A practical guide for robust shar?'ah governance of the Islamic banking industry Debate in the market on the extent of shar?'ah compliance of Islamic banks, their products, and activities has piqued stakeholders' interest. In Foundations of Shar?'ah Governance of Islamic Banks, Karim Ginena and Azhar Hamid explore the depths of shar?'ah governance to unravel its mysterious dimensions, and equip academics and practitioners with a solid understanding of the subject, which has become a serious challenge and thus deserves dedicated attention. The authors make a strong case for the need to contain the shar?'ah risk that Islamic banks experience, and present a compelling argument for how this should be done. Ginena and Hamid propose a robust shar?'ah governance model that comprehensively tackles this risk, and helps improve the extent of shar?'ah compliance of market players. The authors detail the internal, external, and institutional arrangements needed to promote responsible shar?'ah governance, and critically analyze current laws, regulations, and industry practices on the topic. The chapters of the book do the following: Examine the roots, characteristics and objectives of shar?'ah and its relation to financial dealings; Probe the role of regulators in shar?'ah governance, explore the different approaches adopted by banking supervisors, and provide examples of relevant legal and regulatory measures; Explain to bank directors and management the fiduciary duty they assume with respect to shar?'ah compliance, and detail how they could discharge this responsibility in line with best practices; Elaborate on

the purpose of the Shar?'ah Supervisory Board (SSB), its responsibilities, competence criteria, internal regulations, and key governance guidelines; additionally, they explore different SSB models; Describe the internal shar?'ah control system including its six components, and examine the internal shar?'ah audit function as well as different stages of conducting a shar?'ah audit; Clarify the role of a shar?'ah auditor, with guidance on reporting lines, scope of duties, authority, and practical ways on fulfilling tasks, such as a sample shar?'ah risk assessment grid and audit checklists; Discuss the newly emerging external shar?'ah advisory firms that are expected to play a key role in the coming years and the services they provide. Through an effective treatment of each of these elements, and the way that they interact with one another, the book offers a fresh take on how robust shar?'ah governance of Islamic banks can be successfully accomplished. It is a comprehensive resource for academics, regulators, directors, lawyers, auditors, consultants, employees, and customers of Islamic banks interested in learning more about these challenges. This essential reading persuasively extends the discourse on the subject and addresses critical shar?'ah issues that have policy implications for decision makers in jurisdictions aiming to attract the fast-growing Islamic finance industry or increase their market share.

The Second World War is long over but its legacy continues to tear a town - and a young boy's life - apart. Knud is growing up in Falster, a small Danish town in the 1960s. The war is over but the Germans are still hated and Knud has a German mother. Bullied and persecuted at school, he retreats into the eccentric world of his family's history - but he can't escape the fact that, for him, his parents, and his paternal grandparents, the war is still being fought. Depicting a town and a family devastated by prejudice, *Nothing But Fear* is written with empathy and venom in equal measure.

This unique A-Z guide to central heating wiring systems provides a comprehensive reference manual for hundreds of items of heating and control equipment, making it an indispensable handbook for electricians and installers across the country. The book provides comprehensive coverage of wiring and technical specifications, and now includes increased coverage of combination boilers, recently developed control features and SEDBUK (Seasonal Efficiency of Domestic Boilers in the UK) boilers ratings, where known. In addition to providing concise details of nearly 500 different boilers fuelled by electric, gas, oil and solid fuel, and over 400 programmers and time switches, this invaluable resource also features numerous easy-to-understand wiring diagrams with notes on all definitive systems. Brief component descriptions are provided, along with updated contact and website details for most major manufacturers. Ray Ward has spent over 20 years as a specialist in the field of wiring domestic central heating systems and the knowledge he has gained from hands-on experience and staff training is now brought together in this comprehensive handbook.

THOMAS REGISTER 2005

Production Engineering: Jig and Tool Design focuses on jig and tool design as part of production engineering and covers topics ranging from inspection and gauging to multiple and consecutive tooling, tool calculation and development of form tools, deep-hole boring, and grinding-wheel form-crushing. Air and oil operated fixtures, negative rake machining, and the economics of jig and fixture practice are also discussed. This text is comprised of 22 chapters; the first of which provides an overview of the function and organization of the jig and tool department.

Attention then turns to the subject of cutting tool materials, with emphasis on the science of surface technology and the effects on the economics of tooling. A chapter on diamond tools offers insights into boring and turning operations, and examples of the features of preset tooling are presented. The chapter on air or oil operated fixtures contains examples from actual practice, some of the pneumatic examples being applicable to holding small units where the machining time is in seconds, and the rapid insertion and removal of work is essential. The reader is also introduced to the methods of truing grinding wheels, including surface grinding, and diamond honing. The book concludes by highlighting the problem of small batch manufacture in transfer machining and group technology. This book is intended not only for the experienced jig and tool designers but also for the production engineering students and the technical college lecturers.
