The Philippines series of the PALI Language Texts, under the general editorship of Howard P. McKaughan, consists of lesson textbooks, grammars, and dictionaries for seven major Filipino languages. Ilokano is an Austronesian language. It ranks third among the major languages of the Philippines, being spoken by just over 12 percent of the population. Widely spoken throughout the Philippines, Ilokano is the dominant language of most of the provinces of Northern Luzon and is used as a lingua franca by non-Ilokano speakers in this area. Settlers have also carried the language to Mindoro and to several areas in Mindanao. The Ilokano dictionary was developed under the auspices of the Pacific and Asian Linguistics Institute (PALI) of the University of Hawaii, and accompanies the Ilokano reference grammar by the same author as well as Ilokano Lessons by Bernabe,

Lapid, and Sibayan. The dictionary contains some 7,000 Ilokano entries. Many of the entries are illustrated by Ilokano sentences to clarify usage.

This book on organic Rankine cycle technology presents nine chapters on research activities covering the wide range of current issues on the organic Rankine cycle. The first section deals with working fluid selection and component design. The second section is related to dynamic modeling, starting from internal combustion engines to industrial power plants. The third section discusses industrial applications of waste heat recovery, including internal combustion engines, LNG, and waste water. A comprehensive analysis of the technology and application of organic Rankine cycle systems is beyond the aim of the book. However, the content of this volume can be useful for scientists and students to broaden their knowledge of technologies and applications of organic Rankine cycle systems.

This volume, the first in a three-book series titled

Communication Processes, is devoted to understanding the politics in, and of, communication. It explores both the ground on which processes of communication unfold and the political configurations implied in communication processes. This two-pronged approach questions the preoccupation in Indian scholarship with the 'deployment' of communication technology, and the 'impact' of mass media, and suggests a repositioning of 'communication' as an interdisciplinary domain of enquiry. Like in the ensuing volumes, the editors of this book juxtapose a pluralist universe of conceptual articulations, theoretical constructs and empirical validations. In addressing these questions, the contributors steer through, on the one hand, the modernization-inspired tradition of communication research in

India—predominated by impact and reception studies—and, on the other, global trends that shaped the glut of fashionable writings—coincidental with and spurred by transnational television and the internet—during the 1990s.
