Infants, Toddlers and Caregivers 9th edition ...
You can see a children's development by how they play, learn, speak, and act. Parents play a critical role in their child's development. Providing a safe and loving home and spending time together - playing, singing, reading, and even just talking - can make a big difference! Besides tracking your child ' s growth and development, you can learn about topics such as developmental disabilities ...
ABC Intervention | Developmental Psychology Lab
Introduction. What is attachment? Children are considered to be attached if they tend to seek proximity to and contact with a specific caregiver in times of distress, illness and tiredness. 1 Attachment to a protective caregiver helps infants to regulate their negative emotions in times of stress and distress and to explore the environment, even if it contains somewhat frightening stimuli.

Attachment to parents and primary caregivers is normal. Around eight or nine months, separation anxiety surfaces, and babies object to being away from parents or caregivers. By four months of age, vision improves, and infants pay attention to bright objects, preferring primary colours, particularly red.

Infants & Toddlers (Ages 0-3) - Milestones & Schedules
The Program for Infant/Toddler Care (PITC) equates good care with trained infant/toddler care teachers who prepare themselves and the environment so infants can learn. PITC trains infant/toddler leaders and educators to get "in tune" with each infant or toddler they serve and learn from the individual child what he or she needs, thinks, and feels.
