At the time of Pearl Harbor, the United States Army still had ten cavalry regiments.The 26th (Filipino Scouts) fought on horseback in the Philippines, while the rest were fought as infantry. Despite this, the cavalry units maintained their own unique traditions, and identity as they saw action in the Pacific and China-Burma-India theatre. This book covers all of the US cavalry units to see action during World War II. It includes the little-covered Texan National Guard regiments, who fought beside ex-Merrill's Marauders as a deep penetration unit. It also contains color-plates of the uniforms of the US Army's last mounted cavalry as well as tropical combat dress worn by the dismounted units.

The Airborne units that fought against the Viet Cong in Vietnam were a select brotherhood. Their ability to respond and move rapidly by air transport or helicopter, combined with their flexibility in ever-changing tactical situations, saved the day in many brutal fights in the jungles, swamps, plains and mountains of Vietnam. This book looks at the history, organization and uniforms of the airborne units in Vietnam. The troops covered include paratroopers, reconnaissance troops and special forces soldiers from the US, Australia, New Zealand, Thailand and the Republic of Vietnam. Contemporary photographs and full page colour artwork support the text.

This is the first instructional book of its kind, taking a strikingly new and refreshing approach to learning guitar, carefully designed to guarantee efficient practice with rewarding results. Whether your playing falls under one of the more traditional styles, or whether you're a composer and arranger or exploring new musical regions and establishing your own musical direction or personal fusion of musical ideas and influences, The Praxis System has what you need. The name of the system ("Praxis" comes from the Greek word meaning "practice" and "to do") accurately reflects its general orientation. Play it first, getting sound and satisfaction out of the guitar immediately, and musical understanding will naturally follow. Praxis lets you choose the precise subject you want and immediately provides relevant musical examples. And these examples are presented in such a way that the principle behind the example is always clear, thus allowing you to apply it directly to your music. Traditional guitar books try to teach you to play someone else's music, while Praxis takes you directly to being able to play anything that you want---someone else's music, your own music, and everything in between. Guitar instruction books are traditionally written in a progressive fashion; Book 1 first, then Book 2, etc. However, the selection and sequencing of material is usually determined by the book rather than the reader, and the familiar result is that---while the book progresses, the student doesn't. Again, Praxis reverses this. You don't have to start with Book 1, there is no Book 1! You go where your interests lie. Just begin work on any one subject in any volume that attracts you. Because Praxis is a modular system, it can be reassembled into many different combinations. These different combinations of units can answer both varying curricular needs as well as individual interests. Titles: Style & Craft: Inventory of the Basic Moves * Inventory of the Basic Mo

What comes after neoliberalism? In these times of health emergency, economic collapse, populist anger and ecological threat, societies are forced to turn inward in search of protection. Neoliberalism, the ideology that presided over decades of market globalisation, is on trial, while state intervention is making a spectacular comeback amid lockdowns, mass vaccination programmes, deficit spending and climate planning. This is the Great Recoil, the era when the neo-statist endopolitics of national sovereignty, economic protection and democratic control overrides the neoliberal exopolitics of free markets, labour flexibility and business opportunity. Looking back to the role of the state in Plato, Machiavelli, Hobbes, Hegel, Gramsci and Polanyi, and exploring the discourses, electoral programs and class blocs of the nationalist right and socialist left, Paolo Gerbaudo fleshes out the contours of the different statisms and populisms that inform contemporary politics. The central issue in dispute is what mission the post-pandemic state should pursue: whether it should protect native workers from immigration and the rich against redistributive demands, as proposed by the right ’ s authoritarian protectionism; or reassert social security and popular sovereignty against the rapacity of financial and tech elites, as advocated by the left ’ s social protectivism. Only by addressing the widespread sense of exposure and vulnerability may socialists turn the present phase of involution into an opportunity for social transformation.

Photogrammetry is widely accepted as one of the best surveying methods to acquire tridimensional data without direct contact with the object, but its high operational costs in equipment and personnel somewhat limit its application in mapping. However, with the development of digital photogrammetry in the 1990's, it was possible to introduce automated processes and reduce the personnel costs. In the following years, the cost of computer hardware, digital cameras and positioning sensors has been lowering, making photogrammetry more accessible to other engineering fields, such as architecture, archeology and health fields. This book shows the results of the work of researchers from different professional backgrounds, which evaluate the uses of photogrammetry, including issues of the data, processing, as well as the solutions developed for some surveying types that can be extended to many applications.

