When Frank and Kevin first met in an empty Arab airport lounge on their way to India in January 1985, it was the beginning of a friendship which would take them together across the length and breadth of the Indian sub-continent, ending up in the foothills of the Himalayas in Nepal.'Kevin and I in India' is the unexpurgated, often outrageous, diary of their travels - from the hill-stations of the deep south to the Taj Mahal in the north, from the Goan beaches of the west to the sacred Ganges and the Bodhi Tree in the east. Full of anecdotes, observations and travellers' tales, the two Englishmen weave a crazy, erratic path through a variety of adventures and misadventures, in constant battle against officialdom, insects, heat, dust, ticket-queues and mad traffic.Here is the real India - stripped of illusion, but adorned with humour and exuberance. Here is a kaleidoscopic potpourri of fascinating sights, scenes and people, with each day of the journey more exciting, more packed with incident, than the last.

The raising of the _Mary Rose_ in 1982 was a remarkable feat of archaeology and her subsequent

preservation and display at Portsmouth a triumph of technical skill and imagination. She is more than a relic, however. She has a story to tell, and her sinking in the Solent in 1545, when under attack by the French, and the reasons for it, have intrigued historians for generations. With the benefit of access to her remains, archaeologists have been able to slowly unravel the mystery of her foundering on a calm summer's day in July 1545. This new book by one of the country's leading experts on the _Mary Rose_ contains much that is published for the first time. It has the first full account of the battle in which Henry VIII's warship was sunk, and tells the stories of the English and French admirals. It examines the design and construction of the ship and how she was used, and develops themes begun when he was earlier commissioned by the Mary Rose Trust to write the multi-volume history of the ship. He shows for the first time conclusively that the French fleet arrived unexpectedly to seize the Isle of Wight and Portsmouth a day later than was once believed, that the many bodies found in the wreck reflect her at action stations, and that the ship had had an extra deck added and was therefore more unstable than was previously thought. Finally, the author makes it clear who was responsible for the loss of the _Mary Rose_, after describing what happened onboard, deck by deck, in her last moments afloat. The fascinating revelation will intrigue the general reader as well as the historian and archaeologist and the book is set to become the last word on the career of this most famous of ships. Due to the characteristics of electricity, power markets rank among the most complex markets operated at present. The requirements of an environmentally sustainable, economically efficient, and secure energy supply have resulted in the emergence of several interrelated markets that have to be carefully engineered in order to ensure efficient market outcomes. This book presents an agent-based simulation model that facilitates electricity market research. Simulation outcomes from this model are validated against price data from German power markets. The results significantly contribute to existing research in agent-based simulation and electricity market modeling, and provide insights into the impact of the market structure and market design on electricity prices. The book addresses researchers, lecturers and students who are interested in applying agent-based simulation to power markets. It provides a thorough discussion of the methodology and helpful details for model implementation.
