Brilliantly researched and wonderfully written, LOVE AND CAPITAL reveals the rarely glimpsed and heartbreakingly human side of the man whose works would redefine the world after his death. Drawing upon previously unpublished material, acclaimed biographer Mary Gabriel tells the story of Karl and Jenny Marx's marriage. Through it, we see Karl

as never before: a devoted father and husband, a prankster who loved a party, a dreadful procrastinator, freeloader, and man of wild enthusiasms--one of which would almost destroy his marriage. Through years of desperate struggle, Jenny's love for Karl would be tested again and again as she waited for him to finish his masterpiece, *Capital*. An epic narrative that stretches over decades to recount Karl and Jenny's story against the backdrop of Europe's Nineteenth Century, LOVE AND CAPITAL is a surprising and magisterial account of romance and revolution--and of one of the great love stories of all time.

How the history of technological revolutions can help us better understand economic and political polarization in the age of automation The Technology Trap is a sweeping account of the history of technological progress and how it has radically shifted the distribution of economic and political power among society's members. As Carl Benedikt Frey shows, the Industrial Revolution created unprecedented wealth and prosperity over the long run, but the immediate consequences of mechanization were devastating. Middle-income jobs withered, wages stagnated, the labor share of income fell, profits surged, and economic inequality skyrocketed. These trends broadly mirror those in our current age of automation. But, just as the Industrial Revolution eventually brought about extraordinary benefits for society, artificial intelligence systems have the potential to do the same. The Technology Trap demonstrates that in the midst of another technological revolution, the lessons of the past can help us to more effectively face the present.

The Violent Making of the Industrial Revolution Little, Brown

Five years ago in *The Vanishing Newspaper*, Philip Meyer offered the newspaper industry a business model for preserving and stabilizing the social responsibility functions of the press in a way that could outlast technology-driven changes in media forms. Now he has updated this groundbreaking volume, taking current declines in circulation and the number of dailies into consideration and offering a greater variety of ways to save journalism. Meyer's "influence model" is based on the premise that a newspaper's main product is not news or information, but influence: societal influence, which is not for sale, and commercial influence, which is. The model is supported by an abundance of empirical evidence, including statistical assessments of the quality and influence of the journalist's product, as well as its effects on business success. Meyer now applies this empirical evidence to recent developments, such as the impact of Craigslist and current trends in information technologies. New charts show how a surge in newsroom employment propped up readership in the 1980s, and data on the effects of newsroom desegregation are now included. Meyer's most controversial suggestion, making certification available for reporters and editors, has been gaining ground. This new edition discusses several examples of certificate programs that are emerging in organizations both old and new. Understanding the relationship between quality and profit probably will not save traditional newspapers, but Meyer argues that such knowledge can guide new media enterprises. He believes that we have the tools to sustain high-quality journalism and preserve its unique social functions, though in a transformed way.

NAMED ONE OF THE BEST BOOKS OF 2018 BY THE SAN FRANCISCO CHRONICLE AND SMITHSONIAN

MAGAZINE By a prize-winning young historian, an authoritative work that reframes the Industrial Revolution, the expansion of British empire, and emergence of industrial capitalism by presenting them as inextricable from the gun trade "A fascinating and important glimpse into how violence fueled the industrial revolution, Priya Satia's book stuns with deep scholarship and sparkling prose."--Siddhartha Mukherjee, Pulitzer Prize-winning author of *The Emperor of All Maladies* We have long understood the Industrial Revolution as a triumphant story of innovation and technology. *Empire of Guns*, a rich and ambitious new book by award-winning historian Priya Satia, upends this conventional wisdom by placing war and Britain's prosperous gun trade at the heart of the Industrial Revolution and the state's imperial expansion. Satia brings to life this bustling industrial society with the story of a scandal: Samuel Galton of Birmingham, one of Britain's most prominent gunmakers, has been condemned by his fellow Quakers, who argue that his profession violates the society's pacifist principles. In his fervent self-defense, Galton argues that the state's heavy reliance on industry for all of its war needs means that every member of the British industrial economy is implicated in Britain's near-constant state of war. *Empire of Guns* uses the story of Galton and the gun trade, from Birmingham to the outermost edges of the British empire, to illuminate the nation's emergence as a global superpower, the roots of the state's role in economic development, and the origins of our era's debates about gun control and the "military-industrial complex" -- that thorny partnership of government, the economy, and the military. Through Satia's eyes, we acquire a radically new understanding of this critical historical moment and all that followed from it. Sweeping in its scope and entirely original in its approach, *Empire of Guns* is a masterful new work of history -- a rigorous historical argument with a human story at its heart.
