Arkfeld's Best Practices Guide: Information Technology Primer for Legal Professionals, '13-'14 Edition Springer Science & Business Media This report by the external panel of experts (“ the panel ”) examines the effectiveness and appropriateness of the safeguards policy over the ten years since the inception of the policy, and most particularly in the five years since its last review. Furthermore, the panel, drawing on its research and experience, aims to establish a course for the Executive Board to consider that would help the safeguards policy continually improve, adapt to changing world conditions, and remain viable and relevant for the next decade. In gathering data to form its opinion, the panel (i) consulted with stakeholders in the policy (including central bank authorities, IMF Executive Directors ' offices, Fund and World Bank staff, and international audit firms), (ii) examined safeguards and other Fund-specific documents, and (iii) researched international reference materials.

How can knowledge developed in one context be put to use in other contexts? How can students learn to do so? How can educators design for learning this? These are fundamental challenges to many forms of education. The challenges are amplified in contemporary

society where people traverse many different contexts and where contexts themselves are continuously changing. Designing for Situated Knowledge Transformation provides a structured answer to these questions, through an investigation of the theoretical, empirical, methodological and pedagogical design aspects which they involve. Raising profound questions about the nature of knowledge, of situativity, and of transfer, transformation and resituation, it calls for and provides extended empirical studies of the forms of transformation that knowledge undergoes when people find themselves in new contexts while relying on existing knowledge. Considering many avenues of practical application and insight, Designing for Situated Knowledge Transformation develops a coherent framework for developing learning designs for knowledge transformation that is crucial in

today ' s educational settings.

Trans Dilemmas presents the findings of a three-year research project which examined the lived experiences of trans people in Australia's Northern Territory. The book argues that whilst trans people, who live in remote areas, experience issues which may not be distinct from those living in urban areas and the inner-city, these issues can be aggravated by geographic and demographic factors. By conducting online surveys and in-depth interviews, Stephen Kerry brings to light the issues for transgender people which are compounded by living in sparsely populated, remote communities. Namely social isolation, maintaining relationships with friends, family and partners, and the difficulties accessing health care. The book also includes significant findings on the experiences and treatment of Australia's trans Aboriginal people, also known as sistergirls and brotherboys. An analysis of first-person narratives by sistergirls and brotherboys reveals the racism within predominantly white trans communities and transphobia within traditional Aboriginal communities, which

they are uniquely faced with. Trans Dilemmas represents an important contribution to contemporary research into the lives of transgender Australians. It gives a voice to those transgender people living in the more isolated communities in Australia, which up until now, have been largely unheard. For students and researchers in Queer Studies and Gender Studies, this is valuable reading.
