The concept of Functional Patterns is a train of thought that has been building upon itself over the course of my entire lifetime. I was taught at a very young age to question authority and everything around me by my highly skeptical parents. My parents were extremely hard workers who were very resourceful with the little money they had. They lived by the "practice what you preach" motto in every sense they could. The apple didn't fall very far from the tree and I have embodied (to the best of my ability) what I was fortunate enough to be taught at a very young age. The Functional Patterns method didn't start with the memorization of techniques. It started at a base of reasoning that has seemingly been missing from the industry of health today. When ego checking experiences of life mixed with the values I had already wired in from my childhood, a different approach towards looking at the human organism emerged.