The parachute infantry regiments were among the most highly decorated US Army units of World War II, and between them they saw action right across the world. The elite nature of these units led to them being committed to action not only in the way that had been intended; their quality tempted commanders to keep them in the line longer than their light armament justified, and they were tested to the limit. This engaging study traces the story of each of the 17 regiments, from their creation and training in the USA, through their deployments overseas, to their combat jumps and all their battles. The book is illustrated with wartime photographs, many previously unpublished, and eight full-colour plates detailing the specifics of their uniforms, insignia, and equipment practices, which often differed from unit to unit.
World War II US Army Combat Equipments Benjamin Cummings
In 2010, U.S. Special Operations Forces (SOF) in Afghanistan began a new and innovative program to fight the Taliban insurgency using the movement's structure and strategy against it. The Village Stability Operations/ Afghan Local Police initiative consisted of U.S. Army Special Forces and U.S. Navy SEAL Teams embedding in key villages and districts throughout rural Afghanistan where they partnered with villagers to fight the Taliban insurgency holistically. Instead of using a top-down approach where security was something often done to a village SOF inverted the strategy by using a bottom-up initiative that leveraged the population against the Taliban so that security was something that was done with the community. The Village Stability Operations program partnered with village elders to resist and defeat the Taliban and, as security improved, empowered communities by engaging in local governance efforts and small-scale development projects. By enlisting Afghans in their own defense, organizing villagers, and addressing their grievances with the Afghan Government, SOF was able to defeat the Taliban's military as well as its political arm. Rooted as much in the traditions of U.S. Army Special Forces as much as an outgrowth of the lessons learned in the broader SOF community from its years of counterinsurgency work in Iraq and Afghanistan, this new method of war fundamentally changed the terms of the conflict with the Taliban all across Afghanistan. However, little is known about the Village Stability Operations initiative outside of the Special Operations community even though it had a profound effect on the course of the war — until now. In this gripping, first-hand account of how the Village Stability Operations program functioned in practice, Daniel R. Green provides a long-term perspective of how Special Operations Forces stabilized the southern Afghan province of Uruzgan. The province was the site of the southern Pashtun uprising against the Taliban in 2001 led by Hamid Karzai, the future President of Afghanistan, who partnered with U.S. Army Special Forces to launch an unconventional war against the Islamist movement. The Village War provides a comprehensive overview of how SOF adapted to the unique demands of the local insurgency and is a rare, inside look into how Special Operations confronted the Taliban by fighting a "better war" and in so doing fundamentally changed the course

of the war in Afghanistan.

This book reveals the evolving US, Viet Cong and NVA tactics at battalion level and below throughout the Vietnam War. Beginning with a description of the terrain, climate and the unique nature of operations in this theatre of war, the author, a Vietnam veteran himself, goes on to explain how unit organisation was broken down by combatant forces and the impact this had on the kind of tactics they employed. In particular, the author highlights how units were organised in reality on the battlefield as opposed to their theoretical tables of organisation. US tactics included the standard US tactical doctrine as prescribed by several field manuals and in which leaders and troops were rigourously trained. But it also reveals how many American units developed innovative small unit tactics specifically tailored to the terrain and enemy practices. In contrast, this book also reveals the tactics employed by Viet Cong and NVA units including their own Offensive Operations, Reconnaissance, Movement Formations and Security, and Ambushes.

The three pieces in Idaho Gems capture the spirit of this northwestern state. "White Pine Waltz" begins with a delicate melody in 3/4 meter inspired by the majestic western white pine, Idaho's state tree. The piece builds to a climactic middle section featuring flowing arpeggios in both hands before subsiding into a restatement of the theme. The second piece, "Craters of the Moon," paints a picture of the volcanic landscapes found in the national preserve of the same name. A repetitive chromatic figure in the lower register is combined with dissonant intervals in the upper register to capture the eerie otherworldliness of the park's lava fields. In "Snake River Rag," chromatic passages wind their way across the keyboard, inspired by the Snake River's twisted path through the Idaho countryside. "Western Gem" provides a dynamic conclusion to the suite. The piece makes full use of the keyboard with block chords and scalar passages in both hands, while a modulation in the middle section provides an additional musical challenge.

Excerpt from Trial of George Joseph Smith The trial of George Joseph Smith is without a parallel in the history of crime in any age or country. The singularly revolting means by which the murderer accomplished the destruction of his victims, the spectacle of Justice, in all its pomp and circumstance, solemnly deciding whether one transparently worthless man should live or die at a time when the war claimed a daily holocaust from among the youngest and bravest of the manhood of Britain, the novelty of the questions of forensic medicine, the complexity of the evidence given by some 120 witnesses, twice as many as were needed to establish the guilt of Palmer - all combine to make this a notable trial indeed. A shrewd American lawyer, after a few weeks spent in observing our Courts, said, "British justice! Its dear, but its prime!" And certainly we may, I think, regard with complacency this patient and costly investigation, pursued day after day at such a period. I have to thank numerous people for their assistance in preparing this volume; firstly, the Right Honourable Lord Justice Scrutton, for the loan of his photograph and for the favour of his views on the medico-legal issues; Sir Archibald Bodkin, for the loan of his photograph; Sir Edward Marshall Hall, for the loan of his copy of the shorthand notes and for some autograph memoranda by the murderer; Mr. Montague Shearman, for like benefits, and the loan of much correspondence not actually put in as exhibits. Dr. Bernard Spilsbury has most kindly revised all the medical evidence, and has assisted me as to certain gynecological and pathological matters, respecting the illnesses and deaths of the "brides." Mr. Neil has placed all the Scotland Yard material at my disposal, and Detective Inspector Page has very kindly lent me his photographs bearing on the case. Detective Inspector Grose has also rendered me assistance in presenting the manner in which the police worked up the case. The clerk attached to room 93, C. I. D., has also laid me under obligations by visiting me with dockets and documents from the "Yard." If one has any regrets at publishing so infamous a story of crime, the main one is that the ease with which murder may be thus accomplished may lead others to emulate Smith's examples. Little has been published on US armored infantry units and tactics over the years. However, their contribution to the war effort was hugely important. There were a total of 57 armored infantry battalions and two regiments that served throughout the war and in all theaters. Equipped with halftracks, they fought as part of combined arms teams and combat commands alongside tanks, tank destroyers and artillery battalions. Significantly, they were not simply standard infantry battalions provided with halftracks. Their company and platoon organization was very different from the standard infantry unit and these highly mobile, heavily armed battalions fought in an entirely different manner. Using period training manuals and combat reports this book provides an exclusive look at the unique tactics developed by US armored infantry units including movement formations and battle drills.
