Hist ó ria Inform á tica G. K. Hall

Hace ocho a ñ os, la Inform á tica Forense era solo una asignatura en v í as de desarrollo, apenas conocida entre la mayor í a de los profesionales de la Criminal í stica, gestionada por muy pocos y casi aislada de las disciplinas que le dan raz ó n de ser: el Derecho, la Criminal í stica y la Inform á tica. En la presente publicaci ó n, el orden que mostramos no es antojadizo ni aleatorio, sino que indica un camino a seguir por todo aquel que desea desempe ñ arse como perito en la materia. Hoy el panorama ha cambiado -entre otras razones por la amplia difusi ó n y recepci ó n que tuvo el Manual de Inform á tica Forense, ofrecido a los lectores por esta misma Editorial (2011)- y nuevamente nos encontramos con la Prof. Ing. Mar í a Elena Darahuge (pr á ctica-procedimental) y el Prof. Ing. Luis Enrique Arellano Gonz á lez (desarrollo te ó rico-conceptual), quienes, con el auspicio de la Facultad Regional Avellaneda (Universidad Tecnol ó gica Nacional), han complementado

la obra antedicha, ampliando sus alcances sobre los componentes informáticos móviles (iPod, iPad, tablet, teléfono celular) y especificando temas de permanente actualidad, tales como la "cadena de custodia informático forense", que tanto ha dado que hablar en el entorno jurisprudencial durante el año 2012. Este Manual se integra al anterior a fin de brindar un instrumento organizado conceptual y procedimentalmente a los operadores del Derecho (jueces, funcionarios judiciales, abogados de la matrícula), ingenieros, licenciados y peritos en Informática, Sistemas o Computación, licenciados en Criminalística, profesionales y empresarios que aspiren a una visión clara y sencilla de la Problemática Informático Forense, para resolver situaciones cotidianas y darle soporte a sus decisiones. Esperamos que esta obra les proporcione la utilidad y claridad pretendidas.

Mucha agua ha pasado bajo el puente, desde aquel momento en que corriendo el año 2004, los autores iniciaban el Primer Curso de Experto en Informática Forense, en la Universidad Tecnológica Nacional, Facultad Regional Avellaneda. Se trataba de un intento de difundir la disciplina como parte integradora de la metodología criminalística, con tecnología y técnicas informáticas y en el marco legal de nuestro país. Como soporte al precitado curso, se instrumentó el primer Grupo de Expertos en Informática Forense, hoy con más de 1250 miembros en América Latina y España. El resultado de aquella tarea fue la elaboración de dos manuales, también publicados por la Editorial Errepar: el Manual de Informática Forense, donde se sentaron las bases teóricas de la disciplina adaptada a nuestra realidad judicial, y luego el Manual de Informática Forense II, con la pretensión de extender la disciplina hacia la computación móvil (eran las postrimerías del año 2012). Hoy la tecnología nos ha pasado por el costado; el Derecho como siempre corre desde atrás y desde muy lejos. Los intentos que realiza por reducir la distancia parecen fuegos fatuos (la problemática para instaurar el sistema de notificaciones electrónicas por parte de la CSJN es prueba cabal de ello). Sin embargo, los operadores del Derecho y los auxiliares del juez no pueden darse el lujo de perder el tren tecnológico, so pena de incrementar la inseguridad jurídica que nos afecta a todos. Por esa razón, creemos que la única forma de evitar la brecha es la capacitación permanente de todos los involucrados y la difusión amplia e indiscriminada del conocimiento que cada día se amplía, evoluciona, cambia y se perfecciona. La primera parte de esta nueva obra pretende acercar a los operadores del Derecho una herramienta sencilla y útil para realizar una gestión eficiente, efectiva y eficaz de la prueba documental informática, aproximando las tres disciplinas involucradas (Criminalística, Informática y Derecho), mediante un lenguaje comprensible para los destinatarios. La segunda parte está especialmente orientada a los peritos, expertos y otros auxiliares del juez, brindando una serie de ejercicios

prácticos (resueltos) que facilitan la capacitación de los profesionales jóvenes que se aproximan a la disciplina y unifican la metodología de resolución pericial para los más avezados (no existen peritos de la "vieja escuela", simplemente porque no existe una "vieja escuela", ya que la Informática forense en nuestro país aún no ha cumplido las dos décadas). La Prof. Mg. María Elena Darahuge y el Prof. Esp. Luis Enrique Arellano González han intentado por este medio complementar las dos obras antes citadas y brindar continuidad al proceso de formación permanente que la Informática forense estimula en sus cultores, la tecnología impulsa, el Derecho espera con premura y la ciudadanía exige con impaciencia.
