percent of a technology professional's time is spent communicating with others. Whether writing a memo, preparing a set of procedures, or making an oral presentation, effective communication is vital to your professional success. This anthology delivers concrete advice from the foremost experts on how to communicate more effectively in the workplace. The revised and expanded second edition of this popular book completely updates the original, providing authoritative guidance on communicating via modern technology in the contemporary work environment. Two new sections on global communication and the Internet address

communicating effectively in the context of increased e-mail and web usage. As in the original, David Beer's Second Edition discusses a variety of approaches, such as: * Writing technical documents that are clear and effective * Giving oral presentations more confidently * Using graphics and other visual aids judiciously * Holding productive meetings * Becoming an effective listener The new edition also includes updated articles on working with others to get results and on giving directions that work. Each article is aimed specifically at the needs of engineers and others in the technology professions, and is written by a practicing engineer or a technical communicator.

Technical engineers, IEEE society members, and technical writing teachers will find this updated edition of David Beer's classic *Writing and Speaking in the Technology Professions* an invaluable guide to successful communication.

The stories

told in this book reflect the hard work and dedication of the Veterans Affairs nurses who provide care to our nation's heroes. Four key messages outlined in the book help explain the important role of VA nurses. Key Message 1: Nurses should practice to the full extent of their education and training; Key Message 2: Nurses should achieve higher levels of education and training through an improved education system that promotes

seamless academic progression; Key Message 3: Nurses should be full partners, with physicians and other health care professionals, in redesigning health care in the United States; Key Message 4: Effective workforce planning and policy making require better data collection and an improved information structure. This book addresses the staffing issues in military healthcare with policy and workforce planning
