Solving Problems in Technical Communication collects the latest research and theory in the field and applies it to real-world problems faced by practitioners—problems involving ethics, intercultural communication, new media, and other areas that

determine the boundaries of the discipline. The book is structured in four parts, offering an overview of the field, situating it historically and culturally, reviewing various theoretical approaches to technical communication, and examining how the field can be advanced by drawing on diverse perspectives. Timely, informed, and practical, Solving Problems in Technical Communication will be an essential tool for undergraduates and graduate students as they begin the transition from classroom to career.

About 80% of people have the desire to write a book at some point. With the advance of computer and printing technology, this dream can become a reality. One important factor of publishing a book is to create a professional looking book cover. This book uses book cover design as a case study to teach you how to use FREE Scribus software (instead of expensive professional software like InDesign, Photoshop, and QuarkXpress) to create professional presentations. With fewer words and many full color screenshots, we walk you step by step through the entire process. No prior experience is needed. You will learn how to: 1.Download all the FREE software needed. 2.Put the cover template in correct formats. 3.Set up the sheet correctly using units, colors (RGB or CMYK), layers, the imported cover template, sizes, guides, bleed area, and safety margin. 4.Add the background color for the cover with a shape or image frame. 5.Add the cover image and author's photo, as well as how to handle a fully bleed image. 6.Add the titles and text accurately, including information on selecting or changing the text color, using the text box, centering the text, aligning different text boxes, and rotating the text. 7.Add the barcode by extracting the barcode from an EPS file and moving all the

barcode elements together or by adding the barcode as a JPEG image file. 8.Use Scribus software to create professional presentations such as book covers, magazine covers, graphic designs, posters, newsletters, renderings, and more. About the authors Alice Chen is an avid Scribus user. She has extensive interest in presentation software, and resides in California. Gang Chen holds a master's degree from the School of Architecture, University of Southern California (USC), Los Angeles, and a bachelor's degree from the School of Architecture, South China University of Technology.
