Derived from the renowned multi-volume **International Encyclopaedia of Laws**, this analysis of media law in Malaysia surveys the massively altered and enlarged legal landscape traditionally encompassed in laws pertaining to freedom of expression and regulation of communications. Everywhere, a shift from mass media to mass self-communication has put enormous pressure on traditional law models. An introduction describing the main actors and salient aspects of media markets is followed by in-depth analyses of print media, radio and television broadcasting, the Internet, commercial communications, political advertising, concentration in media markets, and media regulation. Among the topics that arise for discussion are privacy, cultural policy, protection of minors, competition policy, access to digital gateways, protection of journalists' sources, standardization and interoperability, and liability of

intermediaries. Relevant case law is considered throughout, as are various ethical codes. A clear, comprehensive overview of media legislation, case law, and doctrine, presented from the practitioner's point of view, this book is a valuable time-saving resource for all concerned with media and communication freedom. Lawyers representing parties with interests in Malaysia will welcome this very useful guide, and academics and researchers will appreciate its value in the study of comparative media law.

This inaugural Democracy Index for Botswana is intended to set a benchmark for democracy to be measured against. The tool, developed and honed by Idasa over many years, assesses the depth of democracy in a country through five focus areas: participation, elections, accountability, political rights, and human dignity. The research relies on expert analysis to answer a set of questions that interrogate how closely, in practice, democracy meets the broad ideal of self-representative government. More specifically, to what extent can citizens control elected officials and government appointees who make decisions about public affairs? And how equal are citizens to one another in this accountability process? The purpose of the scores is to assist citizens in making their own judgements, based on the information made available, to stimulate national debate and to provide democracy promoters with a tool for identifying issues and needs that can be addressed by education, advocacy, training, institution building and policy revision. Idasa's Democracy Index - initially developed for South Africa - is being expanded into Southern Africa in an effort to broaden the capacity of individuals and organisations monitoring and supporting democratic governance efforts in the region.

First published in 1997, this edited volume emerged in response to Zambia's recent reinstatement of multiparty democracy and its ensuing economic, social policy and public administrative reform. Following the establishment of the single party state under the United National Independence Party in 1972, a severe decline in the price of copper (Zambia's principle export) resulted in high national debt and increasing riots. This volume situates itself in response to the transition from the UNIP to the Movement for Multiparty Democracy (MMD), seeing it as a verdict delivered by the people. Its authors aim to explore the causes of this verdict through areas such as financial innovation, land policy, the health industry and universities. They thoroughly examine the attempts and potential pitfalls of the reform programme as well as its impact on Zambian society. The general conclusion reached by the contributors to this volume is that while the reform programme is a necessary condition for economic rebirth its details require careful consideration in order to ensure it has the desired socio-economic impact on the people of Zambia. This should also serve as an important example to other countries embarking on similar programmes of reform.

Project management is at a crossroads: There is a pressing need to rethink the approaches used in initiating, managing and governing projects, programmes and change initiatives. The aim of this book is to progress the dialogue around project practice by shifting the focus from instrumental methods and prescriptive techniques towards a context-sensitive consideration of people, strategy and change. Projects are initiated to deliver agreed outputs that can be translated into meaningful outcomes capable of satisfying the wishes and expectations for improvement and development. Yet, people, strategy and change, which are largely ignored by the conventional bodies of knowledge, are clearly central to the sustainable and enduring success of projects, efforts and initiatives. The volume brings together some of the best writing by leading authorities on key topics including trust, ethics, people, psychology, requirements, project performance, audits, uncertainty, anti-fragility, strategic initiatives, governance, change management and commercial management. The collection offers an invaluable new resource for informed managers looking to engage with the latest thinking and research.

