About the Guide. The Higher Education Information Security Council (HEISC) supports higher education institutions as they improve information security governance, compliance, data protection, and privacy programs. This guide, created by practitioners for practitioners, features toolkits, case studies, effective practices, and recommendations to help jump-start campus information security programs and initiatives.

Guide to securing personal information — OAIC

In the realm of information security and information technology, an asset is anything of value to a business that is related to information services. These can take the form of a device, data or information, or even as people or software systems within the structure of a business.

Anything that has value and supports the operation of a business can be considered an asset.
