Best Bike Inner Tubes Buying Guide. Jack Rogan 30 April 2020. 375 4 minutes read. Your bike's inner tube is an inflatable tube made of synthetic rubber which sits inside the tyre and makes it airtight. Most bike wheels - road, city bike, MTB etc. - still use inner tubes to hold the air, although in recent years car-style 'tubeless' tyres have grown in popularity.

The Cyclist guide to buying the right inner tube; The Cyclist guide to

buying the right inner tube. Joseph Delves. 24 Jul 2018. How to find the

right size inner tube for your bike. facebook;

Our Guide to Buying: Inner Tubes What are Cycling Inner Tubes? In

a nutshell. Inner tubes are normally made of butyl rubber or Latex,

they sit inside your tyre and are inflated with a pump, they

sometimes puncture but are easily replaced. Inner tubes are simple

but essential – unless you're riding with tubeless tyres, you'll always

need an inner tube. Carrying spares is always a good idea, even if

you are running tubeless, as a large slash or hole will not seal easily.
