Getting Your Ideas Across Through Writing Cambridge University Press

As we approach a great turning point in history when technology is poised to redefine what it means to be human, *The Fourth Age* offers fascinating insight into AI, robotics, and their extraordinary implications for our species. "If you only read just one book about the AI revolution, make it this one" (John Mackey, cofounder and CEO, Whole Foods Market). In *The Fourth Age*, Byron Reese makes the case that technology has reshaped humanity just three times in history: 100,000 years ago, we harnessed fire, which led to language; 10,000 years ago, we developed agriculture, which led to cities and warfare; 5,000 years ago, we invented the wheel and writing, which lead to the nation state. We are now on the doorstep of a fourth change brought about by two technologies: AI and robotics. "Timely, highly informative, and certainly optimistic" (Booklist), *The Fourth Age* provides an essential background on how we got to this point, and how—rather than what—we should think about the topics we'll soon all be facing: machine consciousness, automation, changes in employment, creative computers, radical life extension, artificial life, AI ethics, the future of warfare, superintelligence, and the implications of extreme prosperity. By asking questions like "Are you a machine?" and "Could a computer feel anything?", Reese leads you through a discussion along the cutting edge in robotics and AI, and provides a framework by which we can all understand, discuss, and act on the issues of the Fourth Age and how they'll transform humanity.

You are a writer and you have a killer book idea. When your project starts to take off you will find yourself managing a writhing tangle of ideas, possibilities and potential potholes. How do you turn your inspiration into a finished novel? *Writing a User's Manual* offers practical insight into the processes that go into writing a novel, from planning to story development, research to revision and, finally, delivery in a form which will catch the eye of an agent or publisher. David Hewson, a highly productive and successful writer of popular fiction with more than sixteen novels in print in twenty or so languages, shows how to manage the day to day process of writing. Writers will learn how to get the best out of software and novel writing packages such as Scrivener, which help you view your novel not as one piece of text, but as individual linked scenes, each with their own statistics, notes and place within the novel structure. As you write, you will need to assemble the main building blocks to underpin your artistry : story structure; genre - and how that affects what you write; point of view; past, present or future tense; software for keeping a book journal to manage your ideas, research and outlining; organization and more. The advice contained in this book could mean the difference between finishing your novel, and a never-ending work in progress. An essential tool for writers of all kinds. Foreword by Lee Child.

Writing: A User Manual Simon and Schuster

Addiction recovery requires a serious commitment, yet that doesn't mean it has to be a bleak, never-ending struggle. "Recovering takes us through many difficult steps of discipline, humility, and self-realization," says Kevin Griffin. "In doing so, many of us forget that we are capable and deserving of basic happiness." With *Recovering Joy*, Kevin Griffin fills in what is often the missing piece in addiction recovery programs—how to regain our ability to live happier lives. *Recovering Joy* offers a deeply insightful

This book defines "translationality" by weaving a number of sub- and interdisciplinary interests through the medical humanities: medicine in literature, the translational history of medical literature, a medical (neuroscience) approach to literary translation and translational hermeneutics, and a humanities (phenomenological/performative) approach to translational medicine. It consists of three long essays: the first on the traditional medicine-in-literature side of the medical humanities, with a close look at a recent novel built around the Capgras delusion and other neurological misidentification disorders; the second beginning with the traditional history-of-medicine side of the medical humanities, but segueing into literary history, translation history, and translation theory; the third on the social neuroscience of translational hermeneutics. The conclusion links the discussion up with a humanistic (performative/phenomenological) take on translational medicine.

You've probably heard a lot about ways you can conserve energy by changing the type of light bulbs you buy, driving a hybrid vehicle, or recycling your garbage. These are all important ways to help solve the world's energy crisis, but did you ever consider a more direct contribution? Choosing a

career in green energy could be a way to help the world and be part of an exciting and fulfilling new field. The young adults of today will be the job force of tomorrow, so choosing a career that will best fit with the needs of the changing world will be important to job satisfaction and a successful life. With the vast array of career and job options, it will also be important for young adults to understand which work will be the best match for their interests, talents, goals, and personality types. Certain careers are expected to gain importance within the early decades of the twenty-first century. Many occupations related to green or renewable energy are on track to grow faster than the average rate for all occupations. "We know the country that harnesses the power of clean, renewable energy will lead the twenty-first century," said President Barack Obama in an address to Congress on February 24, 2009. If you choose a career in green energy, you too will be one of the future's leaders!
