Information Literacy in Music SAGE Publications

For the most part, those who teach writing and administer writing programs do not conduct research on writing. Perhaps more significantly, they do not often read the research done by others because effective reading of articles on empirical research requires special knowledge and abilities. By and large, those responsible for maintaining and improving writing instruction cannot -- without further training -- access work that could help them carry out their responsibilities more effectively. This book is designed as a text in graduate programs that offer instruction in rhetoric and composition. Its primary educational purposes are: * to provide models and critical methods designed to improve the reading of scientific discourse * to provide models of effective research designs and projects appropriate to those learning to do empirical research in rhetoric. Aiming to cultivate new attitudes toward empirical research, this volume encourages an appreciation of the rhetorical tradition that informs the production and critical reading of empirical studies. The book should also reinforce a slowly growing realization in English studies that empirical methods are not inherently alien to the humanities, rather that methods extend the power of humanist researchers trying to solve the problems of their discipline.

Utilization of Oral History Resources in a Classroom Setting Springer Nature

Elegant ideas deserve elegant expression. Sword dispels the myth that you can ' t get published without writing wordy, impersonal prose. For scholars frustrated with disciplinary conventions or eager to write for a larger audience, here are imaginative, practical, witty pointers that show how to make articles and books enjoyable to read—and to write.

Writing That Makes Sense, 2nd Edition IGI Global

One of the most perplexing aspects of research today is what to do when there's too much information on a topic. The key, says Leslie Stebbins, is to know how to find the most promising information, evaluate it, and use it effectively. Individual chapters provide a step-by-step introduction to research and critical evaluation and specific types of information resources, as well as guidance on such skills as note-taking and referencing. Students and librarians alike will benefit from these suggestions, strategies and straightforward examples for developing good filtering instincts and management of search results.

Student Library Research Practices & Skills Boynton/Cook

Learn how to provide better service to distance information users! This book is the result of the conference held in May, 2004 in Scottsdale, Arizona, focusing on librarians' challenges providing service to nontraditional faculty and students. Respected authorities discuss in detail specific

problems—and fresh strategies and solutions—to further promote service to distance information users. Each chapter tackles a particular issue such as collaboration outside the contributor's organization or how services can be monitored and assessed to gauge quality, and fully explains what can be done to address those issues. Each distinguished contribution was carefully selected by a 26-member advisory board using a juried abstracts process. Thorough bibliographies, useful figures, tables, and graphs provide accessibility and clarify ideas. Some of the topics in this book include: the promotion of library services to Native American students the planning and development process of a project to create a Web-based multi-media instruction tool for off-campus graduate students an examination of direct linking tools provided by major aggregators distance learning for the learning disabled distance learning implementation strategies for institutions course management software (CMS) and library services integration a survey of Association of Research Libraries offered services the do ' s and don ' ts of videoconferencing on and off-campus an eBooks collection study one-on-one research coaching via digital reference service an online tool that assesses students ' research skills and attitudes creating a library CD for off-campus students expanding student and faculty access to information services the collaboration with faculty on electronic course reserves developing assessment questions for services supporting off-campus learning programs providing secure off-campus access to library services beyond proxy servers and much, much more! The Eleventh Off-Campus Library Services Conference Proceedings is an invaluable comprehensive resource detailing the latest challenges and solutions for on- and off-campus librarians.

The SAGE Guide to Writing in Policing Cengage Learning

George Orwell set out ' to make political writing into an art ' , and to a wide extent this aim shaped the future of English literature — his descriptions of authoritarian regimes helped to form a new vocabulary that is fundamental to understanding totalitarianism. While 1984 and Animal Farm are amongst the most popular classic novels in the English language, this new series of Orwell ' s essays seeks to bring a wider selection of his writing on politics and literature to a new readership. In Politics and the English Language, the second in the Orwell ' s Essays series, Orwell takes aim at the language used in politics, which, he says, ' is designed to make lies sound truthful and murder respectable, and to give an appearance of solidity to pure wind ' . In an age where the language used in politics is constantly under the microscope, Orwell ' s Politics and the English Language is just as relevant today, and gives the reader a vital understanding of the tactics at play. 'A writer who can — and must — be rediscovered with every age.' — Irish Times

The Uses of Teacher-research in Developing A Writing Program ABC-CLIO

"The book is an academic/career guide. It argues for the importance of the humanities for job skills and for participation in civic life and politics. The book will help students speak persuasively about the usefulness of their humanities degrees"--

Readings on Writing Routledge

Information Literacy in Music: An Instructor ' s Companion is a practical guide to information literacy instruction for busy librarians and music faculty. This book contains examples of course-integrated assignments designed to help postsecondary music students develop foundational skills in information literacy. These assignments have been solicited from experienced librarians and faculty across the United States, and they represent a broad spectrum of approaches to music research, from historical to applied studies. Be inspired by new and creative solutions to students ' information literacy challenges and by the many examples of successful collaborations between librarians and music faculty.

Reading Empirical Research Studies Rowman & Littlefield

This volume identifies, problematizes, and discusses issues specific to the design of educational programs for teacher candidates from working class, ethnic- and language-minority, and immigrant backgrounds, taking as its starting point the distinctive, complex perspectives that these candidates bring to the university classroom.

