10TH

ANNIVERSARY

EDITION Is the financial plan of mediocrity -- a dream-stealing, soul-sucking dogma known as "The Slowlane" your plan for

creating wealth? You know how it goes; it sounds a lil something like this: "Go to school, get a good job, save 10% of your paycheck, buy a used car, cancel the movie channels, quit drinking expensive Starbucks mocha lattes, save and penny-pinch your life away, trust your life-savings to the stock market, and one day, when you are oh, say, 65 years old, you can retire rich." The mainstream financial gurus have sold you

blindly down the river to a great financial gamble: You've been hoodwinked to believe that wealth can be created by recklessly trusting in the uncontrollable and unpredictable markets: the housing market, the stock market, and the job market. This impotent financial gamble dubiously promises wealth in a wheelchair -- sacrifice your adult life for a financial plan that reaps dividends in the

twilight of life.
Accept the
Slowlane as your
blueprint for
wealth and your
financial future
will blow
carelessly
asunder on a
sailboat of
HOPE: HOPE
you can find a
job and keep it,
HOPE the stock
market doesn't
tank, HOPE the
economy
rebounds,
HOPE, HOPE,
and HOPE. Do
you really want
HOPE to be the
centerpiece for
your family's
financial plan?
Drive the
Slowlane road
and you will find

your life
deteriorate into a
miserable
exhibition about
what you cannot
do, versus what
you can. For
those who don't
want a lifetime
subscription to
"settle-for-less"
and a slight
chance of elderly
riches, there is
an alternative; an
expressway to
extraordinary
wealth that can
burn a trail to
financial
independence
faster than any
road out there.
Why jobs,
401(k)s, mutual
funds, and
40-years of
mindless frugality

will never make
you rich young.
Why most
entrepreneurs
fail and how to
immediately put
the odds in your
favor. The real
law of wealth:
Leverage this
and wealth has
no choice but to
be magnetized to
you. The leading
cause of
poorness:
Change this and
you change
everything. How
the rich really get
rich - and no, it
has nothing to do
with a paycheck
or a 401K match.
Why the guru's
grand deity -
compound
interest - is an

impotent wealth accelerator. Why the guru myth of "do what you love" will most likely keep you poor, not rich. And 250+ more poverty busting distinctions... Demand the Fastlane, an alternative road-to-wealth; one that actually ignites dreams and creates millionaires young, not old. Change lanes and find your explosive wealth accelerator. Hit the Fastlane, crack the code to wealth, and find out how to live rich for a lifetime.

Competition Demystified Elsevier High-dimensional probability offers insight into the behavior of random vectors, random matrices, random subspaces, and objects used to quantify uncertainty in high dimensions. Drawing on ideas from probability, analysis, and geometry, it lends itself to applications in mathematics, statistics, theoretical computer science, signal processing, optimization, and more. It is the first to integrate theory, key tools, and modern applications of

high-dimensional probability. Concentration inequalities form the core, and it covers both classical results such as Hoeffding's and Chernoff's inequalities and modern developments such as the matrix Bernstein's inequality. It then introduces the powerful methods based on stochastic processes, including such tools as Slepian's, Sudakov's, and Dudley's inequalities, as well as generic chaining and bounds based on VC dimension. A broad range of illustrations is embedded

throughout, including classical and modern results for covariance estimation, clustering, networks, semidefinite programming, coding, dimension reduction, matrix completion, machine learning, compressed sensing, and sparse regression. States. It has also been widely used around the globe and has inspired the development of similar manuals in other countries. This book is Volume II of a series on the conceptual and research origins of the methodologies found in the Highway Capacity Manual. It focuses on the most complex points in a traffic system: signalized and unsignalized intersections, and the concepts and methodologies developed over the years to model their operations. It also includes an overview of the fundamental concepts of capacity and level of service, particularly as applied to intersections. The historical roots of the manual and its

McGraw Hill Professional
Bruce Greenwald, one of the nation's leading business professors, presents a new and simplified approach to strategy that cuts through much of the fog that has surrounded the subject. Based on

his hugely popular course at Columbia Business School, Greenwald and his coauthor, Judd Kahn, offer an easy-to-follow method for understanding the competitive structure of your industry and developing an appropriate strategy for your specific position. Over the last two decades, the conventional approach to strategy has become frustratingly complex. It's easy to get lost in a sophisticated model of your competitors,

suppliers, buyers,
substitutes, and
other players,
while losing sight
of the big question:
Are there barriers
to entry that allow
you to do things
that other firms
cannot?
