*NY Regents Earth Science Test Prep Review--Exambusters Flashcards* Simon and Schuster Reflecting the latest New York State curriculum change, this brand-new addition to Barron's Let's Review series covers all topics prescribed by the New York State Board of Regents for the new Integrated Algebra Regents exam, which replaces the Math A Regents exam. This book stresses rapid learning, using many step-by-step demonstration examples, helpful diagrams, enlightening "Math Fact" summaries, and graphing calculator approaches. Fourteen chapters review the following topics: sets, operations, and algebraic language; linear equations and formulas; problem solving and technology; ratios, rates, and proportions; polynomials and factoring; rational expressions and equations; radicals and right triangles; area and volume; linear equations and graphing; functions, graphs, and models; systems of linear equations and inequalities; quadratic and exponential functions; statistics and visual representations of data; and counting and probability of compound events. Exercise sections within each chapter feature a large sampling of Regents-type multiple-choice and extended response questions, with answers at the back of the book. Students will find this book helpful when they need additional explanation and practice on a troublesome topic, or when they want to review specific topics before taking a classroom test or the Regents exam. Teachers will value it as a lesson-planning aid, and as a source of classroom exercises, homework problems, and test questions.

The Algebra Conspiracy is an irreverent, radical, politically incorrect, passionate challenge to the increasingly popular program of the educational establishment which requires every student to take two to four years of college-preparatory mathematics to earn a high school diploma. These well-meaning but misguided people are placing every secondary school student into Algebra, Geometry and Trigonometry classes that they may not want, that they may not need to fulfill requirements for future employment, or that they may not be academically equipped to handle. This means, for instance, that a youngster who has trouble adding common fractions, computing with percents or even making change on a ten dollar purchase will nevertheless be required to pass Algebra and Geometry. In many school districts this is already creating an academic nightmare, as more and more math teachers are faced with the Hobson 's choice of either failing many of their students who simply cannot handle Algebra and Geometry, or handing out numerous " gift D ' s," or severely watering down the college-prep mathematics curriculum so more students can pass the classes. The author takes the controversial view that, the Age of Technology notwithstanding, a large percentage of today 's secondary school youngsters could, if allowed, live their entire adult working lives very comfortably without ever being forced to set foot in Algebra and Geometry classrooms. There are many other classes that these youngsters should be taking — such as cultural or practical arts electives — instead of wasting their time in college-prep math classes.

Integrated Algebra on the TI-73 presents a graphing calculator workbook with exercises designed to be completed with the TI-73 graphing calculator. Many can also be completed with the TI-83+/TI-84+ graphing calculator. Intended to serve as a guide for students preparing for the New York State Integrated Algebra Regents Exam, this textbook also gives alternate strategies for solving math problems that you already learned how to solve or calculate in integrated algebra class; provides extra practice on regents-type questions; demonstrates how to work around quirks in the programming of the calculator; teaches developing skills needed for the Geometry and Algebra 2/Trigonometry exams, as well as college calculus and statistics courses. Some of topics covered go beyond the scope of the Integrated Algebra exam in order to accommodate use as a text as a mathematics elective. These can be omitted if the workbook is used as a supplement to a course leading to the Integrated Algebra regents. Prepare for the exam, learn your graphing calculator more thoroughly, and improve your knowledge of integrated algebra with Integrated Algebra on the TI-73.
