First Comes Love

"O'Reilly Media, Inc."

Would a proper adult ignore the spilt milk under the fridge for weeks? Would a proper adult take three years to post a solitary Christmas card? Would a proper adult have decades-old underwear in active service? Mike Gayle is nowhere near being a proper adult - even though his tenth wedding anniversary is looming; his second child is due any moment; and in less than twenty-four hours he is going to be officially closer

to forty than he is to thirty.

Appalled by this lack of maturity, Mike draws up a To-Do list containing every single item he's been meaning to do but just keeps putting off... He's got a lot of stuff that needs doing. But unlike previous To-Do lists, he promises himself that this one will actually get DONE. And along the way, Mike will learn stuff about life (323), love (999), friends (1004) and family (9) and finally work out what it means to be a grown up (846).

A comprehensive exploration of technology's role in adult learning *Technology and Innovation in Adult Learning* introduces educators and students to the intersection of adult learning and the growing technological revolution. Written by an internationally recognized expert in the field, this book explores the theory, research, and practice driving innovation in both adult learning and learning technology, and illuminates a powerful approach to recognize and leverage these opportunities. Building on

current trends and research in technology and its use, each chapter illustrates the need, opportunities, and examples of current and future technologies that scaffold adult learning, and provides comprehensive coverage of both current and emerging challenges. Many adult learning faculty, practitioners, and students realize that technology presents a growing and ever-present set of issues, yet few feel confident in identifying the opportunities that arise with each step forward. This book clarifies the interplay between adult learning and learning technology, and characterizes the cyclic exchange of information and opportunities that link these fields now and in the future. Understand the critical issues currently affecting adult learning Learn how technology is presenting both opportunities and challenges for the teaching and learning of adults in different contexts Examine recent research on learning technology for adult learners Discover how technological innovation can be applied now and how it will continue to shape the future of learning Adult learning is on the rise, and there is no mistaking technology's role; whether they're learning with or about technology, today's adult learners come with unique sets of needs and skills that demand specialized approaches. Traditional pedagogical techniques don't transfer directly, and learning technology requires its own unique approach to development and use. Technology and Innovation in Adult Learning equips practitioners to further adult learning and shape the future of the field, while

providing a rich perspective for classroom inquiry and research.

'Different minds learn differently' writes Dr Mel Levine, one of the best-known education experts and paediatricians in America today. And that's a problem for many children, because most schools still cling to a one-size-fits-all education philosophy. In *A MIND AT A TIME*, Dr Levine shows parents and others who care for children how to identify these individual learning patterns. He explains how parents and teachers can encourage a child's strengths and bypass the child's weaknesses. This type of teaching produces satisfaction and achievement instead of frustration and failure. Different brains are differently wired with eight fundamental systems of

learning that draw on a variety of neurodevelopmental capacities. Certain students are strong in certain areas and some are strong in others, but no one is equally capable in all eight. Learning begins at school, but it doesn't end there.

Frustrating a child's desire to learn will have lifelong repercussions. We must begin to pay more attention to individual learning styles, to individual minds, urges Dr Levine, so that we can maximise our children's learning potential. A MIND AT A TIME shows us how. The culmination of an innovative practice research project, Michael Chekhov in the Twenty-First Century: New Pathways draws on historical writings and archival materials to investigate how Chekhov's technique can be used across the disciplines of contemporary performance and applied practice. In contrast to the narrow, actor training-only analysis that dominated 20th-century explorations of the technique, authors Cass Fleming and Tom Cornford, along with contributors Caoimhe McAvinchey, Roanna Mitchell, Daron Oram and Sinéad Rushe, focus on devising, directing and collective creation, dramaturgy and collaborative playwriting, scenography, voice, movement and dance, as well as socially-engaged and therapeutic practices,

all of which are at the forefront of international theatre-making. The book collectively offers a thorough and fascinating investigation into new uses of Michael Chekhov's technique, providing practical strategies and principles alongside theoretical discussion.
