In this vivid and timely history, Juan Cole tells the story of Napoleon's invasion of Egypt. Revealing the young general's reasons for leading the expedition against Egypt in 1798 and showcasing his fascinating views of the Orient, Cole delves into the psychology of the military titan and his entourage. He paints a multi-faceted portrait of the daily travails of the soldiers in Napoleon's army, including how they imagined Egypt, how their expectations differed from what they found, and how they grappled with military challenges in a foreign land. Cole ultimately reveals how Napoleon's invasion, the first modern attempt to invade the Arab world, invented and crystallized the rhetoric of liberal imperialism.

Happiness is a four letter word. I've never been happy before, never experienced love, until I met Nathan. He's my happy place, and my husband. Everything should be rainbows and unicorns, but it's not. The problem is, the past doesn't stay buried, and ours is popping up in spades. A trial. A warning. Reciprocity is at hand. The battle for survival has begun. Talking About Right and Wrong Catastrophic Press

"The authors ... continue the pursuit of new knowledge, calculated to bring new fruits of health, safety, and comfort to man and his environs. The charms, as well as the subtle hazards, of the terms ' conservation, preservation, and ecology ' need to be crystallized so that the public and their decision-makers practice this complex art with clearer conception and perception than is apparent in recent bitter confrontations." —From the Foreword to the Fourth Edition by Abel Wolman

What ' s New in This Edition: New entries on environmental and occupational toxicology, geoengineering, and lead abatement Twenty-five significantly updated entries, including expanded discussion of water supplies and waste water treatment, biomass and renewable energy, and international public health issues An expanded list of acronyms and abbreviations

This text provides a comprehensive, practical, evidence-based guide to the field. It covers each stage of the rehabilitation process from initial assessment, diagnosis and treatment, to return to pre-injury fitness and injury prevention. Presenting a holistic approach, this text also addresses the nutritional and psychological aspects of the rehabilitation process for the amateur sports enthusiast as well as elite athletes. Divided into five parts, Parts I, II and III cover screening and assessment, the pathophysiology of sports injuries and healing and the various stages of training during the rehabilitation process. Part IV covers effective clinical decision making, and Part V covers joint specific injuries and pathologies in the shoulder, elbow wrist and hand, groin and knee. Key features: Comprehensive. Covers the complete process from diagnosis

and treatment to rehabilitation and prevention of injuries. Practical and relevant. Explores numerous real world case studies and sample rehabilitation programmes to show how to apply the theory in practice. Cutting Edge. Presents the latest research findings in each area to provide an authoritative guide to the field.

"White's Barack Obama's America eloquently captures both the important nuances of the current political scene and its long-term consequences."

---Richard Wirthlin, former pollster for Ronald Reagan "This delightfully written and accessible book is the best available account of the changes in culture, society, and politics that have given us Barack Obama's America."

---Stan Greenberg, pollster for Bill Clinton and Chairman and CEO of Greenberg Quinlan Rosner Research "From one of the nation's foremost experts on how values shape our politics, a clear and compelling account of the dramatic shifts in social attitudes that are transforming American political culture. White's masterful blend of narrative and data illuminates the arc of electoral history from Reagan to Obama, making a powerful case for why we are entering a new progressive political era." ---Matthew R. Kerbel, Professor of Political Science, Villanova University, and author of Netroots "John Kenneth White is bold. He asks the big questions . . . Who are we? What do we claim to believe? How do we actually live? What are our politics? John Kenneth White writes compellingly about religion and the role it played in making Barack Obama president. White's keen insight into America's many faiths clarifies why Barack Obama succeeded against all odds. It is a fascinating description of religion and politics in twenty-first-century America---a must-read." ---Kathleen Kennedy Townsend, former Lieutenant Governor of Maryland and author of Failing America's Faithful "In Barack Obama's America, John Kenneth White has written the political equivalent of Baedeker or Michelin, the definitive guide to and through the new, uncharted political landscape of our world. White captures and explains what America means---and what it means to be an American---in the twenty-first century."

