• New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world "At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope." —Per Espen Stoknes, Author, What We Think About When We Try Not To Think About Global Warming "There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom." —David Roberts, Vox "This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook." —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Corporate Turnaround John Wiley & Sons

The first ever playbook for B2B salespeople on how to win clients and customers who are already being serviced by your competition, from the author of The Only Sales Guide You'll Ever Need and The Lost Art of Closing. Like it or not, sales is often a zero-sum game: Your win is someone else's loss. Most salespeople work in mature, overcrowded industries, your offerings perceived (often unfairly) as commodities. Growth requires taking market share

from your competitors, while they try to do the same to you. How else can you grow 12 percent a year in an industry that's only growing by 3 percent? It's not easy for any salesperson to execute a competitive displacement--or, in other words, "eat their lunch." You might think this requires a bloodthirsty "whatever it takes" attitude, but that's the opposite of what works. If you act like a Mafia don, you only make yourself difficult to trust and impossible to see as a long-term partner. Instead, this book shows you how to find and maintain a long-term competitive advantage by taking steps like: ranking prospective new clients not by their size or convenience to you, but by who stands to gain the most from your solution. understanding the different priorities for everyone in your prospect's organization, from the CEO to the accountants, and addressing their various concerns. developing a systematic contact plan for all those different stakeholders so you can win over the right people at the organization in the optimal sequence. Your competitors may be tough, but with the strategies you'll discover in this book, you'll soon be eating their lunch.

What's the secret to sales success? If you're like most business leaders, you'd say it's fundamentally about relationships--and you'd be wrong. The best salespeople don't just build relationships with customers. They challenge them. The need to understand what top-performing reps are doing that their average performing colleagues are not drove Matthew Dixon, Brent Adamson, and their colleagues at Corporate Executive Board to investigate the skills, behaviors, knowledge, and attitudes that matter most for high performance. And what they discovered may be the biggest shock to conventional sales wisdom in decades. Based on an exhaustive study of thousands of sales reps across multiple industries and geographies, The Challenger Sale argues that classic relationship building is a losing approach, especially when it comes to selling complex, large-scale business-to-business solutions. The authors' study found that every sales rep in the world falls into one of five distinct profiles, and while all of these types of reps can deliver average sales performance, only one--the Challenger--delivers consistently high performance. Instead of bludgeoning customers with endless facts and features about their company and products, Challengers approach customers with unique insights about how they can save or make money. They tailor their sales message to the customer's specific needs and objectives. Rather than acquiescing to the customer's every demand or objection, they are assertive, pushing back when necessary and taking control of the sale. The things that make Challengers unique are replicable and teachable to the average sales rep. Once you understand how to identify the Challengers in your organization, you can model their approach and embed it throughout your sales force. The authors explain how almost any average-performing rep, once equipped with the right tools, can successfully reframe customers' expectations and deliver a distinctive purchase experience that drives higher levels of customer loyalty and, ultimately, greater growth.

What do winners of major sales do differently than the sellers who almost won, but ultimately came in second place? Mike Schultz and John Doerr, bestselling authors and world-renowned sales experts, set out to find the answer. They studied more than 700 business-to-business purchases made by buyers who represented a total of \$3.1 billion in annual purchasing power. When they compared the winners to the second-place finishers, they found surprising results. Not only do sales winners sell differently, they sell radically differently, than the second-place finishers. In recent years, buyers have increasingly seen products and services as replaceable. You might think this would mean that the sale goes to the lowest bidder. Not true! A new breed of seller—the insight seller—is winning the sale with strong prices and margins even in the face of increasing competition and commoditization. In Insight Selling, Schultz and Doerr share the surprising results of their research on what sales winners do differently, and outline exactly what you need to do to transform yourself and your team into insight sellers. They introduce a simple three-level model based on what buyers say tip the scales in favor of the winners: Level 1 "Connect." Winners connect the dots between customer needs and company solutions, while also connecting with buyers as people. Level 2 "Convince." Winners convince buyers that they can achieve maximum return, that the risks are acceptable, and that the seller is the best choice among all options. Level 3 "Collaborate." Winners collaborate with buyers by bringing new ideas to the table, delivering new ideas and insights, and working with buyers as a team. They also found that much of the popular and current advice given to sellers can damage sales results. Insight Selling is both a strategic and tactical guide that will separate the good advice from the bad, and teach you how to put the three levels of selling to work to inspire buyers, influence their agendas,

and maximize value. If you want to find yourself and your team in the winner's circle more often, this book is a must-read.

Everyone knows that the best way to create customer loyalty is with service so good, so over the top, that it surprises and delights. But what if everyone is wrong? In their acclaimed bestseller *The Challenger Sale*, Matthew Dixon and his colleagues at CEB busted many longstanding myths about sales. Now they've turned their research and analysis to a new vital business subject—customer loyalty—with a new book that turns the conventional wisdom on its head. The idea that companies must delight customers by exceeding service expectations is so entrenched that managers rarely even question it. They devote untold time, energy, and resources to trying to dazzle people and inspire their undying loyalty. Yet CEB's careful research over five years and tens of thousands of respondents proves that the "dazzle factor" is wildly overrated—it simply doesn't predict repeat sales, share of wallet, or positive word-of-mouth. The reality: Loyalty is driven by how well a company delivers on its basic promises and solves day-to-day problems, not on how spectacular its service experience might be. Most customers don't want to be "wowed"; they want an effortless experience. And they are far more likely to punish you for bad service than to reward you for good service. If you put on your customer hat rather than your manager or marketer hat, this makes a lot of sense. What do you really want from your cable company, a free month of HBO when it screws up or a fast, painless restoration of your connection? What about your bank—do you want free cookies and a cheerful smile, even a personal relationship with your teller? Or just a quick in-and-out transaction and an easy way to get a refund when it accidentally overcharges on fees? *The Effortless Experience* takes readers on a fascinating journey deep inside the customer experience to reveal what really makes customers loyal—and disloyal. The authors lay out the four key pillars of a low-effort customer experience, along the way delivering robust data, shocking insights and profiles of companies that are already using the principles revealed by CEB's research, with great results. And they include many tools and templates you can start applying right away to improve service, reduce costs, decrease customer churn, and ultimately generate the elusive loyalty that the "dazzle factor" fails to deliver. The rewards are there for the taking, and the pathway to achieving them is now clearly marked.

True or false? In selling high-value products or services: 'closing' increases your chance of success; it is essential to describe the benefits of your product or service to the customer; objection handling is an important skill; open questions are more effective than closed questions. All false, says this provocative book. Neil Rackham and his team studied more than 35,000 sales calls made by 10,000 sales people in 23 countries over 12 years. Their findings revealed that many of the methods developed for selling low-value goods just don't work for major sales. Rackham went on to introduce his SPIN-Selling method. SPIN describes the whole selling process: Situation questions Problem questions Implication questions Need-payoff questions SPIN-Selling provides you with a set of simple and practical techniques which have been tried in many of today's leading companies with dramatic improvements to their sales performance.
