Since the publication of New Practical Chinese Reader in 2002, it has been well-received by teachers and learners. For users' convenience, in this new edition we have revised those points we found improper. In contrast to its first edition, the notes of the texts are designed next to each text to facilitate students. We have not revised the framework, especially the texts and the main language points of the textbook. Users can visit www.blcup.com/resource.blcup.com and download the traditional Chinese version of the texts for free. All the reading materials and illustrations in the workbook are updated. This is the second edition of the Workbook 4, which corresponds to Textbook 4. Each lesson is divided into two parts: 1. Listening and speaking exercises; 2. Reading and writing exercises. Readers are exposed to genuine Chinese materials to improve their integrated skills in listening, speaking, reading and writing. A CD of MP3 file is attached to the book, providing the recording of the listening exercises.

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand—and apply—key concepts.

Modern Mandarin Chinese is a two-year undergraduate course for students with no prior background in Chinese study. Designed to build a strong foundation in both the spoken and written language, it develops all the basic skills such as pronunciation, character writing, word use, and structures, while placing a strong emphasis on the development of communicative skills. Each level of the course consists of a textbook and workbook in simplified Chinese. A free companion website provides all the audio for the course with a broad range of interactive exercises and additional resources for students' self-study, along with a comprehensive instructor's guide with teaching tips, assessment and homework material, and a full answer key. Key changes to this new edition: An increased number of vocabulary and characters introduced. 255 characters are introduced in this second edition for active production. Dialogues and example sentences are also presented in full-character format for passive recognition, and to provide additional challenge for more advanced students. Additional exercises in the workbooks and online to support the expanded number of words and characters incorporated into the textbooks. New cross-references between the textbooks, workbooks and companion website facilitate using all the resources in an integrated manner. Greatly enhanced and re-designed website. Retaining its focus on communicative skills and the long-term retention of characters, the text is now presented in simplified characters and pinyin from the outset with a gradual and phased removal of pinyin as specific characters are introduced and learnt. This unique approach allows students to benefit from the support of pinyin in the initial stages as they begin speaking while ensuring they are guided and supported towards reading only in characters.

Basic Mandarin Chinese - Speaking & Listening Practice Book Cheng & Tsui Company

This user-friendly book is aimed at helping students of Mandarin Chinese learn and remember Chinese characters. At last—there is a truly effective and enjoyable way to learn Chinese characters! This book helps students to learn and remember both the meanings and the pronunciations of over 800 characters. This otherwise daunting task is made easier by the use of techniques based on the psychology of learning and memory. Key principles include the use of visual imagery, the visualization of short "stories," and the systematic building up of more complicated characters from basic building blocks. Although Learning Chinese Characters is primarily a book for serious learners of Mandarin Chinese, it can be used by anyone with an interest in Chinese characters, without any prior knowledge of Chinese. It can be used alongside (or after, or even before) a course in the Chinese language. All characters are simplified (as in mainland China) but traditional characters are also given, when available. Key features: Specially designed pictures and stories are used in a structured way to make the learning process more enjoyable and effective, reducing the need for rote learning to the absolute minimum. The emphasis throughout is on learning and remembering the meanings and pronunciations of the characters. Tips are also included on learning techniques and how to avoid common problems. Characters are introduced in a logical sequence, which also gives priority to learning the most common characters first. Modern simplified characters are used, with pronunciations given in pinyin. Key information is given for each character, including radical, stroke-count, traditional form, compounds, and guidance on writing the character. This is a practical guide with a clear, concise and appealing layout, and it is well-indexed with easy look-up methods. The 800 Chinese characters and 1,033 compounds specified for the original HSK Level A proficiency test are covered.

Go! Chinese now comes with a second edition offering new and improved content! As a fully integrated Chinese language program, it is specially designed for learners of Chinese as a foreign language. Comprising eight levels, Go! Chinese helps students develop all four language skills across the three modes of communication (interpretive, interpersonal, and presentational). It engages students in an exploration of Chinese culture and helps them gain an appreciation of Chinese cultural products, practices, and perspectives. Students will also have opportunities to compare different cultures, make connections with other discipline areas, and extend their learning experiences to their homes and communities. The program employs innovative teaching methodologies to enhance language learning, and to motivate students to learn Chinese. Go! Chinese is divided into two series: Beginner (Levels 1-4) and Intermediate (Levels 5-8). The Beginner Series equips students with vocabulary and common expressions for everyday interactions in Chinese, while the Intermediate Series places more emphasis on cultural comparison, self-expression, and opinion exchange. Each level offers 10 lessons and consists of a Textbook and a Workbook. The program's companion site offers additional resources for teachers and students.