---Mark Shields, nationally syndicated columnist and political commentator for PBS NewsHour "John White has always caught important trends in American politics that others missed. With his shrewd analysis of why Barack Obama won, he's done it again." ---E. J. Dionne, Jr., Senior Fellow, Brookings Institution, and University Professor in the Foundations of Democracy and Culture at Georgetown University The election of Barack Obama to the presidency marks a conclusive end to the Reagan era, writes John Kenneth White in Barack Obama's America. Reagan symbolized a 1950s and 1960s America, largely white and suburban, with married couples and kids at home, who attended church more often than not. Obama's election marks a new era, the author writes. Whites will be a minority by 2042. Marriage is at an all-time low. Cohabitation has increased from a half-million couples in 1960 to more than 5 million in 2000 to even more this year. Gay marriages and civil unions are redefining what it means to be a family. And organized religions are suffering, even as Americans continue to think of themselves as a religious people. Obama's inauguration was a defining moment in the political destiny of this country, based largely on demographic shifts, as described in Barack Obama's America. John Kenneth White is Professor of Politics at the Catholic

Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 194 countries and 14 territories are used by policymakers, the media, international corporations, civic activists, and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide.

What Technology Wants St. Martin's Press

Publisher description

Freedom Fallacy Routledge

From the author of the New York Times bestseller The Inevitable—a sweeping vision of technology as a living force that can expand our individual potential In this provocative book, one of today's most respected thinkers turns the conversation about technology on its head by viewing technology as a natural system, an extension of biological evolution. By mapping the behavior of life, we paradoxically get a glimpse at where technology is headed—or "what it wants." Kevin Kelly offers a dozen trajectories in the coming decades for this near-living system. And as we align ourselves with technology's agenda, we can capture its colossal potential. This visionary and optimistic book explores how technology gives our lives greater meaning and is a must-read for anyone curious about the future.

Reciprocity KI\Lynn

It was the beginning of my downfall. My rise as king was also my demise. Love has no place in my life, but there was something about her. An itch I scratched was a gateway to a need for her. When an ultimatum is thrown at me, my rule is in jeopardy. I need a wife. And I'm going to make her my queen.

Taking on topics from pornography and prostitution to female genital mutilation, from womens magazines and marriage to sexual violence, contributors in this collection argue that the kind of liberal feminism currently rising to prominence does little to challenge the status quo.

Wicked Rule KI\Lynn

A ‘moderately prosperous society’ with no Chinese individual left behind—that’s the vision for China set out by Chinese President Xi Jinping in a number of important speeches in 2017. ‘Moderate’ prosperity may seem like a modest goal for a country with more billionaires (609 at last count) than the US. But the ‘China Story’ is a complex one. The China Story Yearbook 2017: Prosperity surveys the important events, pronouncements, and personalities that defined 2017. It also presents a range of perspectives,

from the global to the individual, the official to the unofficial, from mainland China to Hong Kong and Taiwan. Together, the stories present a richly textured portrait of a nation that in just forty years has lifted itself from universal poverty to (unequally distributed) wealth, changing itself and the world in the process.

Barack Obama's America Rowman & Littlefield

My will to live is weak. By all accounts, I should be dead, but somehow I made it through. Broken, battered, and barely hanging on, I'm forced to rely on the man who destroyed me. Recovery is a long road, and I'm not sure I can take it by his side, so I punish him, refusing to grant forgiveness. But it's still there--the spark. That incessant pull that I can't escape. The deepest scars of our hearts spill out. All the secrets we kept locked away are laid bare. Everything is different. Time is running out. All the infractions are catching up to us.

