Ever since the early days of machine learning and data mining, it has been realized that the traditional attribute-value and item-set representations are too limited for many practical applications in domains such as chemistry, biology, network analysis and text mining. This has triggered a lot of research on mining and learning within alternative and more expressive representation formalisms such as computational logic, relational algebra, graphs, trees and sequences. The motivation for using graphs, trees and sequences. Is that they are 1) more expressive than flat representations, and 2) potentially more efficient than multi-relational learning and mining techniques. At the same time, the data structures of graphs, trees and sequences are among the best understood and most widely applied representations within computer science. Thus these

representations offer ideal opportunities for developing interesting contributions in data mining and machine learning that are both theoretically well-founded and widely applicable. The goal of this book is to collect recent outstanding studies on mining and learning within graphs, trees and sequences in studies worldwide.

Althusser and Law is the first
book specifically dedicated to the
place of law in Louis Althusser's
philosophy. The growing importance
of Althusser's philosophy in
contemporary debates on the left
has - for practical and political,
as well theoretical reasons - made
a sustained consideration of his
conception of law more necessary
than ever. As a form of what
Althusser called 'Ideological
State Apparatuses', law is at the
forefront of political struggles:
from the destruction of Labour Law
to the exploitation of Patent Law;
from the privatisation of Public
Law to the ongoing hegemony of
Commercial Law; and from the
discourse on Human Rights to the
practice of judicial courts. Is
Althusser still useful in helping
us to understand these struggles?
Does he have something to teach us
about how law is produced, and how
it is used and misused? This
collection demonstrates that
Althusser's ideas about law are
more important, and more
contemporary, than ever. Indeed,
the contributors to Althusser and
Law argue that Althusser offers a
new and invaluable perspective on
the place of law in contemporary
life.

(STOVL) Aircraft Carrier (S-
CVX)This report documents a
systems engineering and design
capstone project, directed by the
Total Ship Systems Engineering
(TSSE) faculty and undertaken by
students in the TSSE program at
the Naval Postgraduate School and
performed over two academic
quarters. It takes a fresh look at
the basic design and operation of
the modern aircraft carrier,
assuming availability of short
take-off and vertical landing
(STOVL) aircraft, employing gas
turbine ship propulsion and
providing significant capability
to support humanitarian
operations. In the design study
reported here, the authors take a
systems engineering approach to a
totally new carrier design which
may best suit the requirements for
the next generation aircraft
carrier. The central goal was to

provide a ship to meet all of the current mission requirements of the existing Nimitz class carriers but in a platform that is significantly lower in life cycle costs. The outcome is a ship based on a concept called "super-island"; a large island structure that can provides drive-through "pit-stops" for aircraft refueling and rearming as well as other major functions. Other areas of major innovation include: weapons handling, information processing and distribution, engineering layout and manning. The report provides an overview of the major ship systems as well as detailed discussions of selected design areas chosen to illustrate those systems that had the most impact on meeting design goals.

"That's how it is for us servants. No one pays you much heed; mostly you're invisible as furniture. Yet you overhear a conversation here, and add a little gossip there. Then you find something, something you should not have found."
Irrepressible Bidy Leigh, under-cook at forbidding Mawton Hall, only wants to marry her childhood sweetheart and set up her own tavern. But when her elderly master marries young Lady Carinna, Bidy is unwittingly swept up in a

world of scheming, secrets, and lies. Forced to accompany her new mistress to Italy, she documents her adventures and culinary discoveries in an old household book of recipes, *The Cook's Jewel*. Bidy grows intrigued by her fellow travelers, but her secretive and unconventional mistress is the most intriguing of all. In London, Bidy finds herself attracted to her mistress's younger brother. In France, she discovers her mistress's dark secret. At last in Italy, Bidy becomes embroiled in a murderous conspiracy, knowing the secrets she holds could be a key to a better life, or her downfall. Inspired by eighteenth-century household books of recipes and set at the time of the invention of the first restaurants, *An Appetite for Violets* is a literary feast for lovers of historical fiction. Martine Bailey's novel opens a window into the fascinating lives of servants, while also delivering a suspenseful tale of obsession and betrayal.

Each of us deserves to be happy, healthy, and vibrant. Yet, today's stressful lifestyle patterns often

cause us to lose touch with ourselves. During thirteen years of practice, licensed massage practitioner and Reiki master Genie Monte-Pelizzari worked with numerous clients who overlooked signs of trouble until illness forced them to seek help. Genie discovered balance in her own life through a close connection with her Source, God. From this personal revelation she developed a therapy through which others can achieve the same sense of wellbeing. Source Connection Therapy is based on the fact that unhealthy patterns can be unlearned and each of us has the ability to adopt new, positive ways of living and relating to ourselves. Through this balancing and repair process, unhealthy physical, energetic, and spiritual patterns are revealed and can be reversed. Within these pages you'll find simple, yet profound, techniques to balance your body's energetic pathways and achieve full-body healing. Source Connection Therapy is Genie's gift to others: a carefully thought out, meticulously-presented book encouraging others to find their personal Source and attain full healing by using the connection techniques presented in these pages. You deserve to be happy, healthy,

and vibrant. Source Connection Therapy can help you find the perfect balance in life. Let the healing begin.

First translated in English ten years after its original Dutch publication in 1962, this book has inspired practitioners for generations. It's proposal to distinguish the infill from the support - what users can individually decide in a housing process from what users share - has turned out to be feasible in practice. The Natural Relation - the interaction of people with their immediate environment and the central concept of the book - is the result of that distinction. It is essential to the well-being of everyday environment regardless of function or available resources.
