The line began forming after eight o'clock. Sal, short and heavy-set, kept everyone busy. Neat, in a white shirt and sports jacket, with his grey fedora cocked to the side, his crooked grin made you smile. Without warning the heavy door would swing open and the waiters would come outside to join him. They were dressed in pajamas or prison garb, with hats and horns, and were there to warm up the crowd. Some in line expected this, others were shocked. The pink polka dot building should have been a warning. Complete strangers in line became chummy, exchanging stories they had heard; toilet seat covers to serve drinks on, microphones in the ladies room, toilet paper for napkins. Most had brought their friends there to be roasted. The line of people varied in age. They all dressed casually because they'd heard you could get a pie in the face or a squirt in the eye. The club's routines were blue in color, but harmless. If you were lucky you might see a "Balls for the Queen" or a "Singing beer." The price was always right for a good time and Warm Beer and Lousy Food was the place to be.

Pete Jordan, author of the wildly popular *Dishwasher: One Man's Quest to Wash Dishes in All Fifty States*, is back with a memoir that tells the story of his love affair with Amsterdam, the city of bikes, all the while unfolding an unknown history of the city's cycling, from the craze of the 1890s, through the Nazi occupation, to the bike-centric culture adored by the world today. Pete never planned to stay long in Amsterdam, just a semester. But he quickly falls in love with the city and soon his wife, Amy Joy, joins him. Together they explore every inch of their new home on two wheels, their rides a respite from the struggles that come with starting a new life in a new country. Weaving together personal anecdotes and details of the role that cycling has played throughout Dutch history, Pete Jordan's *In the City of Bikes: The Story of the Amsterdam Cyclist* is a poignant and entertaining read.

When Frank and Kevin first met in an empty Arab airport lounge on their way to India in January 1985, it was the beginning of a friendship which would take them together across the length and breadth of the Indian sub-continent, ending up in the foothills of the Himalayas in Nepal. 'Kevin and I in India' is the unexpurgated, often outrageous, diary of their travels - from the hill-stations of the deep south to the Taj Mahal in the north, from the Goan beaches of the west to the sacred Ganges and the Bodhi Tree in the east. Full of anecdotes, observations and travellers' tales, the two Englishmen weave a crazy, erratic path through a variety of adventures and misadventures, in constant battle against officialdom, insects, heat, dust, ticket-queues and mad traffic. Here is the real India - stripped of illusion, but adorned with humour and exuberance. Here is a kaleidoscopic potpourri of fascinating sights, scenes and people, with each day of the journey more exciting, more packed with incident, than the last.

Due to the characteristics of electricity, power markets rank among the most complex markets operated at present. The requirements of an environmentally sustainable, economically efficient, and secure energy supply have resulted in the emergence of

several interrelated markets that have to be carefully engineered in order to ensure efficient market outcomes. This book presents an agent-based simulation model that facilitates electricity market research. Simulation outcomes from this model are validated against price data from German power markets. The results significantly contribute to existing research in agent-based simulation and electricity market modeling, and provide insights into the impact of the market structure and market design on electricity prices. The book addresses researchers, lecturers and students who are interested in applying agent-based simulation to power markets. It provides a thorough discussion of the methodology and helpful details for model implementation.
