Sexuality is a difficult
topic for all educators.
Dance teachers and
educators are not
immune to these
educational
challenges, especially
given the large
number of children,
adolescents, and
young adults who
pursue dance study
and performance.
Most troubling is the
lack of serious
discourse in dance
education and the

development of
educative strategies to
promote healthy
sexuality and
empowered gender
identities in proactive
ways. This volume,
focused on sexuality,
gender, and identity in
dance education,
expands this
developing area of
study and investigates
diverse perspectives
from public schools,
private sector dance
studios and schools, as
well as college and
university dance
programs. By openly
bringing issues of
sexuality and gender to
the forefront of dance
education and training,
this book
straightforwardly
addresses critical
challenges for engaged
educators interested in
age appropriate
content, theme and
costume; the hyper-
sexualization of

children and
adolescents; sexual
orientation and
homophobia; the
hidden curriculum of
sexuality and gender;
sexual identity; the
impact of
contemporary culture;
and mass media, and
sexual exploitation.
The original research
provides a frank
discussion,
highlighting practical
applications and
offering insights and
recommendations for
today ' s educational
environment in dance.

case study research. The authors--all professors teaching graduate students in education and other professions--provide the structure, detail, and guidance needed for beginning researchers to complete a systematic case study.

It shows students how to determine an appropriate research design, conduct informative interviews, record observations, document analyses, delineate ways to confirm case study findings, describe methods for deriving meaning from data, and communicate findings. Book Features: Straightforward introduction to the

science of doing case study research. A step-by-step approach that speaks directly to the novice investigator. Many concrete examples to illustrate key concepts. Questions, illustrations, and activities to reinforce what has been learned.
