Industrial ventilation  
generally involves the  
use of supply and  
exhaust ventilation to  
control emissions,  
exposures, and  
chemical hazards in  
the workplace.

Traditionally,  
nonindustrial  
ventilation systems  
commonly known as  
heating, ventilating,  
and air-conditioning  
(HVAC) systems were  
built to control  
temperature, humidity,
