Defending Human Rights and Democracy in the Era of Globalization Oxford University Press

The book explores the definition and nature of guerrilla tactics in international commercial arbitration. It analyses various such tactics deployed (pre-Covid and during Covid times) and portrays them in a way that enables one to visualise how, and possibly why, they might be deployed. Attempts to codify ethical standards and rules regulating the behaviour of legal representatives in international arbitration are examined. The book covers a range of culture clashes, addresses several elephants in the room, and looks at factors inherent in the arbitral process that create opportunities and increase temptations to misbehave. It considers the remedies and sanctions available in international arbitration and compares them to those available to the courts

in civil litigation. In addition to recommendations for future research, the book offers solutions to curb the problem in line with party autonomy and with a critical analysis. “ This manuscript is an essential solutions-based text that not only addresses a comprehensive range of modern-day guerrilla tactics in international commercial arbitration but also offers thoughtful methods to deal with the shenanigans that parties may bring to the arbitral process. ” - Chiann Bao, Independent Arbitrator, Arbitration Chambers and Vice President of the International Chamber of Commerce, Court of Arbitration “ Dr. Ahuja ’ s book is a thoughtful and highly practical contribution to the study of procedures in international commercial arbitration. It is replete with scholarly analysis, careful treatment of authority, pragmatic insights and policy discussions. Any practitioner or student of international arbitration would benefit from this volume. ” - Gary Born, Author, International Commercial Arbitration (3d ed. 2021) “ A highly readable and informative book which identifies and analyses the numerous guerrilla tactics parties may attempt to deploy in international commercial arbitration, the factors which may encourage such behaviour, and practical mechanisms to keep the proceedings on track.

Both erudite and practical, this book is a must-read for parties, counsel and arbitrators alike. ” - Prof. Benjamin Hughes, Independent Arbitrator, The Arbitration Chambers

“ Guerrilla tactics are a pertinent problem in arbitration. Dr. Ahuja ’ s well written book not only describes the various tactics in a succinct way but provides extremely useful guidance on how to tackle them. It will be a primary source of reference for every practitioner faced with such tactics. ” - Prof. Dr. Stefan Kr ö ll, Chairman of the Board of Directors of the German Arbitration Institute (DIS)

“ Taming the Guerrilla in International Commercial Arbitration offers a refreshingly candid and balanced discussion of ‘ sharp practices ’ in international arbitration. The book collects a wealth of information on guerrilla tactics previously only available in separate survey reports, articles, and guidelines on the topic. It additionally includes a chapter addressing tactics deployed in virtual or remote arbitrations due to the Covid-19 pandemic. The comprehensive research and analysis presented in this book make it a valuable resource to counsel, parties, arbitrators, academics, and those who deliver practical arbitration training. A must-read for those who want to better understand the practices that may lead some to disfavor

arbitration and ways the arbitration community can respond to guerrilla tactics to improve the arbitration process for all participants. ” - Dana MacGrath, Independent Arbitrator, MacGrath Arbitration

“ From an unreasoned fiat of a wise man who left both sides equally unhappy but resolved the disputes effectively, arbitration has evolved into a full-scale trial before a party chosen tribunal. Its informality and expedition puts in peril the fundamental right of the recalcitrant to delay proceedings. Dr. Ahuja has assiduously articulated the measures, aptly christened Guerrilla Tactics, used to disrupt and derail arbitrations. An indispensable read for the practitioner and an insightful treatise for the policy maker. ” - Harish Salve SA QC, Blackstone Chambers

“ This book shines a spotlight on arbitration ’ s dark arts - guerrilla tactics. Dr Ahuja illuminates this shadowy world with excellent (and much needed) scholarship that is practice-based and useful for all stakeholders in arbitration. His examination of the root causes of this problem, recommendations on how to control it, comparisons with litigation practice and suggestions for future research marvellously combine to make this a work that is required to be consulted by all serious counsel, arbitrators, institutions

and academics in the field of arbitration. ” - Romesh Weeramantry, Head, International Dispute Resolution, Centre for International Law, National University of Singapore

