledge from the club that was formed in 1977 is immense; it's still going strong and still has some of the original members.
