Indian locomotive class WAG-12 - Wikipedia

The Indian locomotive class WP was a class of 4-6-2 "Pacific" steam locomotives used in India. It was introduced after World War II for passenger duties, marking the change from 'X' to 'W' as the classification code for broad gauge locomotives. The class was designed specifically for low-calorie, high-ash Indian coal, by Railway Board designers in India. WP class locomotives were capable of doing up to 110 km/h and were easily recognized by their cone-shaped bulging nose, usually with a silver s Diesel locomotives to soon become thing of the past ...

To avoid confusion and to uniquely identify locomotives according to what they do and how they work, Indian Railways have developed a stunningly simple system which classifies locomotives into different classes taking into account all their parameters like Gauge, Traction, Usage, Version, Power etc. Locomotives are divided into the broadest classes at first and then sub-classified into ...

(PDF) Technologies adopted in Diesel Locomotive Engines ...

For the last ten years modernisation has been the centre of focus for the Indian Railways. From laying of new tracks to revamping railway stations to running

new semi-high speed trains, there has been a multifold development in this sector. Wednesday, October 28 2020 Trending. Diesel locomotives to soon become thing of the past;

Locomotives of India - Wikipedia

Indian Railways unveils indigenously manufactured Tejas Express locomotives. The engine of Tejas Express is manufactured using new technology in West Bengal's Chittaranjan Locomotive Works (CLW)....

The Indian Railways primarily operates fleet of electric and diesel locomotives, along with several compressed natural gas locomotives. Steam locomotives are operated on a few World Heritage sites and also run occasionally as heritage trains. A locomotive is also known as a loco or more popularly as an engine. The country's first steam locomotive ran on the Red Hill Railway from Red Hills to the Chintadripet bridge in Madras in 1837.