The Research Process Kendall Hunt

Any teacher driven to despair by a stack of student research papers will find welcome inspiration in Beyond Note Cards. Since the research paper first became a fixture in the composition classroom, no other assignment has caused as much dread in students. By putting it in historical context, Ballenger offers new insight into the problems and promise of the research paper - and practical advice on how to revive it. Beyond Note Cardsexamines the best of the existing scholarship to offer a fresh, theoretically sound approach to teaching the research paper. Drawing on the recent movement to encourage inquiry-based learning, Ballenger argues that the spirit of inquiry should be at the heart of research paper instruction - not the usual preoccupation with teaching the paper's formal qualities. While Ballenger deals with theory, his book is never dry. Through case studies of his students and often revealing autobiographical anecdotes, the author weaves a fascinating story about the evolution of the research paper historically and in his own classroom. The book also contains many practical features, including: classroom-tested exercises and assignments to help students become better researchers and research writers original survey information that instructors can use to discuss the assignment with their own students a special section on how to teach the double-entry journal as part of a research assignment a helpful appendix that explores Internet research and new approaches to note taking. Beyond Note Cardsis an essential resource for instructors who are anxious to build connections between personal writing assignments and academic writing by highlighting the "habits of mind" that are present in both. In addition, teachers who already use Ballenger's popular student handbook, The Curious Researcher(Allyn & Bacon), will discover new ways to supplement it. [The Essentials of Writing: Ten Core Concepts](#) Modern Language Assn of Amer Provides teachers with a comprehensive, sequential program for teaching their students how to use the library research process to write a research paper.

An Introduction e-artnow

Teaching Academic Literacy provides a unique outlook on a first-year writing program's evolution by bringing together a group of related essays that analyze, from various angles, how theoretical concepts about writing actually operate in real students' writing. Based on the beginning writing program developed at the University of Wisconsin-Madison, a course that asks students to consider what it means to be a literate member of a community, the essays in the collection explore how students become (and what impedes their progress in becoming) authorities in writing situations. Key features of this volume include: * demonstrations of how research into specific teaching problems (e.g., the problem of authority in beginning writers' work) can be conducted by examining student work through a variety of lenses such as task interpretation, collaboration, and conference, so that instructors can understand what factors influence students, and can then use what they have learned to reshape their teaching practices; * adaptability of theory and research to develop a course that engages basic writers with challenging ideas; * a model of how a large writing program can be administered, particularly in regards to the integration of research and curriculum development; and * integration of literary and composition theories.

Handbook of Research on Media Literacy in Higher Education Environments Routledge

The SAGE Guide to Writing in Policing: Report Writing Essentials equips students with transferable writing skills that can be applied across the field of policing - both academically and professionally. Authors Steven Houglund and Jennifer M. Allen interweave professional and applied writing, academic writing, and information literacy, with the result being a stronger, more confident report writer. Students are also exposed to a number of best practices for various elements of report writing, such as the face page, incident reports, supplemental reports, investigative reports, and traffic reports, as well as search warrants and affidavits.

3rd International Conference in Building Physics (Montreal, Canada, 27-31 August 2006) Wipf and Stock Publishers

The Elements of Style William Strunk concentrated on specific questions of usage—and the cultivation of good writing—with the recommendation "Make every word tell"; hence the 17th principle of composition is the simple instruction: "Omit needless words." The book was also listed as one of the 100 best and most influential books written in English since 1923 by Time in its 2011 list.

MLA Style Manual and Guide to Scholarly Publishing Cengage Learning

The book is a collection of papers presented at First Doctoral Symposium on Natural Computing Research (DSNCR 2020), held during 8 August 2020 in Pune, India. The book covers different topics of applied and natural computing methods having applications in physical sciences and engineering. The book focuses on computer vision and applications, soft computing, security for Internet of Things, security in heterogeneous networks, signal processing, intelligent transportation system, VLSI design and embedded systems, privacy and confidentiality, big data and cloud computing, bioinformatics and systems biology, remote healthcare, software security, mobile and pervasive computing, biometrics-based authentication, natural language processing, analysis and verification techniques, large scale networking, distributed systems, digital forensics, and human – computer interaction.

Research in Building Physics and Building Engineering Pierian Press

Reflecting the dramatic changes shaped by rapidly developing technologies over the past six years, this new fourth edition of "Reference and Information Services" takes the introduction to reference sources and services significantly beyond the content of the first three editions. In Part I, Concepts and Processes, chapters have been revised and updated to reflect new ideas and methods in the provision of reference service in an era when many users have access to the Web. In Part II, "Information Sources and Their Use," discussion of each source type has been updated to encompass key resources in print and on the Web, where an increasing number of freely available sources join those purchased or licensed by libraries. A number of new authors are contributors to this new edition, bringing to their chapters their experience as teachers of reference and as practitioners in different types of libraries. Discussions of services in Part I integrate digital reference as appropriate to each topic, such as how to conduct a reference interview online using instant messaging. Boxes interspersed in the text are used to present scenarios for discussion, to highlight key concepts, or to present excerpts from important documents. Discussions of sources in Part II place more emphasis on designing effective search strategies using both print and digital resources. The chapter on selection and evaluation of sources addresses the changing nature of reference collections and how to evaluate new types of sources. Each chapter concludes with an updated list of additional readings to guide further study. A new companion website will provide links to Web-accessible readings and resources as well as additional scenarios for discussion and example search strategies to supplement those presented in the text.
