The sprays are examined for contamination potential (i.e., outgassing and nonvolatile residue), corrosiveness on an aluminum mirror surface, and electrostatic effectiveness. In addition, the chemical composition of the antistatic sprays is determined by infrared spectrophotometry, mass spectrometry, and ultraviolet spectrophotometry. The results show that 12 of the 17 antistatic sprays examined have a low contamination potential. Of these sprays, 7 are also noncorrosive to an aluminum surface. And of these, only 2 demonstrate good electrostatic properties with respect to reducing voltage accumulation; these sprays did not show a fast voltage dissipation rate however. The results indicate that antistatic

sprays can be used on a limited basis where contamination potential, corrosiveness, and electrostatic effectiveness is not critical. Each application is different and proper evaluation of the situation is necessary. 'Different minds learn differently' writes Dr Mel Levine, one of the best-known education experts and paediatricians in America today. And that's a problem for many children, because most schools still cling to a one-size-fits-all education philosophy. In A MIND AT A TIME, Dr Levine shows parents and others who care for children how to identify these individual learning patterns. He explains how parents and teachers can encourage a child's strengths and bypass the child's weaknesses. This type of teaching produces satisfaction and achievement instead of frustration and failure. Different brains are differently wired with eight fundamental systems of learning that

---

draw on a variety of neurodevelopmental capacities. Certain students are strong in certain areas and some are strong in others, but no one is equally capable in all eight. Learning begins at school, but it doesn't end there. Frustrating a child's desire to learn will have lifelong repercussions. We must begin to pay more attention to individual learning styles, to individual minds, urges Dr Levine, so that we can maximise our children's learning potential. A MIND AT A TIME shows us how.

Would a proper adult have decades-old underwear in active service? Mike Gayle is nowhere near being a proper adult - even though his tenth wedding anniversary is looming; his second child is due any moment; and in less than twenty-four hours he is going to be officially closer to forty than he is to thirty. But unlike previous To-Do lists, he promises himself that this one will actually get DONE. And along the way, Mike will learn stuff about life (323), love (999), friends (1004) and family (9) and finally work out what it means to be a grown up (846).

The culmination of an innovative practice research project, Michael Chekhov in the Twenty-First Century: New Pathways draws on historical writings and archival materials to investigate how Chekhov's technique can be used across the disciplines of contemporary performance and applied practice. In contrast to the narrow, actor training-only analysis that dominated 20th-century explorations of the technique, authors Cass Fleming and Tom Cornford, along with contributors Caoimhe McAvinchey, Roanna Mitchell, Daron Oram and Sinéad Rushe, focus on devising, directing and collective creation, dramaturgy and collaborative playwriting, scenography, voice, movement and dance, as well as socially-engaged and therapeutic practices, all of which are at the forefront of international theatre-making. The book collectively offers a thorough and fascinating investigation into new uses of Michael Chekhov's technique, providing practical strategies and principles alongside theoretical discussion.