In an online, interconnected world, democracy is increasingly made up of wikis and blogs, pokes and tweets. Citizens have become accidental journalists thanks to their handheld devices, politicians are increasingly working online, and the traditional sites of democracy - assemblies, public galleries, and plazas - are becoming less and less relevant with every new technology. And yet, this book argues, such views are leading us to confuse the medium with the message, focusing on electronic transmission when often what cyber citizens transmit is pictures and narratives of real democratic action in physical space. Democratic citizens are embodied, take up space, battle over access to physical resources, and perform democracy on physical stages at least as much as they engage with ideas in virtual space. Combining conceptual analysis with interviews and observation in capital cities on every continent, John Parkinson argues that democracy requires physical public space; that some kinds of space are better for performing some democratic roles than others; and that some of the most valuable kinds of space are under attack in developed democracies. He argues that accidental publics like shoppers and lunchtime crowds are increasingly valued over purposive, active publics, over citizens with a point to make or an argument to listen to. This can be seen not just in the way that traditional protest is regulated, but in the ways that ordinary city streets and parks are managed, even in the design of such quintessentially democratic spaces as legislative assemblies. The book offers an alternative vision for democratic public space, and evaluates 11 cities - from London to Tokyo - against that ideal.

The Rulers Penguin

Moral Sentiments and Material Interests presents an innovative synthesis of research in different disciplines to argue that cooperation stems not from the stereotypical selfish agent acting out of disguised self-interest but from the presence of "strong reciprocators" in a social group. Presenting an overview of research in economics, anthropology, evolutionary and human biology, social psychology, and sociology, the book deals with both the theoretical foundations and the policy implications of this explanation for cooperation. Chapter authors in the remaining parts of the book discuss the behavioral ecology of cooperation in humans and nonhuman primates, modeling and testing strong reciprocity in economic scenarios, and reciprocity and social policy. The evidence for strong reciprocity in the book includes experiments using the famous Ultimatum Game (in which two players must agree on how to split a certain amount of money or they both get nothing.)

The Big Book of Words You Should Know Catastrophic Press

Conflicted Antiquities is a rich cultural history of European and Egyptian interest in ancient Egypt and its material culture, from the early nineteenth century until the mid-twentieth. Consulting the relevant Arabic archives, Elliott Colla demonstrates that the emergence of Egyptology—the study of ancient Egypt and its material legacy—was as consequential for modern Egyptians as it was for Europeans. The values and practices introduced by the new science of archaeology played a key role in the formation of a new colonial regime in Egypt. This fact was not lost on Egyptian nationalists, who challenged colonial archaeologists with the claim that they were the direct heirs of the Pharaohs, and therefore the rightful owners and administrators of ancient Egypt's historical sites and artifacts. As this dispute developed, nationalists invented the political and expressive culture of "Pharaonism"—Egypt's response to Europe's Egyptomania. In the process, a significant body of modern, Pharaonist poetry, sculpture, architecture, and film was created by artists and authors who looked to the ancient past for inspiration. Colla draws on medieval and modern Arabic poetry, novels, and travel accounts; British and French travel writing; the history of archaeology; and the history of European and Egyptian museums and exhibits. The struggle over the ownership of Pharaonic Egypt did not simply pit Egyptian

nationalists against European colonial administrators. Egyptian elites found arguments about the appreciation and preservation of ancient objects useful for exerting new forms of control over rural populations and for mobilizing new political parties. Finally, just as the political and expressive culture of Pharaonism proved critical to the formation of new concepts of nationalist identity, it also fueled Islamist opposition to the Egyptian state.

The Information Society: Emerging Landscapes MIT Press

This is one of the first compilations on collective bargaining in higher education reflecting the work of scholars, practitioners, and employer and union advocates. It offers a practical and comprehensive resource to higher education leaders responsible for developing, managing, and maintaining collective bargaining relationships with academic personnel. Offering views from an experienced and diverse group, this book explores how to manage relationships in collaborative, transparent, and equitable ways, best practices for meaningful outcome measures, and approaches for framing collective bargaining as a long-term process that benefits the institution. This volume provides an overview of the contemporary landscape, benchmark measures of success, and practical advice focusing on advancing collaborative, equitable, and sustainable labor relations approaches in higher education. Designed for administrators, union leaders, elected officials, and policy makers, at all stages of their careers as well as for faculty and students in graduate programs, this volume serves as an invaluable resource for those who endeavor to conceptualize, conduct, manage, and implement collective bargaining in more mutually effective and beneficial ways for all parties.