Using fears of Catholicism as a mechanism through which to explore the contours of Anglo-American understandings of freedom, Anti-Catholicism in America, 1620 – 1860 reveals the ironic role that anti-Catholicism played in defining and sustaining some of the core values of American identity, values that continue to animate our religious and political discussions today. Farrelly explains how that bias helped to shape colonial and antebellum cultural understandings of God, the individual, salvation, society, government, law, national identity, and freedom. In so doing, Anti-Catholicism in America, 1620 – 1860 provides contemporary observers with a framework for understanding what is at stake in the debate over the place of Muslims and other non-Christian groups in American society.

An International and Comparative Law Perspective Bloomsbury Publishing

There is persuasive evidence suggesting we are on the brink of human-induced ecological disaster that could change life on Earth as we know it. There is also a general consensus among scientists about the pace and extent of global ecological decay, including a realisation that humans are central to causing the global socio-ecological crisis. This new epoch has been called the Anthropocene. Considering the many benefits that constitutional environmental protection holds out in domestic legal orders, it is likely that a constitutionalised form of global environmental law and governance would be better able to counter the myriad exigencies of the Anthropocene. This book seeks to answer this central question: from the perspective of the Anthropocene, what is environmental constitutionalism and how could it be extrapolated to formulate a

global framework? In answering this question, this book offers the first systematic conceptual framework for global environmental constitutionalism in the epoch of the Anthropocene.

A teacher is a person who not

only teaches but also guides

his/her student in building a

successful career. The future of a nation lies upon the level of knowledge the people in the country are having. Thus, the responsibility of a teacher goes far beyond what we think of it at an individual level. We have seen people are interested in making their career in many other professions but teaching as a profession is not the first choice in most cases.

Nevertheless, teaching is one of the most interesting professions as it involves a continuous learning exercise and at the same time making others learned by delivering the knowledge one is having. The teachers assess their students but at first, they also get assessed under UGC NET conducted by the National Testing Agency. The National Eligibility Test (NET), also known as UGC NET or NTA-UGC-NET, is the test for determining the eligibility for the post of Assistant Professor and/or Junior Research Fellowship (JRF) award in Indian universities and colleges. UGC NET is considered as one of the toughest exams in India, with success ratio of merely 6%. Previously, the passing ratio was around 3% - 4%. Assistant Professors in private colleges may or may not be NET qualified but NET qualification is mandatory for universities & government colleges.

Rules Governing the Courts of Ohio
Bloomsbury Publishing
The relevance and importance

of the rule of law to the international legal order cannot be doubted and was recently reaffirmed by the Declaration of the High-level Meeting of the General Assembly on the Rule of Law at the National and International Level's solemn commitment to it on behalf of states and international organizations. In this edited collection, leading scholars and practitioners from the fields of global governance, resources, investment and trade examine how the commitment to the rule of law manifests itself in the respective fields. The book looks at cutting-edge issues within each field and examines the questions arising from the interplay between them. With a clear three-part structure, it explores each area in detail and addresses contemporary challenges while trying to assure a commitment to the rule of law. The contributions also consider how the rule of law has been or should be reconceptualised. Taking a multi-disciplinary approach, the book will appeal to international lawyers from across the spectrum, including practitioners in the field of international investment and trade law.

Do anthropogenic greenhouse gas emissions affect human rights? Should fundamental rights constrain

climate policies? Scientific evidence demonstrates that anthropogenic greenhouse gas emissions contribute to increasing atmospheric temperatures, soon passing the compromising threshold of 2 ° C. Consequences such as Typhoon Haiyan prove that climate alteration has the potential to significantly impair basic human needs. Although the United Nations Framework Convention on Climate Change and human rights regulatory regimes have so far proceeded separately, awareness is arising about their reciprocal implications. Based on tripartite fundamental obligations, this volume explores the relationship between climate change and interdependent human rights, through the lens of an international and comparative perspective. Along the lines of the metaphor of the ' wall ', the research ultimately investigates the possibility of overcoming the divide between universal rights and climate change, and underlying barriers. This book aims to be a useful resource not only for practitioners, policymakers, academics, and students in international, comparative, environmental law and

politics and human rights, but also for the wider public.

