[My Years with the IAF](#) by Mocktime Publication

This is the first time that an Air Chief is sharing his thoughts and memories with the reading public. His span of service covers a period of thirty-three years: from the end of 1939 to the beginning of 1973. It includes the Burma campaign of World War II, the restricted fighting in Kashmir in 1947 and 1948, the Chinese debacle in 1962 and the two full scale wars with Pakistan in 1965 and 1971. He had 4,274 hrs of flying with the Air Force to his credit and the experience of flying 58 types of aircraft from Wapitis to supersonic jets. In 1965 he was the Vice Chief of Air Staff and in 1971 the Chief. His honesty and forthrightness many readers will find engaging& but perhaps a few who were on the scene then may find them unpalatable. In a way this is the story of aviation in India, in particular of the Indian Air Force. It is a story of a real life adventure the genesis, growth and achievements of the youngest of the three defence services. Sir Winstom Churchill said of the RAF: Never before in the history of human conflict was so much owed by so many to so few. That is true also of the Indian Air Force. Though this does not purport to be a history of the Indian Air Force without it no history would be complete.

[Defence from the Skies: 80 Years of the Indian Air Force](#) Arihant Publications India limited
Indian Air Force now completes 80 years since it was formed as an independent component of India's armed forces. Time and again, the air force has performed magnificently even against severe odds, and built up a professional reputation that is the envy of leading air forces of the world. This volume, as the Second Edition of the earlier volume published in 2007 has been extensively revised and updated. Air Forces are unique in the sense that they are the only national military institution exclusively devoted to military operations in the aerospace continuum. The Indian Air Force is no different. But their dominant role in modern warfare, the high costs of aerospace power, and a host of other factors demand closer attention to their role in modern defence and the protection of national interests. Air Forces don't win wars by themselves; and no one in the Indian Air Force has ever claimed it. But no war can be won without them. We learnt that seminal lesson the hard way when we did not use the potent force of the IAF's combat fleet in the Sino-Indian War of 1962. It is from this perspective that this study — or rather an interpretative essay reflecting on the significant issues and events of the past 80 years — approaches the challenges the Indian Air Force faces in the coming decades. IAF combat force levels have slumped while its commitments are rapidly growing in consonance with our expanding economic and political interests well beyond our territorial boundaries.

[INDIAN AIR FORCE AIRMEN GROUP Y \(TECHNICAL TRADES EXAM\) 30 PRACTICE SETS \(REVISED 2021\)](#) Rama Publishers

Just think: the last combat aircraft designed by the 74-year old HAL (Hindustan Aeronautics Ltd) with its expansive infrastructure was in the 1950s – and it was an excellent aircraft. Thirty years later an ad-hoc, interim institution called ADA (Aeronautics Development Agency) was set to design the LCA (Light Combat Aircraft) under the DRDO management. Thirty years later the aircraft has yet to enter service although the Indian Air Force has ordered 40 aircraft knowing they do not meet the qualitative requirements set in the early 1980s, leave alone the 21st century! Even the primary trainer for rookie pilots has just begun to be imported. Obviously something is wrong for a long time; and obviously it is a systemic problem. This volume sets out to historically examine and present a balanced understatement of the facts. Some of the leading experts in the profession of aerospace identify the problems. The reader is left to form his judgment and what appears an obvious solution. The Air Force is the most concerned stakeholder in the quality and quantity of military aircraft; but it seems to have been left on the sidelines in the process of to be criticised as being against indigenisation. We recognise that India is way behind the developed countries — and China now, in design and development of military aviation. We don't have to go far to find the way ahead. Ninety-five percent of the Indian Navy's warships and submarines are designed and manufactured in the country (tough many systems inside, like its missiles, may be acquired from the best in the world). The reason is starkly so simple that South Block itself does not notice it! Naval Head Quarters contain within its organisation under the leadership and the Chief of Naval Staff, the Directorate of Naval Design as well as the Controller of Warship Production besides the other supporting organisations like WESEE etc. Hence when the indigenous INS Delhi sailed out in the 1990s, the international community began to look at Indian Navy with new respect. Why can't similar system be established for the Army and the Air Force? Read the volume to ask your questions and mull over possible solutions.

TABLE OF CONTENTS Model Solved Paper (Official), English, General Awareness, Mathematics, Reasoning, Practice Sets (1-3).

Indian Air Force X Group | 15 Practice Sets and Solved Papers Book for 2021 Exam | with Latest Pattern and Detailed Explanation | by Rama Publishers Rama Publishers

The Indian Air Force is today 82 years old, a battle-scarred, highly professional force. How it reached this level is an epic saga of struggle against bias and racial prejudice for the officers and men from early thirties to the beginning of World War II. The charge was that Indians lacked leadership qualities and could not fly military aircraft and technically maintain them. In just three years, IAF technicians and pilots imbibed the discipline of the Air Force and performed magnificently in the North West Frontier Province. By 1939, when the war broke out, there was just one squadron. In 1941-42, the Japanese onslaught on Burma provided the IAF with an opportunity to show its competence and leadership in battle. As the Allied armies were retreating, along with the RAF, the IAF provided air cover. By 1944-45, there were nine squadrons and till the end of the war there were constantly in action. History records events taking an impersonal view. What our younger generations need to know is people. Without people there are no units and no organization. This narrative is an effort to bring to the reader the fierce joy at fighting for the country, the professional pride of doing one's duty and finally the personal touch: "I did it." Through the mouths of youngsters (who are no longer youngsters and some who have passed away) the reader can imagine himself to be there whether in the North-West tribal region, or flying over the thick jungles of Burma. It is the first-person account that provides the flesh and blood to history by describing hopes, fears, and pride in facing death and the enemy at close quarters on the frontier or in Burma. The narrative has interviews with those who took part in operations. This is a story of the Indian Air Force coming of age after being bloodied in war.
