The book reflects on how intelligent urban regeneration can be an extraordinary driver of sustainable social and economic progress. It provides a friendly, evergreen and flexible thinking methodology that can serve as a reference guide to address a wide range of initiatives creating the conditions to thrive in an increasingly selective,

rapidly changing and unpredictable market context. The book throws light on the importance of adopting an open approach based on collaboration, crafting strong visions, developing appealing value propositions, embracing a modern leadership style and setting-up highly effective multi-disciplinary team for the execution. It illustrates how standard approaches should be re-designed, business models innovated and processes re-engineered to guarantee better alignment between supply and demand of real estate as markets shift and new differentiators emerge among competitors. The book makes clear that creating a vibrant urban ecosystem requires a gradual shift of focus from built-environment investment to socio-economic output. It targets a wide audience of private and public sector professionals active in urban regeneration and real estate development.

Susanne Hgel studies innovation in service industries from the industrial organization and behavioral theory perspectives, therefore chooses the real estate industry as object of study. The author examines the existing research on firm innovativeness, proposes a more advanced concept, and empirically validates a new measure in a service industry context. Thereby, the innovation status quo of the real estate industry is studied. In addition, the book addresses the impact of slack resources on the organizational members' innovative work behavior. Overall, important insights about the service industries' innovation pattern and organizational behavior are revealed. The book acknowledges the increasing role of innovation due to the altering business environment in the 21st century, such as shifts from goods to services, or the globalization of markets. About the Author: Susanne Hgel is an expert in the field of innovation, business model development, and digital transformation in the real estate industry. She wrote her dissertation at the Real Estate Management Institute (REMI) of EBS Business School.

How to Innovate and Execute Leaders already know that innovation calls for a different set of activities, skills, methods, metrics, mind-sets, and leadership approaches. And it is well understood that creating a new business and optimizing an already existing one are two fundamentally different management challenges. The real problem for leaders is doing both, simultaneously. How do you meet the performance requirements of the existing business—one that is still thriving—while dramatically reinventing it? How do you envision a change in your current business model before a crisis forces you to abandon it? Innovation guru Vijay Govindarajan expands the leader's innovation tool kit with a simple and proven method for allocating the organization's energy, time, and resources—in balanced measure—across what he calls “the three boxes”:

- Box 1: The present—Manage the core business at peak profitability
- Box 2: The past—Abandon ideas, practices, and attitudes that could inhibit innovation
- Box 3: The future—Convert breakthrough ideas into new products and businesses

The three-box framework makes leading innovation easier because it gives leaders a simple vocabulary and set of tools for managing and measuring these different sets

of behaviors and activities across all levels of the organization. Supported with rich company examples—GE, Mahindra & Mahindra, Hasbro, IBM, United Rentals, and Tata Consultancy Services—and testimonies of leaders who have successfully used this framework, this book solves once and for all the practical dilemma of how to align an organization on the critical but competing demands of innovation.

This book examines the international growth and diversification of real estate advisory services in the United States, the United Kingdom, Germany and Japan since 1960. The book explains how successful firms develop competitive advantages in the global marketplace. An evaluation of forty prominent firms (ten from each country) provides a comparative reference for a detailed analysis of the growth and internationalization of four major real estate advisory service firms (one from each country). The firms have responded in many ways to changes in international real estate investment, and their fortunes have varied accordingly. The analysis provides factual evidence demonstrating growth strategies that enable a firm to become a successful real estate advisory service in today's global economy.