the benefits and challenges of

arbitration in Africa. Topical

issues of interest for practitioners,

academics and students of

arbitration - in the region and

internationally - include:

- Due process issues in constituting the arbitral tribunal and challenging its members
- Interim measures issued by arbitral tribunals and domestic courts
- Burden, standard and types of proof in the corruption defence
- What to do (and what to avoid doing) to prepare a persuasive case
- Do post-award remedies ensure conformity of the arbitral process with the rule of law?
- Do rules and guidelines properly regulate the conduct of arbitration?
- The interface between domestic courts and arbitral tribunals
- What are appropriate remedies for findings of illegality in investment arbitration?
- The effect of foreign national court judgments relating to the arbitral award
- What does the future hold for investment arbitration in Africa and beyond?

Challenges the established

corrections paradigm and

argues for replacing mass

incarceration with a viable

and more humane

alternative. The practice of

mass incarceration has come

under increasing criticism by

criminologists and

corrections experts who,

nevertheless, find themselves

at a loss when it comes to

offering credible, practical,

and humane alternatives. In

Civilization and Barbarism,

Graeme R. Newman argues

this impasse has arisen from

a refusal to confront the

original essence of

punishment, namely, that in

some sense it must be

painful. He begins with an

exposition of the traditional

philosophical justifications

for punishment and then

provides a history of criminal

punishment. He shows how,

over time, the West

abandoned short-term

corporal punishment in favor

of longer-term incarceration,

justifying a massive

bureaucratic prison complex

as scientific and civilized.

Newman compels the reader

to confront the biases

embedded in this model and

the impossibility of

defending prisons as a

civilized form of punishment.

A groundbreaking work that challenges the received

wisdom of “ corrections, ”

Civilization and Barbarism

asks readers to reconsider

moderate corporal

punishment as an alternative

to prison and, for the most

serious offenders, forms of

incapacitation without

prison. The book also

features two helpful

appendixes: a list of debating

points, with common

criticisms and their rebuttals,

and a chronology of civilized

punishments. Graeme R.

In July 2011, South Sudan

was granted independence

and became the world's

newest country. Yet just two-

and-a-half years after this

momentous decision, the

country was in the grips of

renewed civil war and

political strife. Hilde F. Johnson served as Special Representative of the Secretary-General and Head of the United Nations Mission in the Republic of South Sudan from July 2011 until July 2014 and, as such, she was witness to the many challenges which the country faced as it struggled to adjust to its new autonomous state. In this book, she provides an unparalleled insider's account of South Sudan's descent from the ecstatic celebrations of July 2011 to the outbreak of the disastrous conflict in December 2013 and the early, bloody phase of the fighting. Johnson's frequent personal and private contacts at the highest levels of government, accompanied by her deep knowledge of the country and its history, make this a unique eyewitness account of the turbulent first three years of the world's newest – and yet most fragile – country.

Some films are remembered long after they are released; others are soon forgotten, but do they deserve oblivion? Are factors other than quality involved? This book exhumes some of the films released in Britain over the last seventy years from Daybreak (1948) to

16 Years of Alcohol (2003), and considers the reasons for their neglect. As well as exploring the contributions of those involved in making the films, the book examines such issues as marketing and the response of critics and audiences. Films are grouped loosely into categories such as “ B ” films and television films. Some works were little seen when they were first released and have stayed that way; others were popular in their day, but have slipped into obscurity. In some cases, social change has overtaken them, making the attitudes or subjects they depict seem dated. Even being released as a DVD does not guarantee that a title will be rehabilitated. In addition, how significant is the American market? This book should appeal to lovers of British film, as well as to film studies students and everybody curious about the vagaries of success and failure in the arts.