This book examines how privatization has transformed cities, particularly through the role of Business Improvement Districts (BIDs) in the revitalization of America's downtown. These public-private partnerships between property owners and municipal government have developed retail strips across the United States into lifestyle and commercial hubs. BIDs are non-profit community organizations with the public power to tax and spend on services in their districts, but they are unelected bodies often operating in the shadows of local government. They work as agents of economic development, but are they democratic? What can we learn from BIDs about the accountability of public-private partnerships, and how they impact our lives as citizens? Unger explores these questions of local democracy and urban political economy in this age of rampant privatization and the reinvention of neighborhoods. The development of generic skills (often referred to as 'soft skills') in accounting education has been a focus of discussion and debate for several decades. During this time employers and professional bodies have urged accounting educators to consider and develop curricula which provide for the development and assessment of these skills. In addition, there has been criticism of the quality of accounting graduates and their ability to operate effectively in a global economy. Embedding generic skills in the accounting curriculum has been acknowledged as an appropriate means of addressing the need to provide 'knowledge professionals' to meet the needs of a global business environment. Personal Transferable Skills in Accounting Education illustrates how generic skills are being embedded and evaluated in the accounting curriculum by academics from a range of perspectives. Each chapter provides an account of how the challenge of incorporating generic skills in the accounting curriculum within particular educational environments has been addressed. The challenges involved in generic skills development in higher education have not been limited to the accounting discipline. This book provides examples which potentially inform a wide range of discipline areas. Academics will benefit from reading the experiences of incorporating generic skills in the accounting curriculum from across the globe. This book was originally published as a themed issue of Accounting Education: an international journal.

Over the last decade as the importance of vocational qualifications has been firmly established, the system has become increasingly complex and hard to grasp. Now in its sixth edition, this popular and accessible reference book provides up-to-date information on over 3500 vocational qualifications in the UK. Divided into five parts, the first clarifies the role of the accrediting and major awarding bodies and explains the main types of vocational qualifications available. A directory then lists over 3500 vocational qualifications, classified by professional and career area, giving details of type of qualification,

title, level, awarding body and, where possible, the course code and content. The third section comprises a glossary of acronyms used, together with a comprehensive list of awarding bodies, industry lead bodies, professional institutes and associations, with their contact details. Section four is a directory of colleges offering vocational qualifications in the UK, arranged alphabetically by area. Finally, section five is an index of all qualifications, listed alphabetically by title.

Globalization, Education and Social Justice, which is the tenth volume in the 12-volume book series *Globalisation, Comparative Education and Policy Research*, presents up-to-date scholarly research on major discourses concerning global trends in education, social justice and policy research. It provides an easily accessible, practical yet scholarly source of information about the international concern in the field of social justice, globalisation, and policy research. Above all, the book offers the latest findings to the critical issues in education and social justice globally. It is a sourcebook of ideas for researchers, practitioners and policy makers in education, globalisation and social justice education reforms around the world. It offers a timely overview of current issues in social justice affecting education policy research in the global culture. It provides directions in education, and policy research, relevant to transformational educational reforms in the 21st century. The book critically examines the overall interplay between globalisation, education reforms, and social justice. It draws upon recent studies in the areas of globalisation, social justice education reforms and the role of the State. It explores conceptual frameworks and methodological approaches applicable in the research covering the State, globalisation, equity, education, and social justice. It demonstrates the neo-liberal ideological imperatives of education and policy reforms, and illustrates the way the relationship between the State and education policy affects current models and trends in education reforms for social justice and schooling globally. Various book chapters critique the dominant discourses and debates pertaining to the politics of social justice and education globally and the newly constructed and re-invented models of neo-liberal ideology in education and policy reforms. Using a number of diverse paradigms in comparative education research, ranging from critical theory to post-structuralist discourses, the authors, by focusing on globalisation, social justice and democracy, attempt to examine critically both the reasons and outcomes of education reforms and policy change for social justice. The volume offers a more informed critique on the Western-driven models of education reforms and implications for social justice. The book also draws upon recent studies in the areas of equity, cultural capital and dominant ideologies in education. The general intention is to make *Globalization, Education and Social Justice* available to a broad spectrum of users among policy-makers, academics, graduate students, education policy researchers, administrators, and practitioners in the education and related professions.
