Praise for the First Edition: "The book is well-written, interesting, informative, thorough, and useful! As an educator for 43 years, this is the sort of text that I would be pleased to use in my classroom!...I would highly recommend this book! It is an important contribution to the field!"-- Gerry R. Cox , PhD, *Illness, Crisis and Loss* This core, introductory textbook for undergraduate and graduate-level courses is the first to combine the knowledge and skills of counseling psychology with current theory and research in grief and bereavement. The second edition has been updated to reflect important new research and changes in the field, including insights on complicated grief, resilience after adverse life experiences, and compassion-based approaches to death, loss, and grief. It discusses the implications of the DSM-5's omission of the bereavement exclusion for the diagnosis of a major depressive disorder. A completely new chapter on the social context of loss addresses social messages, grieving rules, workplace policies, and the disenfranchisement of many aspects of normal, health grief. The text also touches upon some of the therapies that have been developed by major researchers in the field to address complicated grief. New case scenarios further enrich the second edition. The text is grounded in the belief that grief counseling is distinct from other therapeutic issues because it is an adaptive response rather than a form of pathology. It describes the unique aspects of grief as a normal response to losses both death and non-death related, and views the goal of counseling bereaved individuals as one of facilitating the unfolding of the healthy and adaptive aspects of the process as it manifests itself within each client. The book introduces various theories of bereavement and examines different therapeutic modalities that can be used in the context of grief and loss. Specific counseling practices that facilitate successful interventions are discussed, particularly that of "presence," considered by the authors to be the primary therapeutic stance when working with bereaved individuals. The text also addresses grief counseling with special populations, ethical issues, and self-care concerns for counselors. Case studies, discussion and reflection questions, and suggested additional resources are included in each chapter. New to the Second Edition: New insights on complicated grief, DSM categorizations of grief, resilience, and compassion-based approaches to death, loss, and grief A

Inclusive instruction is teaching that recognizes and affirms a student's social identity as an important influence on teaching and learning processes, and that works to create an environment in which students are able to learn from the course, their peers, and the teacher while still being their authentic selves. It works to disrupt traditional notions of who succeeds in the classroom and the systemic inequities inherent in traditional educational practices.— Full-time Academic Professional, Doctorate-granting University, Education This book uniquely offers the distilled wisdom of scores of instructors across ranks, disciplines and institution types, whose contributions are organized into a thematic framework that progressively introduces the reader to the key dispositions, principles and practices for creating the inclusive classroom environments (in person and online) that will help their students succeed. The authors asked the hundreds of instructors whom they surveyed as part of a national study to define what inclusive teaching meant to them and what inclusive teaching approaches they implemented in their courses. The instructors' voices ring loudly as the authors draw on their responses, building on their experiences and expertise to frame the conversation about what inclusive teachers do. The authors in addition describe their own insights and practices, integrating and discussing current literature relevant to inclusive teaching to ensure a research-supported approach. Inclusive teaching is no longer an option but a vital teaching competency as our classrooms fill with racially diverse, first generation, and low income and working class students who need a sense of belonging and recognition to thrive and contribute to the construction of knowledge. The book unfolds as an informal journey that allows the reader to see into other teachers' practices. With questions for reflection embedded throughout the book, the authors provide the reader with an inviting and thoughtful guide to develop their own inclusive teaching practices. By utilizing the concepts and principles in this book readers will be able to take steps to transform their courses into spaces that are equitable and welcoming, and adopt practical strategies to address the various inclusion issues that can arise. The book will also appeal to educational developers and staff who support instructors in their inclusive teaching efforts. It should find a place in reflective workshops, book clubs and learning communities exploring this important topic.
