Introduction. What is attachment? Children are considered to be attached if they tend to seek proximity to and contact with a specific caregiver in

times of distress, illness and tiredness.

1 Attachment to a protective caregiver helps infants to regulate their negative emotions in times of stress and distress and to explore the environment, even if it contains somewhat frightening stimuli.

The Program for
Infant/Toddler
Care (PITC)
equates good care
with trained
infant/toddler care
teachers who
prepare

themselves and the months of age,
environment so vision improves,
infants can learn. and infants pay
PITC trains attention to bright
infant/toddler objects, preferring
leaders and primary colours,
educators to get particularly red.
"in tune" with each
infant or toddler
they serve and
learn from the
individual child
what he or she
needs, thinks, and
feels.
