Designing courses to deliver effective teaching and significant learning is the best way to set students up for success, and this book guides readers through the process. The authors have worked with faculty world-wide, and share the stories of how faculty have transformed courses from theory to practice. They start with Dee Fink's foundation of integrating course design. Then they provide additional design concepts to expand the course blueprint to implement plans for communication, accessibility, technology integration, as well as the assessment of course design as it fits into the assessment of programs and institutions, and how faculty can use what they learn to meet their professional goals.

Pathways into Information Literacy and Communities of Practice: Teaching Approaches and Case Studies considers the specific information literacy needs of communities of practice. As such, the book fills a gap in the literature, which has treated information literacy extensively, but has not applied it to the area of communities of practice. Since every community of practice generates, seeks, retrieves, and uses resources and sources related to the cognitive structure being researched or studied, and the tasks being performed, the need arises to undertake studies focused on real user communities, especially at a graduate level. This edited collection presents contributions from an international perspective on this key topic in library and information science. Contributions are arranged into two sections, the first exploring teaching and learning processes, and the second presenting case studies in communities of practice, including, but not limited to, health, research environments, college students, and higher education. Focuses on communities of practice, including health, research, and higher education and their distinct information needs Includes chapters from an international and experienced set of contributors Presents an interdisciplinary perspective on the topic
